

NM Consumer Units for use in Domestic Household Premises

Amendment No. 3 BS 7671

CONSUMER UNITS FOR USE IN DOMESTIC PREMISES

17th Edition Wiring Regulations Incorporated

REGULATION 421.1.201

From January 2015 Amendment No. 3 to BS 7671 IET Wiring Regulations prescribe that within domestic (household) premises, consumer units and similar switchgear assemblies shall have their enclosures manufactured from non combustible material, or be enclosed in a cabinet or enclosure constructed of non combustible material and comply with product standard BS EN 61439-3.

What are Domestic Household Premises ?

Typical Domestic household premises would include single and multiple occupancy homes such as Houses, Bungalows, High Rise & Low Rise Flats, Apartments, Student lets, Sheltered Accommodation, Farmhouses, Houseboats, Static Homes, Home Office, attached Garages, Workshops and Detached Summerhouses etc.

What is Non Combustible Material ?

There are many types of non combustible material however, amendment 3 of the 17th Edition regulations provides an acceptable example as ferrous metal i.e. Steel Consumer Units.

What is an Enclosure ?

The consumer unit enclosure must be manufactured from a non combustible material so as to limit the spread of fire. An enclosure means the box, cover, door, hinges, handle and any components required to maintain the integrity of the unit.

What is Similar Switchgear ?

Similar switchgear is switchgear that is used for the same fundamental application i.e. a circuit protection assembly with two pole isolator and one or more circuit protection devices, e.g. MCB distribution board, fuse switch, garage unit or PV switchgear etc.

What are Cabinets ?

Typical cabinets are meter cabinets that are normally built into the fabric of the building and that may or may not include consumer units within. If the cabinet is of an all metal construction (non-combustible), then a standard skeleton consumer unit (FAL) can be installed within. If the cabinet is of a combustible material, a metal consumer unit is required.

What about Cable Entry ?

As usual good workmanship and proper materials should be applied to all installation work, consumer units must be installed to achieve IP4X on the top elevation (regulation 416.2.2) and IP2XC on all other elevations. This can be achieved by use of cable entry accessories such as consumer unit pattress or other means such as glanding.

DOMESTIC HOUSEHOLD PREMISES

Incorporating Amendment No. 3 : 2015

- All metal enclosure, no external plastic parts
- Low Smoke & Fume paint
- Non combustible cover blanks
- Compact enclosure
- Available in 'no miss terminal' fixed busbar versions and flexible versions
- Raised & removable DIN rail / busbar assembly
- Cable entry knockouts on 5 sides, top, bottom, left, right and rear
- Mains tails cable entry grommet / gland for supplementary insulation similar to Class II level of protection to mains tails
- Time delay RCD available for TT systems
- Up to 38 way UNKS, all designs Main Switch, High Integrity, Split Load, Dual RCD
- RoHS compliant in excess of UK standards
- UKAS certified to BS EN 61439-3

What about Cable Entry ?

The IET on site guide also recommends that where metal consumer units are installed into TT systems the mains tails are protected against the possibility of becoming loose and making contact with the metal enclosure by incorporating into the installation 100mA time delayed (S type) RCCB protection.

Furthermore in all cases (including TT) the mains tails should be protected at the point of entry into the metal enclosure e.g. by use of a mains tails gland to protect against the possibility of mechanical damage and or disturbance that could lead to tails becoming loose and making contact with the metal enclosure.

CONSUMER UNITS FOR USE IN DOMESTIC HOUSEHOLD PREMISES

17th Edition Wiring Regulations Including Amendment No. 3

Amendment No3 has brought about the requirement for 'all metal' non combustible enclosures for consumer units and similar switchgear. This is in addition to the requirements for Additional Protection (30mA RCD) as summarised below. Within domestic household premises.

- All socket outlets should be protected by 30mA RCD
- All circuits serving or passing through a room with a fixed bath or shower should be protected by one or more 30mA RCDs**
- All cables buried beneath the plaster surface of the wall or partition (at less than 50mm) should be protected by 30mA RCDs***
- All cables concealed in metal stud partitions (common in new builds) should be protected by 30mA RCDs****
- Installations should be divided up into circuits so as to take account of danger and inconvenience caused by a single fault - e.g. such as a lighting circuit***
- Installations should be designed and arranged so as to prevent unwanted tripping of RCDs***
- Safety services such as smoke alarms should be on independent circuits****
- Installed units must be to IP4X on top elevation & IP2XC elsewhere

REGULATIONS	RELATING TO:	EXAMPLES	ADDITIONAL PROTECTION
411.3.3*	Sockets up to 20A rating	Upstairs Sockets Downstairs Sockets Kitchen Sockets Cooker outlet with integral 13A socket Garage Sockets Plus any other sockets up to 20A rated	30mA RCD Taking into account 3.14.1 **** 3.14.2 ****
701.411.3.3**	All Circuits serving or passing through a room with a fixed bath or shower	Shower circuit Lighting circuit Heating circuit Ventilation circuit Shaver Socket Plus Other circuits	30mA RCDs Taking into account 3.14.1 **** 3.14.2 ****
522.6.200 series and 560.7.1*****	All circuits buried in a wall or partition at less than 50mm and without mechanical protection	Downstairs Lighting Upstairs Lighting Immersion heater Smoke Alarms Burglar Alarm (Safety service) Plus any other circuits	30mA RCD Taking into account 3.14.1 **** 3.14.2 ****

- (A) The IET on site guide also recommends that where metal consumer units are installed into TT systems the mains tails are protected against the possibility of becoming loose and making contact with the metal enclosure by incorporating into the installation a 100mA time delayed (S type) RCCB protection.
- (B) Furthermore in all cases the mains tails should be protected at the point of entry into the metal enclosure by use of a mains tails gland to protect against the possibility of mechanical damage and or disturbance that could lead to tails becoming loose and making contact with the metal enclosure.

* Regulation 411.3.3 socket outlets with a rated current not exceeding 20A.

** Regulation 701.411.3.3 Additional protection shall be provided for all circuits of the location by use of one or more 30mA RCD.

*** Regulations in the 522.6.200 series cables concealed in a wall or partition at less than 50mm depth and without earthed mechanical protection e.g. conduit.

**** Regulation 314.1 Every installation shall be divided into circuits as necessary to avoid danger and inconvenience in the event of a fault, take account of danger that may arise from the failure of a single circuit such as a lighting circuit, reduce the possibility of unwanted tripping of RCDs etc.

**** Regulation 314.2 Separate circuits to be provided for parts of the installation that need to be separately controlled in such a way that those circuits are not affected by the failure of other circuits.

***** Regulation 560.7.1 Chapter 56 circuits for safety services shall be independent of other circuits.

In addition Chapter 51 requires designers/installers to take account of all relevant British Standards and manufacturers instructions. For example BS5839 Part 6 is the British Standard for fire detection and alarm systems in dwellings. It states that power supplies to Grade D smoke alarms should be an independent circuit at the consumer unit, or a separately electrically protected local lighting circuit.

***** Regulation 416.2.2 requires that the installed consumer unit achieves IP4X (1mm probe) on the top elevation. All other elevations should be to IP2XC (2.5mm probe).

PV CONSUMER UNIT

Insulated metered consumer unit supplied with either Main Switch and 16A SP MCB or 16A RCBO with optional MID meter.

- 63A 320V AC DP Isolator
- 16A B Curve SP MCB
- 40A direct read MID Meter.
- Ready assembled consumer unit complete with MID Certified meter
- Combined unit simplifies and speeds up installation
- Complete with Isolator & MCB
- Easy read permanently displayed kWh reading
- Option available with RCBO or MCB

CAT REF.	DESCRIPTION
NMRCBO16BMPV	With DP 16A RCBO (with meter)
NMB16MPV	With SP 16A MCB (with meter)
NMRCBO16BPV	With DP 16A RCBO (no meter)
NMB16PV	With SP 16A MCB (no meter)

PV supplies should be connected to a dedicated circuit at the consumer unit (not share a final sub circuit)

PV supplies should be connected to the supply side of the MCB at the consumer unit (not reverse fed)

PV Meters must comply with MID2004/22/EC B & D or B & F

Note: Surge Protection devices and Type B RCDs are available on request

+ Suitable for flexible comb busbar consumer units only

DIN RAIL MODULAR DEVICES FOR USE IN + UNITS & FLEXIBLE UNITS

CAT REF	PRODUCT	MODULE
ME242/230	Staircase timer	1
SMSCD11	Digital time clock 1 channel 1xNO/NC contact 16A	1
TMSCD21	Digital time clock 1 channel 1xNO contact 16A	2
TMTCD22	Digital time clock 2 channel 24 hour 7Day prog	2
MESB-20NO	20A 2 pole contactor	1
MESB-24NO	24A 4 pole contactor	2
MESB-40NO	40A 4 pole contactor	3
MESB-63NO	63A 4 pole contactor	3
MTS8	Bell transformer 12V 8VA	2
TRMSCT31	Disc type time clock 1 channel 1xNC contact 16A	3
TRMSCT11	Disc type time clock 1 channel 1xNC contact 16A	3
SMSC11	Disc type time clock 1 channel 1xNO contact 16A	1

When fitting in NH Consumer Units contact Wylex technical services department

NH ACCESSORIES

CAT REF	PRODUCT	MODULE
NMMB	Metal blanking plate - Twist fit	1
NHB1PP	Blanking plate - Busbar & cover (insulated 960°C)	1
NHET25	25mm Earth Terminal	-
WPL	Padlock for NHLDK & MCBLDX	
NH13CBKIT	13 pin comb busbar c/w labels and 5 protection covers	

FLUSH MOUNTING KITS FOR NM

CAT REF	PRODUCT
NM07FLA	7 module flush kit assembly
NM10FLA	10 module flush kit assembly
NM13FLA	13 module flush kit assembly
NM16FLA	16 module flush kit assembly
NM21FLA	21 module flush kit assembly

For use on upgrading NM metal units only

NM CONSUMER UNIT PATTERNS

CAT REF TOP/BOTTOM	LEFT/RIGHT CABLE ENTRY	ENCLOSURE WIDTH	DEPTH
MNSPE-6462/BNR	MNSPE6668/7NR	7 Module	16mm
MNSPE-6462/CNR	MNSPE6668/10NR	10 Module	16mm
MNSPE-6462/DNR	MNSPE6668/13NR	13 Module	16mm
MNSPE-6462/ENR	MNSPE6668/16NR	16 Module	16mm
MNSPE-6462/FNR	MNSPE6668/21NR	21 Module	16mm

For use with NM consumer units. Allows surface cable entry through rear knockouts and automatically maintains enclosure IP rating to comply with BS7671 and BSEN61439-3

- Cable entry slot may be positioned top or bottom, or left/right

ACCESSORIES

CAT REF	PRODUCT
EIU	Moulded cable gland kit for metal consumer unit to provide additional support and supplementary insulation similar to Class II construction for the incoming cables. Suitable for 16mm ² or 25mm ² cable 32mm knockout

NH UPGRADE / REPLACEMENT COVER

CAT REF	PRODUCT
NH7/MCLA255G	7 module cover assembly
NH10/MCLA255G	10 module cover assembly
NH13/MCLA255G	13 module cover assembly
NH16/MCLA255G	16 module cover assembly
NH21/MCLA255G	21 module cover assembly

For use on upgrading existing NH metal units only (replacing cover, plastic visor and hinges). Colour Grey RAL 7035

RCCB

CAT REF	PRODUCT
P.O.A	100A 100mA time delay RCCB

CUSTOM BUILT

To meet the ever changing requirements and designs of the modern electrical installation, Wylex offers a service to the electrical installer for all the catalogued NM range of products - Consumer Units, and Distribution Boards to be modified and assembled to their own particular specification and meeting specific customer needs.

The levels of adaptation may vary from the basic pre-population and assembly of outgoing protective devices MCBs, RCBOs into the units with personalised labelling, to the

complete customisation and wiring of additional accessory devices within a unit:- for example meters, energy monitors, control switching equipment:- contactors, relays and timers, and over voltage surge protection devices plus almost any other DIN rail mounted piece of electrical accessory equipment that is available.

This Custom Built service can save time on site, reduce labour costs, and help achieve early completion & ultimately save money for the installer of these units.

Custom built metal consumer unit with circuit protection and control devices fitted

Acknowledged as the market leader in the UK domestic circuit protection market Wylex offers designers & specifiers a wide range of quality products that caters for a vast array of applications including domestic (household) premises.

Wylex factories operate a series of internationally recognized standards including ISO9001 for quality, OHSAS 18001 for Health & Safety and ISO14001 for Environmental Management. UK locations are home to the product management, engineering, design, quality & logistics teams.

In the UK Wylex has its UKAS accredited Laboratory that carries out R&D and compliance testing on all Wylex products, these highly accredited facilities ensure that safety, quality & reliability remain consistent with UK & EU legislation regulations & Siemens internal standards, policies and practices.

Wylex products are all designed manufactured and tested in accordance with the recognised BS, EN & ICC product standards, and backed by standard & extended guarantees.

Wylex also operates to recognised standards for product safety & sustainability, Wylex products are **RoHS** and **REACH** compliant often in excess of the UK market standards

Recycled materials are used in product packaging, and declared into a recycling scheme locally to control environmental impacts and assure that the maximum level of recycling of materials and use of recycled materials is achieved.

As a Siemens company Wylex also operates a zero harm scheme within all of its manufacturing logistics & sales facilities, and is proud to have achieved a 5 star Health & Safety rating.
