

Volga LED Batten

Please read these instructions thoroughly before use and retain for future reference.

Safety Information

- Before commencing installation or any maintenance, turn off and isolate the circuit to be worked on by removing the fuse or switching the circuit breaker off at the distribution board.
- Installation must be carried out in accordance with national building and wiring regulations. If you are in any doubt about installing this product, please consult a qualified electrician.
- This product is suitable for connection to a 220-240Vac 50-60Hz supply.
- This product is a **Class II** product not requiring an Earth connection, though a terminal is provided for continuity.
- This product is **IP69K** rated for areas with high humidity and dust.
- If connecting the luminaire to independent sensors or time switches, ensure that the control device does not leak a voltage through the luminaire in the off state. Leaked voltages may accumulate and cause intermittent flashes in the off state.
- When drilling holes take care not to damage existing wiring or pipework.

Installation Information

- Decide on the location of the batten and fix the clips or suspension wires as shown below.
- The luminaire has connectors with terminals inside the glands at each end suitable for interconnection.
- Feed the supply cable through the gland and connect to the terminals as follows and shown below:

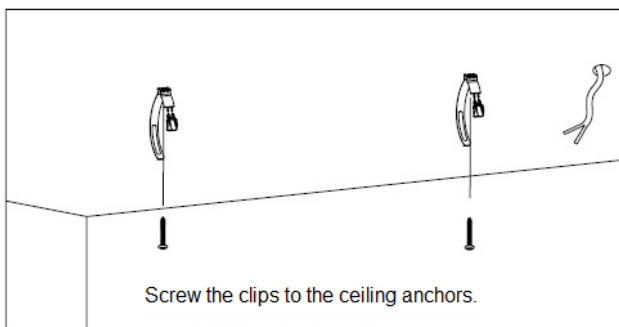

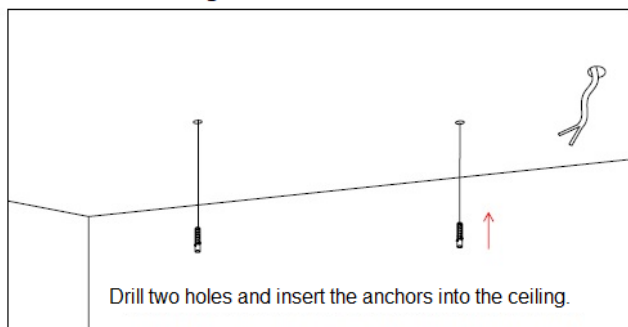

Brown – Switched Live (L)

Blue – Neutral (N)

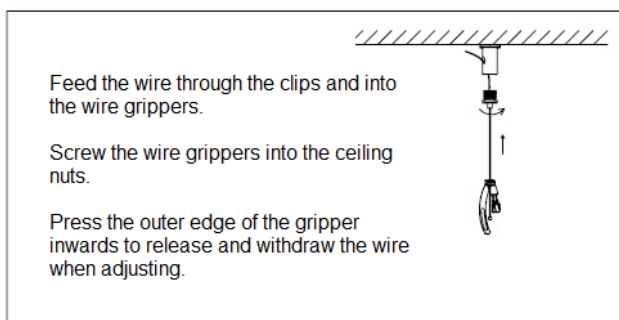

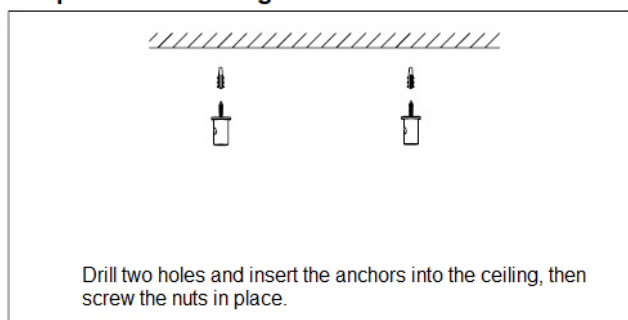

Green/Yellow – Earth (E) – for continuity only.

- Ensure that all electrical connections and glands are tight with no loose strands.
- Reconnect the power supply.
