

Take your time

In all probability, things are the same for you as they are for many of us in our industry. **The demands on our business are constantly growing**, the level of complexity rises by the day and more and more challenges seem to lie in wait for us with ever-increasing frequency. As a result, when it comes to creating **tailor-made solutions** for new construction and renovation **based on the specific needs of our customers**, time is often in short supply.

But in this day and age, that is where the real opportunities lie. By offering new concepts for building automation systems, energy efficiency and the use of renewable energies, we are able to make the **day-to-day tasks of our customers safer and more comfortable** while also ensuring our business continues to develop dynamically. Hager employs more than 800 developers, who are constantly working on these solutions all around the world. In other words: we take our time to make **truly ground-breaking innovations** and intelligent technologies which are **just as quick to install as they are easy to use**. And of course, we also continue to provide you with all of the reliable products and safe solutions we have been long known for here at Hager.

We have been doing this **for around 60 years**. And we are only as successful as we are at what we do because of the trust you continue to place in us. I would like to take this opportunity to **express our warmest thanks** to you for this continued trust in us – and to recommend that you take a good look at our new catalogue, which serves as a **practical tool for electrical engineering**.

Please do take the time to consult the catalogue every now and again. It provides a **handy overview** of all of the solutions we use not only to save you a lot of time and effort, but also to **constantly tap into new sales potential**.

Hager is always on your side – as it has been for six decades and will continue to be in the electrifying future that lies ahead of us.

We at Hager look forward to **shaping this time with you**.

Best wishes,

Daniel Hager
CEO of Hager Group

The specialist for electrical installations

Since 1955 Hager is the specialist for electrical installations in residential and commercial sectors, as a standard you can receive everything from one source: systems and solutions with high quality, reliability and ease of installation.

New ideas for the customers' benefit

Together with customers from industry and the electrical trade, Hager Group is working on future topics such as electro-mobility, Ambient Assisted Living, where building automation facilitates the everyday life of the elderly and individuals who require care, and on the networking

of energy-efficient housing, which will provide greater comfort while requiring less energy consumption. The link between many of these technologies will be the distribution board, the product with which the company achieved its growth.

A leading group

The Hager brand represents the core business of Hager Group.

The company was founded in 1955 by Hermann Hager and Dr. Oswald Hager together with their father Peter and today remains an independent business, owned and run by members of the Hager family, with its head office in Blieskastel, Germany. The organisation of the company as a European Company (Societas Europaea, SE) underlines both its cultural diversity and its European roots. Hager Group is, though, a worldwide business venture: 11,400 employees and generates a turnover of around 1.6 billion euros (2013).

Highly innovative achievements provide a market edge with more than 830 employees working in R&D. With more than 5% of turnover reinvested in R&D, Hager Group filed a total of 1513 patents to date.

Components and solutions are produced in 22 production sites around the globe and customers in more than 80 countries all over the world trust in them.

Safe distribution of
energy, concentration
of communication
technology.

A clear structure - Hager's range of products

Hager has divided its extensive range of products into three areas of application, each marked with a different colour, to help you finding the right product and solution for your individual needs.

As the leading specialist in the field of electrical installations residential and commercial buildings, the Hager brand provides you with everything from one source: systems and solutions – highest quality, reliable and easy to install.

Switching with
style, smart building
automation.

Touching and inspiring

In its early days electricity was primarily associated with wonder. And Hager strives to make a decisive contribution to this. Using innovative technology and clear-cut design, the company has given energy a 'face' – one which is pleasant to look at and easy to understand – distinctive on the one hand, multifaceted on the other. Hager design not only embodies the functionality of our products but also our company's character while taking into account that external attributes are ever more important. Today people increasingly engage with their household technical systems, giving us good reason to reciprocate and touch you with our technology – aesthetically, haptically and emotionally.

"Everything you see and touch highlights the notion of ease and quality."

Daniel Hager

Erwin Van Handenhoven
Design Director of Hager Group

Strategic design management

Over the last six decades Hager's product range has grown rapidly. Moving on from specialising in meter panel systems, we have advanced to become a provider of entire electro-technical solutions for intelligent residential and commercial buildings. Whereas in the past it sufficed to design a small number of key products emphasizing functionality, today it is necessary to create an extensive realm of heterogeneous products. To reach this objective Hager relies on strategic design management – a design vocabulary containing many 'facial expressions', but also characterised by a distinct fundamental attitude.

Holistic design

This stance is not only reflected in the product itself but also shapes all related processes. When making the first drafts we already consider how a product will be manufactured, operated and eventually disposed of. Eco-design and eco-production assist us in employing all resources as intelligently as possible and in avoiding waste right from the start. This also holds true for our eco-friendly packaging design where we exclusively use recycled fibres which neither contain chemical bleaching agents nor composite materials that are difficult to separate.

The face behind the design

Hager's product design unmistakably bears the hallmarks of Erwin Van Handenhoven who has been Hager Group's Design Director since July 2013. The prolific cooperation between the renowned industry designer and Hager started in 2000. Beside the actual product design, part of Erwin's mission is shaping the future and in doing so, decisively and influentially advancing the evolution of the electro-technical industry. This has led to numerous product highlights that live up to tomorrow's design requirements in a very characteristic way. Many of them are to be found in the new Hager catalogue.

Have fun making some new discoveries!

Sustainability at Hager Group: E3

Nobody knows what tomorrow will bring.

That is why at Hager Group we have chosen to anticipate risks and seize our opportunities proactively. We invest in our employees and their training, in energy efficiency and future technologies, in fair trade relations and we work actively to continuously improve our eco-balance sheet. We may be giving up more profit in the short term, but we are convinced that this is the way to achieve lasting success.

*“As a family-owned company,
it is in our nature to remain sustainable!”*

Daniel Hager

We have translated this vision of sustainable development into a structured approach that we called E3.

E for ethics:

the way we behave with our employees, our partners and all stakeholders. We want to provide safe and healthy working conditions, equal opportunities and career development to all our employees and promote ethical behaviour.

E for environment:

we act with respect for the planet, to help preserve it. We optimise our resources by avoiding the use of hazardous substances and limiting the amount of harmful emissions and waste.

E for energy:

40% of global energy production is used inside buildings, a significant proportion of it in the form of electricity. Energy management is Hager Group's speciality. We want to create value in a responsible way, shared with our suppliers, customers and other stakeholders. This includes, in particular all the solutions and services we offer our customers for safe, efficient and intelligent use of energy in buildings.

For detailed information about E3, visit www.hagergroup.com

A service geared to your on site needs

From pre-assembled standard distribution units to bespoke composite TP&N boards, and plug in distribution boards Hager can provide the solution and we will deliver to site to an agreed deadline and to specification. All the power of an experienced design engineering team and an ISO 9001:2008 manufacturing plant is just a telephone call away.

As client requirements become more sophisticated, demands on electrical installation designs have increased. Many electrical distribution solutions require something that cannot be purchased off the shelf.

Whether it is an unusual configuration or simply speed on site that is an issue, Hager's engineered solutions supplies the answer. This Engineered Solutions service puts the power of our design engineers at your fingertips. You give us the specification and we will deliver what you need with the peace of mind of factory assured quality to ISO 9001:2008.

Metering

The Hager lighting and power meter board is a compact solution to meet the demands of energy metering within non-dwelling buildings. The standard power and lighting board is available in this catalogue and comes in two variants to meet the majority of applications.

However for special applications we also offer our full-engineered solutions design and build service. This service can also provide additional features such as data logging and web connectivity for remote meter reading.

1

Pre-assembled standard distribution board

Factory assembly of standard distribution boards with standard incoming and outgoing devices. Providing the installer with all of the products factory assembled and ready for cabling.

2

Engineered Consumer Units

Factory assembly of non-standard consumer units, special configurations in standard enclosures or metal DIN rail enclosures. Providing an exact product that meets the requirements of your particular installation needs.

Pluggable and metered consumer units are also an option. With pluggable consumer units circuit breakers are wired to sockets fitted into the enclosure enabling final circuit cabling to be simply plugged in.

3

Bespoke composite system

Factory prepared distribution boards ready for assembly on site with apertures pre-cut to allow cable access between the various enclosures, combining Panelboards and TP&N boards into bespoke composite panels.

Standard metal distribution boards designed to accommodate customer specified OEM equipment.

Consumer Units

The ultimate range

Our range of consumer units have been developed through years of indepth customer research, design and development. In this catalogue you will find our Design range of Amendment 3 compliant consumer units which have been specifically developed to meet the latest regulations along with our current range of insulated consumer units.

Design Range	1.2
Insulated Consumer Units	1.14

Design Range

Amendment 3 compliant consumer units

The Amendment 3 compliant Hager Design range features solutions suitable for installations where the consumer unit will be on show and where they are hidden away.

Through in-depth customer research and extensive testing we have developed a number of consumer units to allow compliance with Amendment 3. Incorporating numerous features and benefits for the ease of installation has resulted in ranges aimed at meeting the requirements of differing customer groups.

Our Design range is always expanding and evolving, and as such the most up to date list of products can be found on our website, www.hager.co.uk/design.

Design 30	1.4
Design 30 Dual Row	1.6
Design 30 Garage Boards	1.7
Design 10	1.8

VM206

Switch Disconnecter

Metal switch disconnecter incomer enclosures, single row from 2 to 20 outgoing ways.

Enclosures come supplied with a full metal DIN rail, 63A or 100A switch disconnecter incomer and full complement of earth and neutral terminals along with marking labels, busbar,

instructions, rear cable protector plate and meter tail clamp.

Recommended for use with TT systems when utilising RCBO on outgoing circuits.

Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).

For accessories see page 1.12
For dimensions see page 1.20

All boards contain rear cable entry, boards with knockouts also contain top & bottom knockouts - see page 1.20.

Description

Description	Size	Cat ref.	Cat ref. with knockouts
2 Way 63A Switch Disconnecter Incomer	2	VM202	VM202K
6 Way 63A Switch Disconnecter Incomer	3	VM206	VM206K

RCCB Incomer

VM310H

Metal RCCB incomer enclosures, single row from 2 to 14 outgoing ways.

Enclosures come supplied with a full metal DIN rail, 40A, 63A or 100A 30mA RCCB incomer and full complement of earth

and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.

Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).

For accessories see page 1.12
For dimensions see page 1.20

All boards contain rear cable entry, boards with knockouts also contain top & bottom knockouts - see page 1.20.

14 Way 100A 30mA RCCB Incomer	5	VM314H	VM314HK

VM712TG

Time Delayed RCCB Incomer

Metal RCCB incomer enclosures, single row 12 outgoing ways.

Enclosures come supplied with a full metal DIN rail 100A 100mA time delayed and 63A 30mA RCCB incomers and full complement of earth and neutral terminals along with marking

labels, busbar, instructions, rear cable protector plate and meter tail clamp.

Recommended for use with TT systems.

Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).

For accessories see page 1.12
For dimensions see page 1.20

All boards contain rear cable entry, boards with knockouts also contain top & bottom knockouts - see page 1.20.

VM716C

Split Load

Metal split load and configurable enclosures, single row from 6 to 16 outgoing ways.

Enclosures come supplied with a full metal DIN rail and 2 RCCBs and full complement of earth

and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.

Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).

For accessories see page 1.12
For dimensions see page 1.20

All boards contain rear cable entry, boards with knockouts also contain top & bottom knockouts - see page 1.20.

VM878R

High Integrity

Metal split load and configurable enclosures with ability to protect selected circuits with RCBOs and remainder of circuits split accross two RCCBs. Single row from 10 to 16 outgoing ways.

Enclosures come supplied with a full metal DIN rail and 2 RCCBs and full complement of earth and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.

Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
For accessories see page 1.12
For dimensions see page 1.20

All boards contain rear cable entry, boards with knockouts also contain top & bottom knockouts see page 1.20.

VM918C

Multi Tariff

Metal switch disconnecter incomer enclosures, single row, 12 or 18 outgoing ways.

Enclosures come supplied with a full metal DIN rail, multiple switch disconnecter incomers and full complement of earth and neutral

terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.

Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).

For accessories see page 1.12

Garage Board

Enclosure comes complete with 40A 30mA RCCB Incomer, 32A MCB and 6A MCB, earth & neutral connections, busbar, grommet strip, marking labels & Instructions.

Knockouts (where applicable) are located top, bottom & rear of base - See page 1.21.

Cable protector plate for rear knockouts is available as an

accessory. **(VM02CE)**

For dimensions see page 1.21.

Garage Board

	Size	Cat ref.
2 Way 40A 30mA RCCB with 1x32A & 1x6A MCB	2	VML24H

VM02CE

Cable Protector Plate

Provides a safe and smooth entry for cables into the rear of the consumer unit.

Designed to fit into the aperture left by the removal of a rear knockout on the Design 10 or Design 30 Consumer Unit. (Included as standard with the Design 30 board)

VM01CE: Simply insert protector plate and bend over tabs inside board.

VM02CE: Break away sections as required and simply push into place.

Description	Quantity	Cat ref.
Cable Protector Plate (Metal)	1	VM01CE
Cable Protector Plate (Insulated)	5	VM02CE

VA10MT

Cable Clamp

Secures supply cables on entry to main incoming device, eliminating any movement of the cables being transmitted to the terminals.

Simply insert supply cables through clamp into incoming device & secure with fixing provided.

(Included as standard with the Design 30 board)

Description	Cat ref.
Cable Clamp for Meter Tails	VA10MT

VMHBL

Health & Safety Lock

Provides the ability to lock the consumer unit during the installation process.

Can only be used with Design 30 Consumer Units.

Description	Cat ref.
Health & Safety Padlock Bracket	VMHBL
Padlock	JK25A

VMLOCK

Key Lock

Allows door to be lockable. Simply remove the centre of the lock surround and the knockout behind, and fit lock.

Can only be used with Design 30 Consumer Units.

Insulated Units

Packed with features, the benefit's all yours.

The Hager consumer unit has been developed to accommodate the Building regulations Part M, for integration into the home environment, with great aesthetic design, and plain and glazed door options available.

Through indepth customer research we have incorporated a number of features and benefits for installers, which have resulted in the creation of a range of easy to use, high quality and reliable consumer units.

The range enables full compliance with Amendment 1 of BS 7671 and comes in three standard enclosure types, insulated & hybrid surface mounted and the hybrid flush fit.

Insulated Consumer Units	1.16
Insulated, Hybrid & Skeleton	1.17
Accessories	1.18
Garage Units & IP55 Weather Proof	1.19

VC206

Switch Disconnecter Incomer - Insulated

Insulated and metal enclosures complete with switch disconnecter incomer, 1 row from 1 to 20 outgoing ways.

Surface mounted enclosures, with a rigid chassis, complete with a 63 Amp or 100 Amp Switch Disconnecter.

Supplied with marking labels, busbar and instructions.

Options:
• Keylock
• Plain or glazed door

Complies with BS EN 61439-3 Annex ZB (16kA rating).

For complete accessories list see page 1.18.

For insulated consumer unit dimensions see page 1.22.

VC404H

RCCB Incomer - Insulated

Insulated and metal enclosures complete with RCCB incomer, 1 row from 1 to 18 outgoing ways.

Surface mounted enclosures, with a rigid chassis, housing a 40A, 63A, 100A 30mA RCCB.

Supplied with marking labels, busbar and instructions.

Options:
• Keylock
• Plain or glazed door

Complies with BS EN 61439-3 Annex ZB (16kA rating).

For complete accessories list see page 1.18.

For insulated consumer unit dimensions see page 1.22.

Description	Enclosure size	Cat ref. Plain door

VC816C

100A Switch plus Twin RCCB - Insulated

Insulated and metal, split load and configurable enclosures, 1 row from 6-16 outgoing ways.

Surface and Flush mounted enclosures, with a rigid chassis, housing a Switch Disconnecter and 2 RCCB's.

Options:
• Keylock
• Plain or glazed door

Complies with BS EN 61439-3 Annex ZB (16kA rating).

For complete accessories list see page 1.18.

For insulated consumer unit dimensions see page 1.22.

Description	Enclosure size	Cat ref. Plain door
6 Way 3+3 100A Switch 2 x 63A 30mA RCCB	4	VC733H1
10 Way 5+5 100A Switch 2 x 63A 30mA RCCB	5	VC755H1

VC816CU

100A Switch plus Twin RCCB with Unprotected Ways - Insulated

Insulated and metal enclosures, 1 row from 10 to 18 outgoing ways.

Surface and Flush mounted enclosures, with a rigid chassis, housing a Switch Disconnect, Twin RCCB and space for RCBOs.

Supplied with marking labels, configurable busbar and instructions.

Options:

- Keylock
- Plain or glazed door

Complies with BS EN 61439-3 Annex ZB (16kA rating).

For complete accessories list see page 1.18.

For insulated consumer unit dimensions see page 1.22.

Hybrid = metal back box with insulated cover.

VH918C

Twin and Multi Tariff - Hybrid (Metal back, plastic cover)

Insulated and metal enclosures 1 row from 12 to 18 outgoing ways.

Surface mounted enclosures, with a rigid chassis, housing a Twin 2 x 100A or 2 x 100A + 63A Switch Disconnect.

Supplied with marking labels, busbar and instructions.

Options:

- Keylock

Complies with BS EN 61439-3 and (Annex ZB 16kA conditional)

For complete accessories list see page 1.18.

Hybrid = metal back box with insulated cover.

For hybrid consumer unit dimensions see page 1.22.

Description	Enclosure size	Cat ref. Plain door
18 Way Twin Tariff Configurable 2 x 100A Switch	6	VH918C

VS710C

Skeleton Units

Skeleton consumer units are designed typically for use in installations in areas with pre-determined space available e.g. Metering cupboards in Local Authority accommodation.

Complies with BS EN 61439-3 and Annex ZB.

For complete accessories list see page 1.18.

Our range of garage units comply with BS EN 61439-3 Annex ZB and are available as IP40 and IP55.

Garage units come pre-configured with 32A MCB and 6A MCB for power and lighting.

The weather proof range of consumer units designed to BS EN 61439-3 including Annex ZB.

Rated at IP55 protected against low pressure water splashing from all directions.

For Garage Unit & IP55 Weather Proof dimensions see page 1.23.

VC008G

DIN Rail - Insulated

Insulated and metal DIN rail enclosures, 1 row from 4 to 22 modules.

Surface mounted enclosures, with a rigid chassis, housing a DIN rail.

Supplied with marking labels and instructions.

Options:

- Keylock
- Plain or glazed door

Complies with BS EN 62208.

For dimensions see page 2.18.

VZ313

Keylock

Description	Cat ref.
Keylock for plain or transparent door	VZ313

Enclosure with door

1 row for 3, 6, 10 and 12 modules
 2 row for 24 modules
 3 row for 36 modules
 Adjustable depth DIN rail (except VE103U).

Supplied with sealing plugs to re-instate IP rating after fixing.
 Front cover sealing.

Door operation

3-10 modules - vertical hinging retained in open position at 90°
 12-36 modules - horizontal hinging.

Hinging reversible (left or right).

Colour: RAL 7035 (light grey).

Wiring ducts 12 - 36 module enclosures/mini wiring channels left and right ensures conductors are neatly dressed.

IP 55: AC 400V.
 insulation class: class II

For dimensions see page 2.19.

VE212U

Vector II Enclosures

1 row boxes 1-5 modules

This range is ideally suited for the installation of individual modular devices. (RCCBs, MCBs, RCBO's, Switch Disconnectors etc).

The range is available without door, with plain door or with glazed door.

Where larger cables need to be accommodated for switch disconnectors etc extra cabling space is provided in the extended height versions.

All boxes from 2-5 modules are fitted with an earth bar as standard and for those with doors the catch can be replaced

with the optional key locking facility.

These enclosures feature:

- Ample wiring space
- Plain or glazed doors
- Optional key lock

For dimensions see page 2.21.

Keylock with 2 keys suitable for all enclosures fitted with door - IU enclosure	IKL1

Meter Box Switch

VC02SW is an enclosed switch disconnecter suitable for meter box applications where an isolating switch between the electricity meter and consumer unit is required.

It benefits from twin cable clamps which have been additionally proven to secure insulated and sheathed meter tails with conductor sizes

ranging from 16-35mm². This unique feature greatly reduces the strain on the switch terminals reducing the likelihood of loose electrical connections.

The anti-tamper screw cap is a unique feature of VC02SW, allowing the supply authority to simply secure the main cover in place following installation. The device can also be locked

in the open/off position with the appropriate Hager accessory.

VC02SW conforms with BS EN 60947-3:2009+A1:2012 which facilitates the installation to comply with BS 7671 IET Wiring Regulations, in particular guidance given in table 53.4.

For dimensions see page 2.21.

VC02SW

Description	Cat ref.
Meter Box Switch	VC02SW

Enclosures with plain door
steel colour RAL 7035
insulation class : I

IP 65 / door closed
according to BS EN 60529
1.5mm thick sheet steel for
body and door

These enclosures feature:

- 2 removable gland plates for cable entry on top and bottom
- Earth studs on both body and door
- Door easily removable
- Plain door equipped with one or two locks with triangular 8mm bit centres, located out of the sealed area

Options:

- Key lock
- Wall fixing brackets
- Mounting plate
- Equipment kits for modular devices

For full dimensions see page 2.22.

Meter Box Switch

VC02SW is an Enclosed Switch Disconnecter suitable for Meter Box Applications where an isolating switch between the electricity meter and consumer unit is required.

The twin cable clamps have been additionally proven to secure insulated and sheathed meter tails with conductor sizes ranging from 16-35mm². This greatly reduces the strain on the switch terminals reducing the likelihood of loose electrical connections.

The anti-tamper screw cap is another unique feature of VC02SW, which allows the supply authority to simply secure the main cover in place following installation. The device can also be locked in the open/off position with the appropriate Hager accessory.

VC02SW conforms with BS EN 60947-3:2009+A1:2012 which facilitates the installation to comply with BS 7671 IET Wiring Regulations, in particular guidance given in table 53.4.

Meter Box Switch Dimensions

	Dimensions (mm)			Fixing Centres (mm)	
	Width	Height	Depth	A	B
VC02SW	50	145	78.5	31	109

Installation

VC02SW (BS EN 60947-3:2009+A1:2012)

Comes complete with three part enclosure comprising of base, supply authority cover and end installer cover.

Factory fitted SBR290, 100A switch.

2 x Cable clamps: subjected to additional pull force tests for use with 16/25/35mm² insulated and sheathed meter tail cables.

6 x M4x10mm PZ2 self tapping plastite screws.

1 x Anti-tamper screw cap (supply authority use). (Hager wire seal available separately: MZN176).

Commercial distribution

The complete service offering

Our range of commercial electrical distribution assemblies cover A & B boards through to Panelboards and Metering solutions.

To support this range, we also offer enclosed fuse combination switches, enclosed switch disconnectors and enclosed MCCBs.

A Boards	3.2
Invicta 3 Type B Boards	3.8
Invicta 3 Panelboards	3.22
Enclosed Switchgear	3.32

A Boards

The complete service offering

Single phase electrical distribution assemblies for commercial applications. Including our range of A boards styled on our Invicta range of TP&N boards ensuring seamless suiting between all the Invicta ranges.

SP&N Distribution Boards	3.4
SP&N Distribution Boards & DIN Rail Enclosures	3.5
Invicta 3 A Boards SP&N Distribution Boards	3.6

SP&N distribution boards

SP&N distribution boards are available from 4-28 outgoing ways. The range comes with a choice of either 100A 2P switch disconnector, 63A 30mA 2P RCCB or 100A 30mA 2P RCCB, or a range of split load versions.

Cable Sizes

100A 50mm²
63A 25mm²

The range has the following features:

- Ample wiring space, with provision to accept RCBO's

- Full complement of earth and neutral terminal bars to accept up to 16mm² cable
- Accepts most consumer unit accessories
- Suitable for cable entry/exit on all sides and back

Construction

Manufactured from 0.9mm CR4 cold reduced mild steel, phosphate pretreated and powder coated to 00A01 BS 4800.

Complies with BS EN 61439-3 Annex ZB.

DIN Rail Enclosures

One, two or three row 8-66 modules enclosures, fitted with DIN rails to accept any combination of Hager modular devices from the simplest switch and MCB arrangements to the more sophisticated control and protection system.

These enclosures feature:

- Ample wiring space
- Full complement of earth and neutral bars fitted as standard
- Significant knockout provision
- Plain doors only
- Optional key lock

Complies with BS EN 62208.

For A Board dimensions see page 3.39.

Invicta 3 SP&N distribution boards

Boards are available with 14 & 29 outgoing ways. The range comes with a 100A 2P switch disconnector to accept 50mm² cable.

Complies with BS EN 61439-3 Annex ZB.

The range has the following features:

- Ample wiring space, with provision to accept RCBO's
- Full complement of earth and neutral terminal bars to accept up to 16mm² cable
- Accepts most consumer unit accessories
- Suitable for cable entry/exit on all sides and back

Enclosures are available with plain or glazed doors.

Invicta 3 Type B Boards

125A and 250A boards with multiple incomer choices

Our Invicta 3 type B distribution board is the solution for modern commercial installations. The Invicta 3 range includes both 125A and 250A boards with multiple incomer choices.

Our IP65 TP&N distribution boards are suitable for three phase applications where a high IP rating is required.

125A Incoming 63A Outgoing	3.10
125A Meter Packs	3.11
125A Dual Metered Boards & Data Logger	3.12

Invicta 3 Type B Distribution Boards 125A Incoming 63A Outgoing

Invicta 3 125A TP&N Distribution Boards

Surface mounted steel enclosures.

Enclosure degree of protection: IP3X

Enclosures are available with plain or glazed doors.

Fully shrouded copper busbar, rated 25kA short circuit conditional current.

Supplied without incoming and outgoing devices.

A Hager incomer kit must be used.

Incoming cable sizes
125A & 100A 50mm²
63A 25mm²

Complies with BS EN 61439-3 Annex ZB.

For dimensions see page 3.41

For a full list of protection devices see section 4 of this catalogue (Protection Devices).

The lighting and power meter board is a compact solution to meet the demands of energy metering within non-dwelling buildings.

The metered boards are supplied with meters that offer a pulsed or modbus output.

The board is provided with the 125A incomer pre-fitted helping to save on installation time.

Cable size
50mm²

For metered board dimensions see page 3.45.

JK107DL

Data Logger

Description

ULog allows collection of data from up to 8 pulsed output meters allowing data to be analysed by a remote PC (.csv file output into spreadsheets / database).

Cat ref.

JK107DL

- Instant access and data logging plus 1 temperature input.
- Up to 8 pulsed inputs (CP1 - CP8).
- Transfer data via Ethernet, RS232/485.
- Logs up to 100 days of data from every 1 to 60 second intervals.
- DIN or direct fixing.
- 2 part terminals for easy connection.
- Works seamlessly on an Intranet with a fixed IP address.

Each fully assembled* meter pack contains:
1 x Incoming 125A switch to accept up to 50mm² cable, lug connection, 2x Meters, CT blocks plus all necessary connections.

* distribution boards supplied separately to be assembled on site.

For dual meter incomer kit dimensions see page 3.44.

Invicta 3 250A TP&N Distribution Boards

Surface mounted steel enclosures.

Enclosure degree of protection: IP3X

Enclosures are available with plain or glazed doors.

Fully shrouded copper busbar, rated 25kA short circuit conditional current.

Supplied without incoming and outgoing devices. A Hager incoming kit must be used.

Complies with BS EN 61439-3 Annex ZB.

For dimensions see page 3.41.

For a full list of protection devices see section 4 of this catalogue (Protection Devices).

Invicta 3 Panelboards

Meeting your needs for distribution

The last few years have seen a major change in the design and installation of commercial electrical distribution systems. The panelboard is at the heart of such a system, whether acting as the main incoming board or as part of the sub distribution. Modern electrical distribution systems have more RCD protection, more metering and more control devices. Panelboards have to offer a flexible solution to help meet these needs.

The Invicta 3 panelboard range includes 250A, 400A, 630A & 800A panelboards with new MCCB incomers. Pre-wired meter packs allow installers to fit metering into the board. All the internal wiring is included. Installation is fast and simple, thanks to a number of features. There is generous space where it is needed for cable bending radii at the top, bottom and sides of the board and twin and earth neutral bars allow easy identification of earth and neutral conductors with the corresponding line conductors.

Invicta 3 Panelboard System (250A Rated)

250A Incoming 125A Outgoing

Options

Key lock, meter pack, DIN rail, extension box, spreader box.

Construction

Enclosures manufactured from 1.2mm DC01M cold reduced mild steel, phosphate pretreated and powder coated to 00A01 BS4800.

Specification

Complies with BS EN 61439-2. Enclosure degree of protection: IP3X

Internal separation Form 3A.

4, 6, 8, 12, 16 Triple Pole outgoing ways.

Cable Capacity Incomers

3 and 4 pole incomers. Cable capacity 150mm² max lug width 25mm. Direct connection kit. M8 bolt. (Larger cables can be connected by using extended connections, see page 4.38 MCCB section).

Outgoers

1 & 3 pole MCCB 70mm² flexible. 1 & 3 pole MCCB 95mm² solid.

Busbar Ratings

Busbar rated current 250A continuous. Busbar rated short-time withstand current 25kA for 1s direct connected (unconditional).

Each JN board is available with side cable entries to enable the fitting of the JN meter enclosures. Just add a 'CE' suffix.

suffix. e.g. JN204BCE

Outgoing MCCBs

Adjustable thermal options on TP

Form 3B type 2 is achieved using the outgoing terminal shield (see MCCB accessories 4.34).

For accessories see page 3.25.

For dimensions see page 3.45.

For a full list of protection devices see section 4 of this catalogue (Protection Devices).

Multi Padlock Plate (for integral toggle lock) fits to toggle for up to 3 padlocks max ø8mm	HXA039H
Neutral Barrier Kit	JN201NS

Invicta 3 Panelboard System (400A Rated) 400A Incoming 125A Outgoing

Options

Key lock, meter pack, DIN rail, extension box, spreader box.

Construction

Enclosures manufactured from 1.2/1.5mm DC01M cold reduced mild steel, phosphate pretreated and powder coated to 00A01 BS4800.

Specification

Complies with BS EN 61439-2.
Enclosure degree of protection: IP3X

Internal separation

Form 3A
6, 8, 12, 16, 18 Triple Pole outgoing ways.

Form 3B type 2 is achieved using the outgoing terminal shield (see MCCB accessories on page 4.42).

Cable Capacity Incomers

3 and 4 pole incomers.
Cable capacity 240mm²
M12 bolt.
Direct connection kit.
M10 hexagonal bolt.

Cable Capacity Outgoers

1 & 3 pole MCCB 70mm² flexible.
1 & 3 pole MCCB 95mm² solid.

Busbar Ratings

Busbar rated current:
400A continuous
Busbar rated short-time
withstand current 35kA for 1s
direct connected (unconditional)

Outgoing MCCBs

Adjustable thermal options on TP

Form 3B type 2 is achieved using the outgoing terminal shield (see MCCB accessories in section 4).

For accessories see page 3.27.
For dimensions see page 3.48.

JF406B

Invicta 3 Panelboards (400A Incoming 125A Outgoing)

Comprises of enclosure, pan assembly, neutral bar and earth bar.
Supplied without incoming kit (one of the incomer kits listed below must be used).

Invicta 3 Panelboard system (800A MCCB) 800A Incoming 125 / 250A Outgoing

The Hager range of 800A panel boards has been designed to complement our Invicta 3 distribution system.

The 800A MCCB incomer board is designed specifically for applications where an adjustable 800A MCCB incomer device is required.

Construction

The enclosure is manufactured from 1.2/1.5mm DC01M cold reduced mild steel, phosphate treated and powder coated to 00A01 BS4800.

Busbar Rated current: 800A
35kA for 1 sec.

Removable gland plates are provided top and bottom for ease of installation"

Specification

Complies with BS EN 61439-2
Enclosures degree of protection: IP3X
Internal Separation: Form 3A
Form 3B type 2 is achieved using the outgoing terminal shield (see MCCB accessories on page 4.42).

Cable Capacity

Outgoing devices
125A frame (16 - 125A)

For a full list of protection devices see section 4 of this catalogue (Protection Devices).

When selecting outgoing metering, the panelboard metering system is easily configured by selecting a side, top or combination that matches the panelboard.

(e.g. for the JF406 board, you can select a JF12504SM side mounted meter enclosure that can house 4 JFM01 panel mounted meters). When using both side and top/bottom meter enclosures, corner filler enclosures are available.

For enclosure dimensions see page 3.50.

Please contact us for any non-standard requirements or assembly.

For our full range of pluggable meters see page 5.25.

Enclosed Switchgear

The Hager range of switch disconnectors has been designed to complement the FCS, TPN and panelboard ranges by providing individual protection and control of individual circuits up to 800A.

The enclosures have been designed to provide adequate cabling space without the need for additional cable spreader boxes.

Fuse Combination Switches 20 - 800A	3.34
Switch Disconnectors 20-800A	3.36
IP65 Switch Disconnectors AC	3.37
Enclosed MCCBs & Switch Fuses	3.38

Description

The Hager range of fuse combination switches provides individual protection and control of circuits.

The enclosures up to 100A have been designed to provide adequate cabling space without the need for additional cable spreader boxes.

Operation of the device is through a door mounted rotary handle which is mechanically interlocked to prevent access to live conductors when the switch is in the on position. The handle is padlockable in the off position.

All versions will accept standard BS 88 fuse links and can be converted to switch disconnecter by fitting copper links.

Utilisation category

AC22B - 630 - 800A
AC23A - 20 - 630A

Product features

Complies with:
BS EN 60947-3
IP31.

Note: Maximum rated fuse links are fitted in all fuse combination switches.

IP65 Switch Disconnectors DC

Description

These DC switches are used in applications such as photovoltaic installations where they isolate the incoming side of the inverter.

They are supplied in grey with a black handle so that it is easy to distinguish them from the yellow/red AC switches used on the outgoing side of the inverter.

Product Features

Complies with: BS EN 60947-3 IP65 to BS EN 60529

An interlock ensures that the cover cannot be removed in both the ON and PADLOCKED OFF positions.

The Hager range of enclosed MCCBs has been designed for individual circuit protection.

The devices are mounted in IP31 enclosures, with cable knock outs top and bottom.

Both single and triple pole devices are equipped with fully rated neutral links.

4 Pole versions are available and 4 pole plus RCCB add-on are available.

Construction MCCB

Single pole 63 - 125A (3 ratings)
Triple pole 63 - 125A (3 ratings)
Four pole 63 - 125A (3 ratings)

MCCB-RCCB

Four pole + RCCB 63A & 100A (2 ratings)

Non-Auto MCCB

Triple pole 125A
Four pole 125A

Specification

Complies with BS EN 61439-2

Cable Capacity

63 - 125A
Flexible: min 6mm², max 70mm²
Rigid: min 6mm², max 95mm²

RCCB add-on adjustable from 0.03A, 0.1A, 0.3A, 1A, 3A, 6A

Time delay - Instantaneous, 60ms, 150ms, 300ms, 500ms, 1s

For Enclosed MCCB technical details and dimensions see page 3.56.

For Switch Fuse dimensions see page 3.53.

Fuse - Combination Units - BS EN 60947-3

Many people are attracted to fuse-combination units by their simplicity in application and their reliability in operation. They are particularly useful for use on very high prospective fault level systems where the high energy limiting characteristic of the HRC fuse can be effectively utilised. In the past fuse-combination units came in two forms:

Switch Fuse  A switch in which one or more poles have a fuse in series.

Fuse Switch  A switch in which one or more poles have a fuse carrier/link which forms the moving contact.

The definitions of these two basic types of fuse combination units have now been extended to include units suitable for making, breaking and isolation and units which are only suitable for providing isolation for maintenance work.

Definition	Symbol	Function
Switch Fuse		Making and breaking current
Disconnecter Fuse		Isolating
Switch Disconnecter Fuse		Making, breaking and isolating
Fuse Switch		Making and breaking current
Fuse Disconnecter		Isolating
Fuse Switch Disconnecter		Making, breaking and isolating

However, in order to keep the selection of fuse-combination units as simple as possible, Hager offer a range of high performance double break switch-fuses, which also satisfy the isolating requirement of the British standard. These are correctly shown as and defined as a Fuse Combination Switch.

Switch disconnectors - BS EN 60947-3. A range of switch disconnectors (isolators) are available for use on lower current ratings from 20A to 125A, these switches are rated at AC-22 and provide a cost effective alternative to the fuse combination switch especially where the utilisation category AC-23 is not required. ie; mixed resistive and inductive loads. These may be used at AC-23 providing they are derated in accordance with Table 9 page 3.53.

Utilisation categories

Utilisation categories are not new but they are important because they help the designer or specifier identify the correct unit for a particular application.

The designation of the utilisation category is made up of three parts:

1. The prefix AC or DC, which indicates the nature of the current.
2. The two digit number, which indicates the type of application the unit is suitable for:
 - 20 Connecting and disconnecting under no-load.
 - 21 Switching of resistive loads.
 - 22 Switching of mixed resistive and inductive loads.
 - 23 Switching of highly inductive loads.
3. The suffix A or B, which indicates whether the unit is suitable for frequent or infrequent operation.
 - A Frequent operation
 - B infrequent operation.

For example a fuse-combination unit feeding a 400V AC circuit of mixed resistive and inductive loads which would need to be operated frequently would require a minimum utilisation category of AC-22A.

If the load was highly inductive, i.e. motor loads, then the minimum utilisation category would be AC-23A.

Generally, category AC-23 does not cover the switching of capacitors. Usually this is the subject of agreement between manufacturer and user.

Motor Power Circuit Protection

Fuse-combination units can be used very effectively for motor power circuit protection, the energy limiting HRC fuse offering very good protection to its associated starter. Category AC-23A should be specified for this duty. Special motor circuit protection fuse links are available which eliminate the need to fit a larger bodied fuse just to take care of the starting current of the motor.

The protection of motor power circuits should not be confused with the direct switching of a single motor. If a fuse-combination unit is required to perform this function then it must comply with the requirements of Appendix A of BS EN 60947-3 which makes provision for different utilisation categories for this application.

Protection devices

The complete solution

We offer a wide range of protection devices, such as miniature circuit breakers, auxiliaries and accessories, RCCB add-on blocks, single pole and switched neutral devices, 2 and 4 pole RCCB's, RCCB auxiliaries, RCBO's, HRC fuse carriers, motor starters, earth fault relays, surge protection devices and the new **h3** range of moulded case circuit breakers.

Miniature Circuit Breakers	4.2
NBN, NCN, NDN 10kA MCBs	4.5
RCCB Add-on Blocks for MCB Devices	4.6
One Module Add-on Block	4.7
MCBs - 80 - 125A C & D Curve	4.8
RCCB Add-on Blocks Type AC for MCB Devices	4.13
Single Pole & Switched Neutral (SPSN) Devices	4.14
2 & 4 Pole RCCBs	4.15
RCCB Auxiliaries	4.17
RCBO	4.18
RCBO - Single Pole & Switched Neutral	4.20
HRC Fuse Carriers - BS 1361	4.21
HRC Fuse Carriers - BS 88	4.22
Motor Starters	4.23
Earth Fault Relays	4.25
Surge Protection Devices and Kit	4.29
MCCBs	4.31

Description

Protection and control of circuits against overloads and short circuits.

- For domestic installations

Technical data

Type B tripping characteristics complies with BS EN 60898.
 Breaking capacity: 6kA
 Voltage rating: 230 - 400V
 Current rating: 6 - 63A
 Trip free mechanism

Connection capacity

Rigid conductor 25mm²
 Flexible conductor 16mm²

MTN163

Single Pole MCBs 6kA Type B

Description

- These MCBs allow you to ensure
- Protection against short circuits
 - Protection against overload current
 - Control
 - Isolation
 - Trip free mechanism

Isolation

The state of isolation is clearly indicated by the "OFF" mechanical position on the toggle with the green colour.

Will accept accessories, see page 4.5.

Connection capacity

- 25mm² flexible conductor
- 35mm² rigid conductor

Complies with:

- BS EN 60898 (10kA)
- BS EN 60947-2 (15kA)

Description

- These MCBs allow you to ensure
- Protection of circuits against short circuits
 - Protection of circuits against overload current
 - Control
 - Isolation

Isolation

The state of isolation is clearly indicated by the "OFF" mechanical position on the toggle with the green colour.

Will accept accessories, see page 4.5.

Connection capacity

- 25mm² flexible conductor
- 35mm² rigid conductor

Complies with:

- BS EN 60898 (10kA)
- BS EN 60947-2 (15kA)

48Vdc	1 Mod	MZ205

Description

These products provide earth fault protection when associated with the 10kA (types NBN, NCN, NDN) range of MCBs.

They are designed to be fitted to the right hand side of 2 and 4 pole MCBs and the completed unit provides protection against:

- Overload
- Short circuit
- Earth faults

Technical Data

3 Non-Adjustable sensitivities
30, 100 & 300mA
nominal voltage 230 - 400V
protection against nuisance tripping.

2 pole = 2 Modules
4 pole = 3 Modules

BS EN 61009 Appendix G

Selective (time delay) versions are available in 100mA & 300mA.

Connection Capacity

- 16mm² Flexible
- 25mm² Rigid

All devices have a test facility.

Time Delayed 100mA	63A	3 Mod	BN464
Time Delayed 300mA	63A	3 Mod	BP464

Description

This combination provides the protective characteristics of both devices, thereby protecting the entire circuit. This results in a significant reduction of time, & cost required.

The one module Add-on Block (AOB) can be used in combination with any Hager 3P 10kA MCB up to 63A.

Requires the use of the adjacent outgoing way.

The 'Type A' Add-On Block gives the added protection against any 'pulsating DC component' generating from such loads as; PCs, motor speed controllers, power tools etc.

One module Add-On Block + MCB combinations suit all Hager distribution boards.

BS EN 61009-1 Appendix G.

For technical details see page 4.67.

For MCB's see page 4.2 - 4.3

Thermal Magnetic Circuit Breakers Curves C & D I_n 80 to 125 A

These circuit breakers are intended for the protection of the circuits against overloads and short circuits.

HMC C Curve

15 kA
(BS EN 60898 Part 1)
15 kA for 80 - 100 - 125 A:
BS EN 60947-2
Width 1.5 mod/pole

HMD D Curve

15 kA
(BS EN 60898 Part 1)
15 kA for 80 - 100 - 125 A:
BS EN 60947-2
Width 1.5 mod/pole

HMF C Curve

10 kA
(BS EN 60898 Part 1)
10kA for 80 - 100 - 125A:
BS EN 60947-2
width 1.5 mod/pole

These circuit breakers are equipped with reinforced screw cages.

A label holder is integrated under the toggle to ensure the location of the product.

The "OFF" position is clearly shown by a green indicator below the toggle.

Suitable for isolation (according to BS EN 60947-2) the isolation of the circuit breakers is indicated by a green indicator on the toggle.

These circuit breakers have quick closing : fast and simultaneous closing of the contacts, independent of the handling speed.

This increases the life of the circuit breaker whatever the type of load.

Nominal Voltage

230/415 V~
Calibration setting : 30 °C
(BS EN 60898 Part 1)
Insulation voltage : 500 V

Options

Auxiliary

- To visualise the state ON or OFF of the circuit breaker,
- To ON/OFF remotely the circuit breaker

- Locking mechanism
- Terminal covers and phase separators
- RCD add-on blocks

Series HMC, HMD, HMF

- Mounting capability: bistable DIN-rail latches (2 positions) upstream and downstream facilitate the mounting of the circuit breakers on the DIN-rail.
- These circuit breakers are equipped with push terminals to feed an auxiliary low voltage circuit (indicating lights, auxiliary control...) Max. current 6A
Max. cable csa - 6 mm²

Lockable Toggle

MCB can be locked in "Off" position by the integrated locking facility on the toggle. This lock allows to insert a 2.5-3.5mm plastic cable tie where you can fit a warning card if necessary and allows a safer working environment for all personnel.

RCD Add-On Blocks

Simple, quick, adjustable and fixed

1. Assembly
2. Connection
3. Locking

The assembly of the add-on block is carried out very quickly and easily. Simple and fast : it is a Hager innovation. Add-on blocks 125A are available in fixed version and adjustable version.

MZN130

Terminal Covers Screw Cap

Description

To cover connection terminals and screws of circuit breaker.
The screw covers can be sealed.

Cat ref.

MZN130

MZN131

Phase Separator

Description

1 Set of 3 Phase Separators

Cat ref.

MZN131

Fixed

- High sensitivity 30 mA Instantaneous
- Low sensitivity 300 mA Instantaneous

Adjustable

- Sensitivity $I_{\Delta n}$ 0.3-0.5 - 1A
- Delay Δt 0 - 60 - 150 ms

This “circuit breaker + block” ensures, in addition to the overload and short circuit protection, the protection of the installations against the insulation defects (300mA and 1A) and the protection of the people against direct contact (30mA) and indirect contact (300mA).

Adjustable Blocks

The setting is done by actuating the thumb wheel on the front face. The setting thumb wheels are protected by a transparent sealable cover.

Disassembly

The bistable latch (2 positions) facilitate the assembly or disassembly by the bottom of the “circuit breaker + block.”

These RCD add-on blocks exist in version AC.

The earth fault is indicated when the handle is in lower position (yellow colour). Test button for earth fault check.

Connection Capacity

- 35mm² flexible connection (50° possible with some terminals),
- 70mm² rigid connection.

Assembly and disassembly facilitated by the drawer assembly system. The terminal cover is dependent of the add-on block. It is provided with keying systems avoiding the omission of terminal tightening downstream of the circuit breaker.

Nominal voltage: -15 +10 %
2 Poles: 230V
three and four pole: 230 / 400V
test button: 230 / 400V.

In conformity with the requirements of the Appendix G of the BS EN 61009-1.
In conformity with the requirements of standard BS EN 60947-2.

JK01B

Single Module Blank

Description

Shrouds busbar and blanks spare ways

Cat ref.

JK01B

To open a circuit automatically in the event an earth fault between line and earth, and/or neutral and earth. A wide range of current ratings and sensitivities are available.

Suitable for domestic, commercial and industrial applications.

Technical Data

Complies with BS EN 61008, IEC1008

Sensitivities (Fixed)

10, 30, 100, 300mA & 100 and 300mA time delayed.

Terminal capacities

16-63A Rigid 25mm²
Flexible 16mm²
80&100A Rigid 50mm²
Flexible 35mm²

Features

Positive contact indication is provided by the rectangular flag indicator
Red = Closed
Green = Open
Indication of trip is provided by the oval flag indicator
Yellow = Tripped

All RCCBs have trip free mechanisms and can be padlocked either on or off with the use of a MZN175.

Operating Voltage

2P 127-230Vac
4P 230-400Vac

Width

2P - 35mm
4P - 70mm

Compact protection devices which combine the overcurrent functions of an MCB with the earth fault functions of an RCCB in a single unit.

Technical Data

Insulated DIN clip
Complies with IEC 61009-1, IEC 61009-2-2, EN 61009-1
Sensitivity (fixed): 30mA
Breaking capacity: 6kA
Flying neutral lead: 200mm

Terminal Capacities

25mm² rigid
16mm² flexible

Application

1 module devices provide a compact solution for installation in consumer units.

These devices are 1pole & solid neutral.

Operating Voltage

230V (AC) +10%/-15% 50Hz

Locking kit = MZN175

ADN120

Sensitivity 30mA (6kA) Type B, AC Sensitive

Current rating	Width (17.5mm)	Cat ref.
6A	1 Mod	ADN106
10A	1 Mod	ADN110

32A	1 Mod	AEC132

Compact protection devices which provide MCB overcurrent protection and RCCB earth fault protection in a single unit. Complies with EN 61009-1.

RCBO SPSN Type B & C 6kA

Technical Data

The units are available with current ratings of 6A, 10A, 16A, 20A, 25A, 32A and 40A. The device switches both the line and neutral conductors. All ratings have 30mA earth fault protection. The units feature indicators which show whether tripping is due to an overcurrent or earth fault.

Breaking capacity
6kA

Operating Voltage
230V (AC) +10%/-15% 50Hz.

Mechanical life
20,000 operations

Connection Capacity
Rigid conductor 25mm²
Flexible conductor 16mm²

RCBO SPSN Type C 4.5kA

Technical Data

The device switches both the line and neutral conductors. All ratings have 30mA earth fault protection. The units feature indicators which show whether tripping is due to an overcurrent or earth fault.

Breaking capacity: 4.5kA

Operating Voltage
230V (AC) +10%/-15% 50Hz

Mechanical life
20,000 operations

Connection Capacity
Rigid conductor 25mm²
Flexible conductor 16mm²

ADA990U

RCBO Single Pole and Switched Neutral Type B & C 6kA

RCBO tripping current (30mA) with flying 700mm lead for neutral connection.

Note: For use in consumer units and distribution boards only.

Current rating	Width (35mm)	Type B Cat ref.	Type C Cat ref.

Fuse carrier 32A max.
Protection and control of circuits
against overloads and short
circuits in three phase circuits.

Suitable for fuses which comply
with BS HD 60269-1 and with
the standardised performance
requirements for industrial fuse

links specified in BS HD 60269-2
(formerly BS 88-2).

Rating voltage:

415 V a.c.

250 V d.c.

• Rated breaking capacities:

80 kA at 415 V a.c.

40 kA at 250 V d.c.

The LS201 HRC fuse carrier is
suitable for the following type
of BS HD 60269-2 (formerly BS
88-2) cartridge fuses:
2A – 8A: with nickel-plated or
silver plated caps.
10A – 32A: with silver plated
caps only.

LS201

These units ensure the protection of electrical installations. 30mA versions can provide additional protection against direct connection. This range of electronic earth fault relays provides monitoring of earth fault currents. When the fault current rises above the selected level, the output contacts of the product operate.

Depending on the relay selected, it can have either fixed or adjustable sensitivity, a time delay is also available for selectivity purposes. The relays are linked with detection torroids, 14 separate types are available, circular and rectangular in section (4.27).

Common characteristics

- Positive safety: the relay trips in the event of a break in the relay/torroid link.
- Positive reset required after a fault is detected.
- Test button for simulation of a fault.
- Protected against nuisance tripping from transients.
- DC sensitive.
- Output: 1 C/O contact 250V~ 5/6A AC1.

- Visual display of fault by red LED.

Specific device features

- LCD display on HR525 & HR534.
- Adjustment of sensitivity and delay (selectable).
- Extra positive safety contact (1C/O 250V~ 6A AC1).
- Display of fault current before it triggers the relay (5% to 75%).
- Extra output contact (250V 0.1A max.) to enable remote indication if fault currents over 50% of $I_{\Delta n}$.
- Remote test and reset (opto-coupled).

Torroids

Circular dia. 35, 70, 105, 140, 210mm
Rectangular 70 x 175, 115 x 305, 150 x 350mm

Risks of Electrical Surges

Surge protective devices (SPD) assist in the protection of valuable electrical and electronic equipment against transients, originating from lightning and also from switching sources.

These transients can cause damage ranging from the premature ageing of equipment, logic failures and down time, to the complete destruction of equipment within the entire electrical installation. Products such as LCD screens, data servers and industrial equipment such PLC's are critical to business activity. Protecting this equipment may now be a necessity.

The Hager SPD range of solutions may offer protection to prevent damage to this sensitive equipment by diverting the damaging transient over-voltages. In the majority of cases this will eliminate equipment failures and reduce downtime.

The choice of a surge protective device depends upon:

- The exposure of the building to lightning transients
- The sensitivity and value of the equipment that requires protection (it is recommended that the contractor should discuss the installations requirements with the customer)
- The location and therefore the exposure level of the installation
- The equipment used within the installation and whether this equipment could generate switching transients

BS 7671 and the AQ criteria method

Lightning discharges could contain currents of 200,000A which if struck at or near power transmission lines would generate a significant voltage transient. This voltage transient could cause significant damage to both domestic and commercial electronic equipment.

The UK regional map illustrates the likely lightning activity caused by the number of thunderstorm days across the country.

Protection against over-voltages is the subject of section 443 of BS 7671. Here the AQ criteria method is introduced which is based on the likelihood of the equipment being subjected to over-voltages caused by lightning strikes, taking account

of the probable number of lightning strikes per year.

For electrical installations in the UK, the map shows that the probable number of thunderstorm days per year in any given location is less than 25, and therefore condition AQ1 applies.

Where this is the case and for installations being supplied by overhead lines, Regulation 443.2.2 indicates that provided the impulse withstand voltage of the equipment is not less than the values given in Table 44.3 (see Table 1 for installations rated at 230 V to Earth), no additional protection by a SPD is required. However, where higher levels of equipment reliability or higher risks (e.g. fire) are expected, additional protection by an SPD against over-voltage may be required.

Similarly, for an installation having overhead lines, no additional protection against over-voltages is required if the equipment meets the minimum voltage withstand values in table 44.3.

There are some words of caution in the notes to this section where it is recognised that transient over-voltages transmitted by the supply distribution system are not significantly attenuated. So an induced voltage some distance away could easily manifest itself at the electrical installation and cause potential harm to the equipment within. It is also worth considering that the AQ data is for thunderstorm days NOT lightning strikes. One storm will usually contain many lightning flashes which could lead to an over-voltage on the installation causing damage to equipment.

Cascading

Cascading is the term used to describe the method of combining several levels of surge protection devices into the one installation.

This takes advantage of the best features of each device to improve the protection level for the equipment. Hager recommends using a high surge current capacity device to divert the bulk of the transient over-voltage at the origin of the installation.

In the case of a Class 1 & 2 device this would be either the spark gap arrester or a high current capacity MOV. Should finer protection be required, the next step is to install a Class 3 device SP202N near the terminal equipment.

Cascading increases the current diverting capacity of the SPD system whilst maintaining a low voltage (Up) to ensure the best protection for valuable equipment.

Selecting SPD of the same manufacturer or make will ensure correct co-ordination between devices.

SPD Quick Selection Guide

The following is a quick selection guide which may assist in choosing whether SPD's are required and the correct type of device

- Does the installation contain a lightning protection system?
- Is the installation adjacent to any tall structure, tall trees or near a hill top in a lightning prone area?

- Does the installation contain equipment where higher reliability from overvoltages is required

If the answer is YES in the above to the first two questions, it is recommended to install a Type 1+2 device. This will provide protection against surges caused by direct lightning strikes and provide protection against transient over-voltages caused by indirect lightning strikes or by switching events.

If the answer is YES to the third question then it is recommended to install Type 2 devices to provide protection against transient over-voltages caused by indirect lightning strikes or by switching events.

Note: For larger installations beyond the scope of this guide, a risk assessment method used to evaluate the need for SPDs is given in Section 443 of BS 7671:2008(2011)

SPD's protect electrical and electronic equipment against transients, originating from lightning, switching of transformers, lighting and motors

These transients can cause premature ageing of equipment, downtime, or complete destruction of electronic components and materials.

SPDs are strongly recommended on installations that are exposed to transients, to protect sensitive and expensive electrical equipment such as TV, video, washing machines, Hi-Fi, PC, alarm etc.

The choice of SPD depends on a number of criteria such as:

- The risk of lightning strikes
- The exposure of the building to transients.
- The sensitivity and value of the electrical equipment that requires protection.
- Earthing system
- Level of protection

The range of SPDs is separated into 3 types of protection:

1. Main protection - class 1
SPDs with higher discharge current (I_{max} 10/350), to evacuate as much of the transient overvoltages associated with lightning strikes
2. Main protection - class 2
With a discharge current (I_{max} 8/20), to evacuate as much of the transient overvoltage to earth as possible protection level ($U_p \leq 1000V$).

3. Main protection - class 3
To cut-down the transient surge as low as possible to protect very sensitive equipment.

Technical Data

Complies with IEC61643-1

Reserve Status Indicator (R versions)

End of Life Indicator (D versions)

Auxiliary contact for remote signalling (R versions only)

230V~ 1A
12V ... 10mA

Installation and Connection

The main protection SPDs are installed directly after the main incoming switch or RCCB (type S).

SPDs can be used in any supply system e.g. TNCS, TNS, TT.

Options: Replacement cartridges.

Connected in parallel to the equipment to be protected.

Protection is assured in both common and differential modes.

SPDs with Low Let Through Voltage Levels Type 3
To protect very sensitive electronic equipment. This fine protection complements the main protection and can protect 1 or many electronic devices.

Optimal coordination is obtained when cascaded with a main protection device.

Discharge current

I_{max} 8kA (8/20 wave)
a green LED on the front face indicates the status of the SPD SP202N, connected in series with the equipment that needs to be protected (with a maximum line current of 25A). Protection is assured in both common and differential modes

Connection Capacity

- Terminal blocks L, N & E
- Rigid conductor: 10mm²
- Flexible conductor: 6mm²

Replacement Cartridges

The cartridges replace the cartridge in the main SPN* devices.

They allow simple replacement without the need to cut-off the

power supply.

Cartridges are available for all discharge currents (40kA and 15kA) with and without condition indication.

A keying system exists to prevent a line cartridge being interchanged by mistake with a neutral one and visa versa neutral cartridges have a discharge current of 65kA

For technical details see page 4.55 - 4.59.

Moulded case circuit breakers x160

Thermal magnetic trip unit, 2 versions:

- Z version: fixed thermal and fixed magnetic
- U version: adjustable thermal and fixed magnetic

1P and 3P.

Access to mechanical test button on cover. Lockable cover protects MCCB settings. Integrated padlocking handle Ø 4mm,

*160A devices should not be used

Connection capacity

95 mm² rigid cables
70 mm² flexible cables
Cage terminals
Complies with BS EN 60947-2.

Moulded case switches comply with BS EN 60947-3.

For technical details see table on page 4.60.

Add-on blocks for x160 devices

These devices are intended to be fixed on the right side of the devices.

Type A and HI

For pulsating residual current. High Immunity reduces the unexpected tripping when protecting equipment generating disturbances (micro-processing, electronic ballast...) Fixed version: 300 mA sensitivity and instantaneous tripping

Adjustable version: adjustable sensitivity and time delay.

Test button for electrical functioning check. Mechanical test button

LED fault indication and auxiliary output for remote indication. (25-50% $I_{\Delta n}$).

Assembly and disassembly facilitated by the drawer assembly system. The terminal cover is part of the add-on block.

Connection capacity

95 mm² rigid cables
70 mm² flexible cables

Complies with BS EN 60947-2.

HBA161H

Add-on Blocks

Fixed:

$I_{\Delta n}$ 300 mA
fixed sensitivity
instantaneous tripping

Adjustable:

sensitivity I adjustable:

Add-on Blocks - Adjustable

Add-on block - 125A

HBA125H

Add-on Block - 160A

HBA160H

Indication contacts

- 1 changeover switch (ON/OFF): indicates the position of the MCCB "open" or "close".
- 1 changeover alarm contact: indicates MCCB tripped.

Coil connection

Connection capacity:
0.75 mm² flexible or rigid cables
The cable capacity of the terminals is 0.5 to 1.25 mm².

Shunt trip

Remote tripping of MCCBs
Operating voltage: 0.7 to 1.1 x U_N

Under voltage release

Enables tripping of MCCBs or moulded case switches when voltage level drop between 35 and 70% of U_N . Pick up voltage 0.85 x U_N

Direct rotary handle

- padlockable
- equipped with front cover and handle
- fixing without any additional screw.

Moulded case circuit breakers x250,

2 versions of trip unit:

- Z version: fixed, thermal and magnetic
- U version: adjustable thermal and magnetic

3P and 4P

Mechanical test button,
lockable settings,
integrated padlocking handle
Ø 4mm.
Comply with BS EN 60947-2.

Connection:

Palm lug max. width: 25 mm
Connection capacity: 150 mm²
rigid cables

Moulded case Switches comply with BSEN60947-2.

Complies with BS EN 60947-3
AC 22/23A

Add-on blocks for x250 devices

These devices are intended to be fixed at the bottom of the devices.

Type A and HI
for fault component DC pulsating current and the products with "reinforced immunity".

Adjustable sensitivity and tripping.

Test button for RCD function check.

Mechanical test button

LED or auxiliary output to signal for tripping or advance warning (25 - 50% $I_{\Delta n}$).

Complies with BS EN 60947-2 Annex B when fitted to an MCCB.

*Din rail mount only, not for use in fixed busbar distribution boards.

Power Loss

The power loss of MCB's is closely controlled by the standards and is calculated on the basis of the voltage drop across the main terminals measured at rated current. The power loss of hager circuit breakers is very much lower than that required by the British Standard, so in consequences run cooler and are less affected when mounted together.

The table below gives the watts loss per pole at rated current.

MCB Rated current (A)	0.5	1	2	3	4	6	10	13	16	20	25	32	40	50	63
Watts loss per pole	1.2	1.3	1.5	2.0	1.8	1.4	1.9	2.1	2.5	2.8	3.2	3.8	4.0	4.5	5.1

For use with DC

Because of their quick make and break design and excellent arc quenching capabilities, Hager circuit breakers are suitable for DC applications.

The following parameters must be considered:

1. System voltage:
Determined by the number of poles connected in series (see table 14)
2. Short circuit current:
(See table 14)
3. Tripping Characteristics:
The thermal trip remains unchanged
the magnetic trip will become less sensitive requiring derating by $\sqrt{2}$
the ac value (See table 14)

No. of poles	1 pole		2 poles in series	
Range	max voltage	breaking capacity L/R=15ms	Max voltage	breaking capacity L/R=15ms
MTN	60V	6kA	125V	6kA
NCB NCN NDN	60V	10kA	125V	10kA

Table 14

Connection

The circuit breaker can have the line/load connected to either the top or bottom terminals

Temperature Derating

MCBs are designed and calibrated to carry their rated current and to operate within their designated thermal time/current zone at 30°C. Testing is carried out with the breaker mounted singly in a vertical plane in a controlled environment. Therefore if the circuit breaker is required to operate in conditions which differ from the reference conditions, certain factors have to be applied to the standard data.

In (A)	-25°C	-20°C	-15°C	-10°C	-5°C	0°C	5°C	10°C	15°C	20°C	25°C	30°C	35°C	40°C	45°C	50°C	55°C	60°C

Diversity Factor

Consideration should be given to the proximity heating effect of the breakers when fully loaded and mounted together in groups.

Adjacent circuit breakers having a load 'on' time exceeding 30 minutes or where the load not exceeding 30 minutes has an 'off' time less than the 'on' time, will need to have the rated diversity factor applied.

No. of Outgoing Circuits	Assumed Loading Factor
2 and 3	0.8
4 and 5	0.7
6 to 9 inclusive	0.6
10 and above	0.5

Frequency

Circuit breakers are designed to operate at a frequency of 50-60Hz. Should the supply differ from this then the following factors should be applied

Thermal – unchanged

Magnetic – value multiplied by coefficient K

F (Hz)	17Hz - 60Hz	100Hz	200Hz	400Hz
K	1	1.1	1.2	1.5

Consideration should be given to the proximity heating effect of the breakers when fully loaded and mounted together in groups. (continuously & simultaneously loaded).

Functions

Tripping and indication auxiliary contacts are common to the range of multi-pole 10kA MCBs, and RCCBs. They should be mounted on the left hand side of the device.

Auxiliary Contact MZ201 (Fig 9)

Allows remote indication of the status of the device contacts to which it is associated.

Auxiliary Contact and Alarm Contact MZ202

This accessory has two separate functions. Like the MZ201 auxiliary contact, however the alarm contact will provide indication if the breaker trips under fault conditions.

Wiring Diagram

MZ201 Auxiliary Contact and Alarm Contract

Fig. 9

Electrical Characteristics

	MZ201/MZ206	MZ203	MZ206
	1 x O 1 x C Contact 230V ~ 6A AC-1		
		230 - 415~ 110 - 130...	230V~ 50Hz

Grouping / Combination of Several Auxiliaries

On 2, 3 and 4 pole MCBs it is possible to associate 3 auxiliaries – 2 indication auxiliaries and 1 release auxiliary. In this case, it is important to first fix the indication auxiliary (MZ201 and MZ202) and then the release auxiliary (MZ203 and MZ206).

Fig. 11

MZ203 Shunt Trip*

Allows tripping of the device by feeding the coil. The contacts also allow for remote indication of operation.

MZ206 Under Voltage Release* (Fig 10)

Allows the MCB to trip when the voltage drops or by pressing a remote off switch (i.e. emergency stop).

* Indication that the product has tripped due to the voltage release is provided by a flag on the product.

MZ206 Under Voltage Release

Fig. 10

Electrical connection

By terminal fitted with fixed clamp screws wiring capacity.

Flexible : 2 x 1.5mm²

Rigid : 2 x 1.5mm²

MZ203

Power - 8VA

tolerance : -15% of U_n

MZ206

Latching voltage is between 35 and 70% of U_n 230V~

Coil consumption 3VA

Transformer Protection

Tables 19 & 20 show the recommended MCB's for the protection of single phase (230V) and three phase (400V) transformers.

Single Phase 230V

Transformer Rating (VA)	Primary Current	Recommended MCB		
		NBN	NCN	NDN

Motor Circuit Protection

Tables 28,29,30 and 31 give general recommendations for the selection of circuit breakers and HRC fuses for the protection of motor power circuits and are based on the assumptions shown in Table 28 for a cage motor running at approximately 1400 Rev/Min.

Motor Rating	DOL Starting Conditions	Assisted Start Conditions
Up to 0.75kW	5 x FLC for 6 secs	2.5 x FLC for 15 secs
1.1 to 7.5kW	6 x FLC for 10 secs	2.5 x FLC for 15 secs
11 to 75kW	7 x FLC for 10 secs	2.5 x FLC for 15 secs
90 to 160kW	6 x FLC for 15 secs	2.5 x FLC for 20 secs

Residual Current Devices

A residual current device (RCD) is the generic term for a device which simultaneously performs the functions of detection of the residual current, comparison of this value with the rated residual operating value and opening the protected circuit when the residual current exceeds this value. These devices can take several different forms i.e. Residual Current Circuit Breaker (RCCB), Residual Current Circuit Breaker with integral Overload protection (RCBO), or a residual current device incorporated within a socket outlet or other accessory (SRCD)

Residual current circuit breakers (RCCB) protect against earth faults only and not short circuits. They are usually therefore used in conjunction with overcurrent protective devices.

Main Characteristics

"Reset" Button

When pressed, the output remains switched and return to normal is obtained by either: by pressing the "reset" clear pushbutton or cutting off the power supply. If the "reset" button is not pressed the device remains in the fault position.

Test Button

Pressing the test button allows a fault simulation which operates the relay and the output contacts. The fault level display is shown by an LED on the front of the product.

I Δ n Selector

Sensitivity setting: 0.03A instantaneous
0.1A/0.3A/1A and 3A time delay

Time Delay Selector

Adjustable time setting - instantaneous / 0.13s / 0.3s / 1s and 3s

Sealable Settings

A sealable cover prevents interference once the settings have been made.

Standard Output (1 C/O contact)

Switching to state 1 on:

- Failure of the core/relay connection
- Fault current in the monitored installation

Positive Safety Outlet (1 C/O contact)

Switching to state 1: Switching on the power

Switching to state 0: Failure of the core/relay connection
fault current in the monitored installation
failure of relay supply
internal failure of relay

Optical scale display by 5 LEDs of the fault in % of I Δ n

Optical scale display by (5 LEDs) of the fault in % of I Δ n

Common pin 6:

State 1 : output terminal 8

State 0 : output terminal 4

When associated with MCCB, the add-on block provides an earth fault protection and protects against electrical shocks by direct or indirect contact.

The add-on blocks are protected against nuisance tripping caused by transient voltages. It's able to detect sinusoidal alternating currents and residual pulsating direct currents (A type). It also avoids miss tripping (HI type - High Immunity).

Characteristics

Reset button :
Signals add-on block tripping and must be reset before switching on the installation.

Test button for RCD function :
Checks the electrical operating of the MCCB / Add-on block association.

Mechanical test button :
Checks the mechanical operating of the MCCB / Add-on block association.

LED signaling residual current level in the installation:
25% (orange) and 50% (red) $I_{\Delta n}$; green light to signal correct operating.

Remote tripping and advanced warning (50% $I_{\Delta n}$) signaling thanks to these contacts:

Earth leakage current ($I_{\Delta n}$) and delay (Δt) setting

unique neutral loop terminal.. ..on wall switches

Protection
Devices

Why loop neutrals at the ceiling rose when you can now safely loop at the switch?

- Reduce time spent working at height
- Terminals are easily accessible
- No need for a separate connector block
- Can reduce cable runs
- Shallowest profile to the back box
- Compliant with the 17th edition

Modular devices

Simple energy saving solutions

Modular devices such as time switches and programmers provide selectable on-off periods during the day, week and year or a combination of all to control various electrical loads.

Simple and effective energy savings can be achieved by setting these devices so that the various loads are only switched on when they are actually needed, thereby saving unnecessary usage of energy.

Switch Disconnectors	5.2

SK606

Description

Latching relays - operate when impulsed by a signal voltage. The impulse can be provided via a pushbutton or pushswitch. The first pulse operates the relay and latches it to its set (opposite) state, the next operation of the

pushbutton returns the relay to its reset (original) state.

Auxiliary Contacts (EPN050, EPN051)

Are available for remote signalling and centralised control applications and can be

easily combined with the latching relays.

Connection: 10mm² flexible
6mm² rigid

1 Mod = 17.5mm

Auxiliary Contacts for Centralised Control	110-230V~	½ Mod	EPN050

Description

To provide control of low power circuits max 16A; associated with switches, time switches etc for remote control applications. The relays will accept an

auxiliary contact for remote signalling applications (ESC080). For the command of ELV circuits use interface relays EN145 and EN146.

For the command of high power circuits (20, 40 & 63 Amps) use contactors as shown on page 5.7 - 5.9.

Min. 10mA 12V dc

Width	Cat ref.
1 Mod	EN146

Description

For the remote switching and control of power circuits where noise may be a concern i.e hotel bedrooms etc. (25A-63A AC1).

Technical Data

The choice of contactor depends upon a number of parameters, e.g.

- The nature of the supply.
- The power it is switching.
- The characteristics of the load.
- The control voltage required.
- Number of operations

All contactor ratings are for AC1 loads only – if the load differs from AC1 the contactor may need de-rating (see technical characteristics on page 5.37).

Options

- Contact choice
- Normally open (NO)
 - Normally closed (NC)

- 1 Mod = 17.5mm
2 Mod = 35mm
3 Mod = 52.5mm
4 Mod = 70mm

The use of LZ060 (heat dissipation inserts) between all contactors installed or between contactors and adjacent devices is required.

4 Channel Digital Time Switch Weekly and Annual Cycle

In commercial premises timed programming often requires the use of multi-circuit equipment with large programming capacities for a weekly or annual cycle.

Applications

- Command of lighting circuits
- Control of heating
- Ventilation control
- Bell
- Alarm

Functions

- Summer/winter time pre-programmed
- Delivered with time set
- External input for override (permanent, temporary, timed)
- Easy programming with words in display
- The output can be defined as ON/OFF, impulse or cycle

- 4 different cycles can be defined
- Calculates automatically all dates linked with easter.
- Holidays program
- 10 specific weekly programs
- Random mode
- Input for external mode
- Hour counter on each output
- Keyboard locking with PIN code

Connection

Quick connect terminals
Capacity: 0.75 to 2.5mm²

Description

A photo-electric cell measures the light level and in conjunction with the relay provides on/off control of a circuit.

This device controls lighting circuits in relation to ambient light, based on user settings.

Front cover sealability

Applications

Street lighting, display lighting, illuminated signs etc.

Connection

Protected cable clamps

Capacity:

Rigid: 1.5 to 10mm²

Flexible: 1 to 6mm²

On board LED shows status of changeover contact.

Technical Data

4 position override switch allowing:

- Auto: normal operating mode
- On: permanently switched on
- Off: permanently switched off
- Test: setting mode for easy adjustment.

3 Mod = 52.5mm

EEN100

Light Sensitive Switch

2 sensitivity ranges: 5 to 50 lux, 50 to 2000 lux

Delivered with a separate surface photo-electric cell EE003

Must be used in conjunction with a suitably rated contactor (page 5.7 - 5.8) where load conditions demand

Characteristics

Voltage rating: 230V~ 50/60Hz

Outputs: 1 changeover AC 1 contact 16A AC1 - 230V~

Maximum distance: 50m between photocell and controller

Width

EEN100

Light Sensitive Programmer

Description

To control the lighting installation in relation to time and ambient light.

It is a weekly programmer associated with a light sensitive switch.

Working Principle

The user programmes both on/off periods and a desired light level. The cell measures the light level within the on period. Depending on the light level (below or above the programmed threshold, the output will be switched on/off. 20 program steps, 1 minute switching increments

Programming Function

Programming by keys and display on LCD screen. On/off override facility, permanent working. Display and control of the programme. Test setting for easy adjustment.

1 Mod = 17.5mm

3 Mod = 52.5mm

Description

To provide all types of automatic control i.e. lighting, ventilation, watering, machine pre-heating, automatic door and visual audible indication, cycle control etc. with automatic switch off after preset time.

Applications

For timing and automation in domestic and commercial premises. The input signal can be via various switching devices (pushbutton, latching switch, timeclock etc.) and the timed output used to control the application.

Technical Data

Voltage range:
12 to 48V DC
12 to 230V AC
Adjustable: Time delay from 0.1s to 10hrs.
Complies with BS EN 60669-2-1

Terminal Capacity

6mm² max flexible
1.5 - 10mm² rigid
1 Mod = 17.5mm

EZN001

Delay On

Characteristics
1 changeover contact
10A / 230V~ AC1

Description

Provide separated extra low voltage (SELV) 8, 12, 24V~.

Technical Data

Secondary voltages:
8V, 12V, 24V~
Bell transformers are short-circuit protected.
Bells/buzzers:
Max. continuous duty
≤ 30 minutes.
Cable capacities: 6mm²

Output

Bells: 85 dBA
Buzzers: 78 dBA

When a bell transformer is installed in an enclosure with mains voltage equipment, 230V cable should be used on the secondary side of the transformer or extra low voltage cable should be sheathed within the enclosure.

Note The transformers have a higher no load voltage. The stated voltages correspond to the voltages on nominal load.

Description

Electronic thermostats for any application requiring temperature control (from cold room to steam room).

Applications

EK081 fixed ambient probe for night temperature regulation.
 EK083 used as floor probe to limit floor temperature.
 EK083 used to control hot water

temperature (with its collar) in case of probe disconnection.

3 working modes are possible (selected by wiring):

1. Permanent off
2. Permanent on
3. Cyclic operation 1 minute in every 4.

Output status is displayed by an LED.

EK187**Electronic Thermostat Suitable for Heating Control**

Two adjustable temperature levels are selected by external signals (operation by time switch or digital programmer).

Additionally there is an adjustable low level temperature for frost protection etc. In the event of probe disconnection the heating system is switched on one minute in every four.

3 Mod = 52.5mm

Multi-range Thermostats

Delivered without probe. Compatible with EK081 or EK083 probes

Characteristics	Width	Cat ref.
Voltage rating: 230V~ - 50/60 Hz Output: 1 changeover contact, 2A AC1 - 230V~ 4 ranges: -30 to 0°C, 0 to +30°C, 30 to +60°C, 60 to +90°C To associate with contactors (page 5.7 - 5.9)	3 Mod	EK186

EK187

Multi-order Thermostats

Delivered without probe. Compatible with EK081 or EK082 probes

Characteristics	Width	Cat ref.
Accuracy $\pm 0.2^{\circ}\text{C}$, Voltage rating: 230V~ - 50/60 Hz Output: 1 changeover contact, 2A AC1 - 230V~ Temperature Level 1 (Comfort) Adjustable 5 - 30°C Temperature Level 2 (Night setting) Adjustable 2 - 8°C less than Level 1 setting Temperature level 3 (Frost setting) Adjustable 5 - 30°C To associate with contactors (page 5.7 - 5.9)	3 Mod	EK187

EK081

Fixed Ambient Probe

Can be associated with
 EK186, EK187 thermostats
 EG502 programmable thermostat

Cat ref.
EK081

EK082

Adjustable Ambient Probe

This probe is equipped with a potentiometer for the correction of the set temperature ($\pm 3^{\circ}\text{C}$)

Can be associated with
 EK187 thermostats
 EG502 programmable thermostat

Cat ref.
EK082

EK083

Universal Probe (Removable Collar)

Can be associated with
 EK186 thermostats
 EG502 programmable thermostat

Cat ref.
EK083

Programmable Thermostat

Description
To save energy by managing the heating system according to the periods of occupation.

It is a weekly programmer associated with a 3 setting thermostat:

- "Comfort",
- "Reduced",
- "Anti-frost"

Connection: Protected Cable Clamps

Capacity: 1.5 to 10 mm² rigid
Capacity: 1 to 6 mm² flexible

Thermostatic Function

- Adjustable comfort and reduced temperature
- Fixed anti-frost temperature
- Display of state of output,
- Display of selected mode,

- Push button selection of working mode:
- Automatic cycle comfort T° / reduced T°
- Permanent comfort temperature
- Permanent reduced temperature
- Permanent anti-frost temperature.

Probes

EG502 can be associated with:

- EK081 fixed ambient probe,
- EK082 adjustable ambient probe
- EK083 universal probe (see page 5.21)

4 Mod = 70mm

EG502

Programmable Thermostat

Delivered without probe. Compatible with EK081, EK082t or EK083 probes

Characteristics	Width	Cat ref.
Voltage rating: 230V; 50 Hz Output: 1 changeover contact, 2A – 250V; AC1 2 Temperature settings "comfort" and "reduced" adjustable + 8°C to + 28°C, Anti-frost temperature setting + 8°C (constant)	4 Mod	EG502

Hours Counter

Description

To measure the total operating time of any circuit/load non resettable

Application Example

- Total time of plant running
- Connection in parallel with contactor coil
- Recording of lighting hours for relamping purposes

1 Mod = 17.5mm
2 Mod = 35mm
3 Mod = 52.5mm
4 Mod = 70mm

Description	Cat ref.
CT Output and RJ45 Lead Tester	JFT03

Description

Energy meters are used to measure the active energy consumed by an installation. They allow the user to understand and control the real cost of an installation and to divide the consumption between the different appliances.

MID approval for sub billing on EC154M.

Characteristics

- Fully compliant with the European standard EN 50470-3
- Class B
- Accuracy 1%
- Energy readout: 7 digits
- Backlit display
- Indication of instantaneous power consumption
- Total / partial counter (expected MID references)

- Pulsed output
- Unlimited saving of measurements
- LED flashes according to consumption
- Option: tariff 1/ tariff 2

- Three phase energy meters are adapted to all kind of networks
- Display indication in case of incorrect wiring

- 1 Mod = 17.5mm
- 2 Mod = 35mm
- 3 Mod = 52.5mm
- 4 Mod = 70mm

Note:

Use of heat dissipation inserts (cat ref. LZ060) are recommended on each side of direct connection meters.

EC370

Three Phase kWh Meters - Connection via Current Transformers

To be connected to CT with 5A on the secondary

Voltage 230/400V~ 50/60Hz
Starting current = 10mA
Max current on CT secondary = 6A

Characteristics	Width	Cat ref.
Energy meter with pulsed output and total / partial counter	4 Mod	EC370
Energy meter with pulsed output - total / partial counter and 2 tariffs	4 Mod	EC372
Energy meter with KNX output	4 Mod	TE370

Current transformers are used to feed analogue and digital ammeters and kilowatt hour meters.

The current on the secondary circuit (0 - 5A) is proportional to the current on primary circuit class: 1.

For complete list of dimensions see page 5.58.

Can be mounted on copper bar or on cable. Can be mounted on DIN rail.

Modular multifunction meters dedicated to monitoring and reporting of the electrical networks (balanced or unbalanced – 1,2,3 or 4 wires). The meters are connected through a CT to the network and measure all the parameters (TRMS).

Multifunction meter SM101C

It allows communication via pulses output and/or RS485 Jbus/Modbus.

Features

- LCD display
- 4M DIN Rail mounting
- Wiring test

Standards

- IEC 61557-12
- IEC 62053-22 (class 0.5s)
- IEC 62053-23 (class 2)

Connection solid & stranded
4mm² (power)
2.5mm² (communication)

SM101C

Description

Hager dimmers control the lighting level of all types of lighting source: incandescent, LV halogen, ELV halogen with electronic or ferromagnetic transformer, LED ELV lamps with electronic transformer, fluorescent with electronic ballast.

The EVN 300W and 500W dimmers also allow lighting level adjustment for dimmable CFL and dimmable LED lamps.

Dimming controlled by push button:

- Start / stop by short press
- Increasing / decreasing by maintaining pressure

For technical details see page 5.70.

1 Mod = 17.5mm
2 Mod = 35mm

Common characteristics

- Universal dimmers with automatic load recognition
- Softstart (progressive start) to increase the working life of lamps
- Memorisation of last dimming level
- Protection against overheating

EVN011

Universal Dimmers 300W

- Compatible with dimmable CFL and LED
- 3 modes for load learning: auto, advanced, expert (comfort version)
- Can replace a latching relay, with lighting level function
- Push button (line or neutral).
- Very low consumption.

Characteristics	Width	Cat ref.
Standard version	1	EVN011
Comfort version	1	EVN012

- Expert mode
- Scene by 2 short double presses on the PB (progressive switch-off, night light, 100%, no function)

EVN004

Universal Dimmers 500W

- Compatible CFL and LED
- 3 modes for load learning: auto, advanced, expert (comfort version)
- Very low consumption

Characteristics	Width	Cat ref.
Standard version	2	EVN002
Comfort version	2	EVN004

- Expert mode
- 100% via 2 short presses on the dim input PB
- One scene PB (scene, time-delayed scene, progressive switch-off, night light)
- Multi-voltage dim PB

Contact Rating	-	2A / 250V
Imin / 230V	-	15mA
Connection		
Flexible	6mm ²	
Rigid	10mm ²	

¹ Voltage dependant on associated relay

Heating

The choice of the contactor depends on the mechanical endurance (number of operations) and on the electrical heating load i.e. resistive elements, infra-red element, convectors.

Choice of Contactors

The choice of contactor is dependant upon many parameters i.e. operating voltage, size of contacts, number of operations, ambient temperature, type of load supplied etc.

Type of Load

Loads are categorised into various AC ratings, (AC1, AC2, AC3 etc.) and the higher the AC rating the more inductive the load becomes. All Hager contactor ratings are given at AC1, therefore they must be de-rated if used on other types of AC load.

Heat Dissipation Inserts

The ambient temperature around a contactor can affect its life expectancy, therefore, we strongly recommend that heat dissipation inserts (LZ060) are fitted between all contactors and adjacent devices.

Single Phase

Three Phase

			Number of operations				
			100,000	150,000	200,000	500,000	1,000,000
Max. load in kW	230V	16A	3	2.5	1.9	0.85	0.7
		25A	4.6	4	3	1.35	1
		40A	7.3	6.3	4.7	2.2	1.6
		63A	11.6	10	7.5	3.5	2.5

		63A	35	30	22.6	10.2	7.6

Motors

Single Phase 230V (AC3 or AC7b)

Three Phase 400V (AC3 or AC7b)

		Choice of Contactor According to control diagram	
Maximum load in kW	Single Phase with Capacitor 230V	Three Phase (AC3 or AC7) 400V	
	0.88		2 Wires
	2.6		2 pole 25A
		2.6	2 pole 40A
		7.8	3 pole 25A
		10	3 pole 40A
			3 pole 63A

Requirements of Use

Influence of Working Temperature

Derating factor between 40°C and 50°C : 0.9

Example: Heating with convector

The maximum load of ESC225 is 4.6kW for 50,000 operations and for a temperature <40°C.

between 40°C and 50°C, the load is 4.6 x 0.9 i.e. 4.14kW

Close Fitting

It is necessary to put a heat dissipation insert (reference LZ060) between each contactor.

Lighting systems with electronic ballasts cause inrush current peaks. Therefore we recommend you use the chart below to determinate the maximum amount of lamps that can be connected to a Hager contactor: The chart gives the maximum amount of lamps per contact. In 2014 the performances of the contactors in combination with lights increased. The products identified on the front face with the '+' can accept a higher number of lamps. For these products, see the figures in the column with the '+' in the header.

Keys

1. Menu	Selection of operating mode
Auto	Mode of running according to the program selected
Prog	New for programming mode
Prog	To modify an existing program
	Checking of the program
	Modification of time, date and selection of the winter/summer time change mode.
	Holidays
2. + / -	Navigation or setting of values
	In auto, mode, selection of overrides, waivers or random operation
3. OK	To validate flashing information on display
4.	To return to the previous step

You may return into auto mode at any moment using menu.
If no action is taken for 1 min, the switch returns to auto mode.

Major Characteristics

- Product delivered with current time and date set
- Automatic change of winter / summer time
- Programming key
 - For permanent waivers
 - For program copy or save
- Programming for day or group of days
- 56 program steps On, Off
- Impulses (1 sec to 30 min)*
- Permanent overrides On or Off (permanent light on)
- Temporary overrides On or Off (flashing)
- Holiday mode : overrides On or Off between two dates*
- Simulation of presence *
- Display bar graph of daily profile
- Keyboard locking possible
- Programmable with power off
- Back lit display*

* Evolution models E or V only

Technical Characteristics

Electrical Characteristics	
Voltage Supply	230V $\pm 10\%$ 50/60Hz
Consumption	1VA
Output	1 Changeover contact 16A - 250V AC 1 3A - 250V cos ϕ = 0.6 1000W Incandescent lighting
Functional Characteristics	
Number of programs	5 Adjustable Pre-recorded Programs
Accuracy	± 6 min per year
Supply Failure Reserve	Total of 3 years
Environment	
Working Temperature	-10°C to +50°C
Storage Temperature	-10°C to +60°C
Cable Capacity	1 to 4mm ²
Main Characteristics	Easy to program: 5 programs are pre-recorded. The user just has to select the program which corresponds to its use and modify time switches if necessary.

The 5 pre-registered programs are as follows

P	Prog
P0	OFF
P1	ON
P2	6.00 23.00
P3	6.00 8.00 17.00 23.00
P4	6.00 8.00 11.00 13.00 17.00 23.00

Delay Timers

Delay timer devices are used to control a variety of processes where the requirement is for switching circuits on, off or delaying the on or off switching for a pre-set period of time. Typical device types are...

- Delay on - intended to delay the starting or switching of a circuit for a set period of time following the command signal e.g. to delay the starting of motor loads where a large number of motors are to be started by the same switch to reduce the effects of the starting currents.
- Delay off - intended to delay the stopping or switching off of a circuit for a set period of time following the removal of the command signal e.g. to overrun an extractor following the switching off of a process that creates fumes.
- Adjustable time on - intended to switch on for a set period, the command signal must remain on throughout the set period e.g. to switch on two sets of heaters with one set (the boost) switching off after the set period.
- Impulse timer - intended to switch on for a set period, the command signal length is not important e.g. to boost a time clock controlled circuit such as a water storage heater.
- Symmetrical timer - intended to toggle a circuit on and off in regular time patterns e.g. to run an extractor intermittently.

Multifunction Timer - 6 Individual Functions

A = Timer.

B = Delay off (output relay opens either at end of command or after set time period - whichever is shorter).

C = Delay off.

D = Delay on.

E = Delay on (output relay closes either at end of command or after set time period - whichever is shorter).

F = Symmetrical timer.

On selection - contact permanently closed

Off selection - contact permanently open

———— Output relay open - with no command

 Output relay open - with command signal running

 Output relay closed - with command signal running

 Output relay close - with command signal removed

 Output relay closed (EZN005)

Time Lag Switches

A common area where time delay devices are used is stairways and corridors in multi occupancy buildings where they provide a level of energy efficiency. The EMN001 device provides basic time lag control.

A: Basic Mode

Press push button to switch ON the light. After a set time (Adjustable "T", the light will switch OFF automatically.

B: Prewarning Mode

A signal (blink) will appear before the end of the lighting period.

C: Double delay mode

Press push button to switch light ON. After a set time (Adjustable "T", the light will switch OFF automatically. If you press the button for more than 3 seconds, a time lag of one hour begin.

Light Sensitive Switches

Using light sensitive switches can prevent the unnecessary use of lighting circuits where sufficient daylight exists. The benefit of modular devices is the facility to set the ambient lighting level at which the device will operate, and as the device is fitted at the distribution point prevent unauthorised tampering. The remote photocell unit can be mounted up to a distance of 50 metres from the device. Two devices are available the standard EEN100 light sensitive switch and an enhanced programmable version the EE171 that also allows time clock control.

Principle of Operation

Both devices control lighting systems according to natural illumination;

- The user sets the working level:
- The photo cell measures the external light level

The output of the EEN100 is:

- ON, when the measured level is lower than the pre-set light level
- OFF, when the measured level is higher than the pre-set light level

The output of the EE171 during the programmed ON time period is:

- ON, when the measured level is lower than the pre-set light level
- OFF, when the measured level is higher than the pre-set light level

The output of the EE171 during the programmed off time period is:

- OFF, regardless of the lighting level

The light sensitive switches include a built in time delay which avoids unnecessary switching due to temporary factors such as car headlight beams etc...

Description

The programmable light sensitive switch EE171 has two main functions:

- Light sensitive switch comprising
 - 1 Override selector switch to allow permanent ON or OFF, auto or test mode
 - 2 Lighting range selector
 - 3 Potentiometer to set light level
 - 4 Indicator to show output switching status

- A programmer to establish the automatic operating cycle

The programmer comprises 4 keys:

- 5 **ON / OFF** to choose whether the circuit is on or off.
- 6 **Prog** to set the program and scroll program steps
- 7 **Reset**
- 8 **+** and **-** to change settings

Mounting the Cell

To ensure correct operation of the light sensitive switch, the cell must not be influenced by artificial light or direct solar radiation and should be sheltered from dust and humidity. In case of disconnection of the link between the cell and the light sensitive switch, the output of the device will be switched on. Make sure the light sensitive switch is unplugged before connecting the cell.

	EE002	EE003
Type	Flush Mounting	Surface Mounting
Dimensions (mm)	89 x 48 x 32	25 x 25 x 20 Hole 25mm
Connection	Cable 1m 2 x 0.75mm ²	0.75 to 4mm ²
Protection Class	IP54	IP54
Working & Storage Temperature	-30°C to +60°C	-30°C to +60°C

Adjustment of the Working Level

The test position of the override selector 1 makes setting the preset level easier by removing the ON and OFF delay.

Select the sensitivity range which suits your application (selector 1) 5 to 100 lux (low light level) application examples; public lighting, shop windows, signals...

50 to 2000 lux (high light level) application examples; controls of shades

At the appropriate moment of the day, put the selector 1 in test position; turn the potentiometer 2 up to the switching point (the indicator 4 lights); put the selector back to position 'auto' the normal operating mode of the device.

Safety Transformers

These transformers are designed to ensure personal safety, their primary winding are electrically separated from their secondary windings and they are intended to feed separated extra low voltage circuits $U \leq 50V$. A thermal overload, in the primary windings, ensures that if a short circuit or an overload occurs in the output it will not damage the device.

**Bell Transformers**

Bell transformers are similar to safety transformers but the secondary voltages do not exceed 24 volts, they are also similarly protected against short circuits and overloads, by thermal protection in the primary winding.

Compliance with the Standards

The bell and safety transformers conform with BS EN 61558. Where transformers are to be used in a common enclosure with other devices heat dissipation inserts LZ060 should be used.

**Recommendation of Use**

- To link only one secondary (never link both simultaneously)
- Do not connect (in series or in parallel) secondaries of different transformers

Main Characteristics

Multiple Applications

A single device to solve all your problems of regulation or temperature control, from cold room to incubator.

Varying Accuracy

The accuracy can be adapted according to the application. e.g.: low for ambient temperature regulation, high for incubator regulation.

Safety Feature for Probe Failure

To protect the installation in case of disconnection from the probe, various connections can be made so the thermostat will be:

- Permanent OFF
- Permanent ON
- Cyclical operation: output ON 1 minute in every 4

Display

State of output.

Product Presentation

1. Selection of the range
2. Adjustment of the temperature setting
3. Selection of temperature range
4. Display of state of output

Working Principle

the EK186 regulates the temperature according to all or nothing principle, it can be associated with different probes, according to the application the accuracy is a function of the temperature range and is selected by a slide switch.

Position on Slide Switch	Temperature range °C			
	-30 to 0	0 to 30	30 to 60	60 to 90
1	± 2.15	± 2.54	± 2.98	± 3.43
2	± 0.15	± 0.18	± 0.21	± 0.24
3	± 0.38	± 0.45	± 0.53	± 0.61
4	± 1.23	± 1.45	± 1.70	± 1.96

Bold - Preferential accuracies for each temperature range.

Example of Choice of Accuracy

- Regulation of ambient temperature
Range: 0 to +30°C
Accuracy: $\pm 0.18^\circ\text{C} = 2$
- Control of hot water outgoing circuit
Range: 30 to +60°C
Accuracy: $\pm 0.53^\circ\text{C} = 3$

Electrical Connection

Caution

When the temperature ranges 30 to 60°C and 60 to 90°C are selected and the temperature measured by the probe is below 30°C, the safety feature for probe failure must be "permanent on", until the measured temperature reaches the minimum temperature corresponding to the range (i.e. 30°C for the range 30°C to 60°C and 60°C for the range 60°C to 90°C).

Technical Specifications

3. Frost setting
4. Frost setting override
5. Display of state of output i.e. contact position
6. LED indicating the frost override is on.
7. LED indicating the regulation in comparison with a reduced setting

Electrical Connection

Main Characteristics

- **Temperature settings controllable by external setting** when associating a digital time switch, it is possible to regulate the heating in relation with a program established by the user.
- **2 wires link** between the probe and the unit, enables the easy replacement of the ambient thermostats of an existing installation.
- **Safety feature for "probe failure"** in case of probe disconnection, the output will be switched 1 minute in every 4; so that in case of disconnection during winter, it will protect the installation from frost.
- **Display** of state of the output and of the setting.

Working Principle

EK187 adjusts the temperature under the "all or nothing" principle it is associated to an ambient probe and thus works in closed loop the temperature settings are selected by external settings (contacts free of potential).

EK187 is thus generally associated to a time switch or a digital time switch in the case of absence of external signal, EK187 regulates the heating in comparison with the reference setting, a switch enables the override of the dispensation setting.

Technical Specifications

Electrical Characteristics	
Voltage Supply	230V +10 -15% 50Hz
Consumption	4VA
Output	1 Changeover Contact 2A 230V AC1
Functional Characteristics	
Adjustment of Temperature Setting	Comfort and Reduced Temp From +8 to +28°C Fixed Anti-Frost Temperature Setting +8°C Fixed Accuracy: $\pm 0.2^\circ\text{C}$
Cycle	Weekly Cycle

Environment	
Working Temperature	-5 to +45°C
Storage Temperature	-20 to +60°C
Connection Capacity	
Flexible	1 to 6mm ²
Rigid	1.5 to 10mm ²
Probe	Maximum Distance 50m

Product Presentation

1. Programming of automatic cycle "comfort temperature", "reduced temperature", the principle of programming is similar to EG100.
2. LCD screen
3. Facility for permanent override of "comfort temperature", "reduced temperature", or "anti-frost"
4. Adjustment of the reduced temperature setting
5. Display of setting (comfort or reduced)
6. Display of state of output
7. Adjustment of the comfort temperature setting

Main Characteristics

- **Simplified summer/winter time setting**
Summer/winter time setting is obtained by pressing two separate keys
- **No loss of program in event of unlimited power failure**
Loss of time setting only, program still in memory
- **Override**
 - Permanent: "comfort, reduced, anti-frost" temperature setting:
 - With automatic return to: "comfort and reduced" temperature setting:
- **2 wires link**
Between the probe and the unit, this enables the easy replacement of the ambient thermostats in an existing installation
- **Display Mode**
Allows program to be checked without risk of alteration
- **Groups of days**
Days can be grouped in order to save program steps (so, a common setting for several days counts only as 1 program step)

Working Principle

The programmable thermostat regulates the heating thanks to 2 temperature settings: "comfort" and "reduced", according to a program established by the user; in cases of long absence, it is possible to maintain an anti-frost temperature.

Electrical Connection

EK083 Universal Probe

- To associate with EK186 thermostat
- To associate with EK187 thermostat and EK618 time programmable thermostat (for those applications insert in series with the probe a resistance of 1500Ω)

EK083: 10 kOhms at 25°C
cable length: 4m

Environment

- Working temperature: -30 to +90°C
- Storage temperature: -30 to +100°C

Electrical Connection

- Associated with EK186

- Associated with EK187 - EK618

Examples of Applications

Use with the clamp collar

- For the control of hot water

Use with the clamp collar

- Protected by a sheath for the control of floor temperature

- Used as an external probe in a weatherproof box.

Standard CT to plug-in Adaptor

The JFA03 converter allows for the connection of up to three standard current transformers, or standard split-core current transformers (with 1A or 5A secondary's), to the plug-in system.

The unit has integrated protection circuitry allowing for disconnection from meter under load conditions for maintenance.

Important Note

This converter does not provide electrical isolation. Current transformer secondaries may not be earthed and should be wired as shown.

Description

This is a 75mm wide three phase measuring current transformer designed for use with Hager x160 MCCBs and the plug-in multifunction power meters. This current transformer has three 15.5 x 30mm holes and is available with primary currents from 60 to 160A. (x160 frame MCCBs)
Internal safety circuitry is provided which limits the output voltage to a safe level, allowing the transformer secondary to be left disconnected under load.

Fixing

Busbar mounting and fixing feet included.

Dimensions (mm)

according to UL-94

- Reference standard EN60044-8
- Weight : 500g

Accessories

DIN rail mounting clip.

Installation

The CT uses plug-in technology allowing much faster installation saving you time and money. Additionally, all our three phase current transformers have been designed with hole centres and apertures to fit most standard industrial circuit breakers.

EC12160CT	160	330

For EC2560CT, EC25100CT, EC25125CT, EC25160CT, EC25200CT, EC25250CT

- Accuracy Class 1
- Aperture: 3 @ 21 x 25mm
- Primary Current: 60 to 250A
- 35mm hole centres
- Housing Material Self extinguishing Nylon
- IEC185 classification VO according to UL-94
- Reference standard EN60044-8
- Weight : 550g

Description

This is a 105mm wide three phase measuring current transformer designed for use with Hager x250 MCCBs and the plug-in multifunction power meters. This current transformer has three 21 x 25mm holes and is available with primary currents from 60 to 250A. (x250, h250 frame MCCBs)

Internal safety circuitry is provided which limits the output voltage to a safe level, allowing the transformer secondary to be left disconnected under load.

Fixing

Busbar mounting and fixing feet included.

Dimensions (mm)

Accessories

DIN rail mounting clip.

Installation

The CT uses plug-in technology allowing much faster installation saving you time and money. Additionally, all our three phase current transformers have been designed with hole centres and apertures to fit most standard industrial circuit breakers.

Current Transformer Ratios

EC25200CT	200	330
EC25250CT	250	330

For EC40250CT, EC40400CT, EC40630CT,

- Accuracy Class 1
- Aperture: 3 @ 31 x 31mm
- Primary Current: 250 to 630A
- 45mm hole centres
- Housing Material Self extinguishing Nylon
- IEC185 classification VO according to UL-94
- Reference standard EN60044-8
- Weight : 680g

Description

This is a 140mm wide three phase measuring current transformer designed for use with the plug-in multifunction power meters. This current transformer has three 31 x 31mm holes and is available with primary currents from 250 to 630A. (h630 frame)
Internal safety circuitry is provided which limits the output voltage to a safe level, allowing the transformer secondary to be left disconnected under load.

Fixing

Busbar mounting and fixing feet included.

Dimensions (mm)

Accessories

For EC80800CT

- Accuracy Class 1
- Aperture: 3 @ 54 x 50mm
- Primary Current: 800 -1600A
- 70mm hole centres
- Housing Material Self extinguishing Nylon
- IEC185 classification VO according to UL-94
- Reference standard EN60044-8
- Weight : 1200g

Description

This is a 215mm wide three phase measuring current transformer designed for use with the plug-in multifunction power meters. This current transformer has three 54 x 50mm holes and is available with primary currents from 800.

Internal safety circuitry is provided which limits the output voltage to a safe level, allowing the transformer secondary to be left disconnected under load.

Fixing

Busbar mounting and fixing feet included.

Accessories

DIN rail mounting clip.

Installation

The CT uses plug-in technology allowing much faster installation saving you time and money. Additionally, all our three phase current transformers have been designed with hole centres and apertures to fit most standard industrial circuit breakers.

Current Transformer Ratios

Primary Current	Output	Code
A	mV	
800	330	800
330mV Secondary		

Dimensions (mm)

CT Output and RJ45 Lead Tester

This device makes it possible to test the RJ45 patch lead used to connect the current transformer to the meter. It also enables a standard electricians multimeter to measure the individual secondary outputs of the current transformer.

To test the RJ45 patch lead, simply disconnect the lead from the meter and current transformer. Plug one end into socket 1 and the other end into socket 2 on the test box. Press the test button - the Green LED will light to indicate the lead is OK or the Red LED will light to indicate a faulty lead. When the lead is proven to be OK you can then check the individual secondary outputs of the current transformer. To measure the secondary output plug one end of the RJ45 patch lead into the current transformer and the other end into socket 2 on the test box. You can now use a standard multimeter to test the secondaries using the test points on the front of the test box. The output measured for each phase should be between 0 and 330mVac.

Model Reference: JFT03

3 Phase CT Splitter Box

This 3 Phase CT Splitter Box allows the separate monitoring of each phase of a three phase current transformer on individual energy meters.

Model Reference: JFS03

Meter Voltage Supply Cable

Our high quality Meter Voltage Supply Cables are fitted with a plug at one end and insulated bootlace ferrules at the other and provide power to the plug-in meter from your mains supply. Two types of cable material are available:- LSZH (Low Smoke Zero Halogen) & PVC.

Meter to Meter Supply Cable

Our high quality Meter to Meter Voltage Supply Cables are fitted with a plug at one end and socket at the other. This allows multiple plug-in meters to be energised from a common supply. Up to 32 meters can be powered in a 'daisy chain' arrangement using this method. Two types of cable material are available:- LSZH (Low Smoke Zero Halogen) & PVC.

RJ45 Connection Cable

The high quality low loss Category 5e RJ45 Connection Cable provides secondary connection between the plug-in current transformer and meter.

EVN011 - EVN012

Use the same phase for control and supply.

EVN002

EVN004

Do not forget to connect the 2 neutral points.

With Hager, you get a whole lot more.

Our Klik range of Lighting Connection and Control products have been designed to make the installation and wiring of lighting systems easier, faster and more versatile.

Klik 4 Pin

With the Klik connector, luminaires can be plugged in seconds, with absolute safety and without circuit isolation. The secure mechanical and electrical connection gives complete confidence in the systems integrity.

Klik 7 Pin

Klik 7 pin can be used as a simple stand-alone digital lighting control unit or as part of a more complex building management system.

Klik LCM

The Klik LCM (Lighting Control Module) allows connection and control of multiple luminaires with four separate channels. The KlikLink app makes setting up easy, utilising bluetooth connectivity.

Building automation

Tebis.KNX uses the technology of the installation bus for the control of lighting, heating and roller-shutters or other similar loads and is ideal for commercial & residential applications, giving the advance control and flexibility often required.

Tebis.KNX offers the technology to realise true energy savings through automation. Maximum energy savings are achieved where the system controls digital lighting and heating. In addition, by using daylight linking PIR devices to dim lighting in response to natural light availability, energy savings will be maximised. This alone has been proven to cut energy consumption by up to 70%.

The Tebis system enables the installer and user to control the electrical installation in a simple and comfortable way (lighting, blinds, heating, etc.)

The Tebis offer includes radio and twisted pair products, which are suitable for use in new installations and renovation. Products comply to the KNX standard.

The products below are the components needed to perform, configure or extend an existing Tebis.KNX installation.

TX100GB Configurator

This tool is used for programming of the entire system whether it is wire, radio or both. The dialogue and download with the wire products is carried out via the media coupler.

Other functions :

- Tests the links and commands
 - Measurement of radio environment interference level
 - Copy of the system data on a USB flash drive or creation of project documentation with additional software.
- USB flash drive; Delivered with TX100GB, TX101GB kit.

For technical details see page 6.19.

TX101GB

Configurator Kit

Kit includes:

- TX100GB configurator
- TR131A media coupler with 230V power cable
- USB Flash Drive Storage
- 4 rechargeable batteries Ni-Mh 1.2 V 1550 mA/h
- 230 V / 9 V 1 A mini charger

Description	Dimensions (mm)	Config.	Cat ref.
Frequency: 868.3 MHz TX100GB: 217 x 75 x 36	Box: 345 x 291 x 65	TX	TX101GB

Easy Configuration Tool

The TXA100 is delivered in a case which contains:

- TJA665 Configuration Server
- TXA114 KNX Bus & 24Vdc Power Supply
- WiFi Router
- RJ45 Ethernet Connection Cable

Description	Cat ref.
TXA100 Configuration Tool	TX100GB

TYF130

Line Coupler

Allows you to carry out the extension of a wire/bus line.

Description	Characteristics	Width	Config.	Cat ref.
Necessary in case of systems with more than 64 wire products	Supply: bus 30V DC Connects by two TG008 bus connectors	2 Mod	TX/ETS	TYF130

DALI Gateway

Description	Characteristics	Width	Config.	Cat ref.
Gateway for communication with DALI Products		4 Mod	ETS	TYA670D

TR131A

TX Media Coupler

Allows transmission of messages of twisted pair products towards radio products and vice versa.
Size: 111 x 51 x 18mm

Characteristics	Colour	Cat ref.
Frequency: 868.3 MHz Bi-directional product	White	TR131A
Frequency: 868.3 MHz Bi-directional product	Silver	TR131A

TH101

USB to KNX Interface Module

For connecting a computer to the KNX bus, via a USB connection. This is for the purpose of programming Tebis.KNX devices. In addition, it can also be used for the bus connection of visualisation equipment, computer monitoring and centralised control.

Description	Width	Cat ref.
USB Interface (model B USB slot)	2 Mod	TH101

TR140B

Radio Repeater

Amplifies the KNX radio signal. Usage: if distance is important or environment is unfavourable.
Note¹: all the KNX bidirectional radio products can be configured in receiver by TX100GB.
Note²: only requires 230V AC supply.

Description	Characteristics	Config.	Cat ref.
To be used in case of poor communication, amplifies the radio message	Supply: 230V~ Frequency: 868.3 MHz Bi-directional product Size: 111 x 51 x 18	TX	TR140B

TXA111

Power Supply Modules

Supplies 30V SELV DC power supply from the bus which serves directly as remote supply for most of the wire products (see page 6.25).

Description	Characteristics	Width	Cat ref.
Supplies the 30V power supply of the system for an installation carrying up to 64 TX products	Supply: 230V~ 50Hz, 15VA Output Voltage: 30V DC, 320mA Resistant to short circuits	4 Mod	TXA111
Supplies the 30V power supply of the system for an installation carrying up to 64 TX products	Supply: 230V~ 50Hz, 24VA Output Voltage: 30V DC, 640mA Resistant to short circuits	4 Mod	TXA112

TG018

Bus Cable

Bus cable (ST) Y 2 x 2 x 0,8mm with length of 100 and 500m (4kV test voltage).

Description	Length	Cat ref.
Insulated 4kV, to install with LV conductors	100m	TG018
Insulated 4kV, to install with LV conductors	500m	TG019

TG008

Bus Connector

Allows connections of bus to of TX products by plugging.

Description	Pack qty.	Cat ref.
4 links per connector (connection capacity 0.6 to 0.9mm ² rigid)	50 pieces	TG008

Input interfaces which manage the information flow to control and manage the electrical equipment of the installation.

They send via the bus, orders to the Tebis system output products.

Input Modules

For managing the ON/OFF contacts (potential free or 230V) coming from traditional control devices (PB, switch, thermostat, clock, etc.)

A single connection to the bus ensures supply of the products and information exchange, considerably reducing cabling.

For technical details see page 6.26.

TXB302

Input Modules for Flush Mounting

These modules are placed behind standard electrical fittings (push button or switch) in fixed box with a minimum of 40mm depth. Allow the volt free contact link. All the commands are of the SELV type.

Description	Supply	Dimensions h x w x d (mm)	Configuration	Cat ref.
2 Inputs for Volt Free Contacts	Bus 30V DC	35 x 38 x 12	TX/ETS	TXB302
4 Inputs for Volt Free Contacts	Bus 30V DC	35 x 38 x 12	TX/ETS	TXB304

TXB344

Four Input Modules with Four LED Output terminals

Four inputs for volt free contacts, four outputs for state indication by LED.

Functions:

- ON/OFF control
- Up/Down control (with alarm function)
- Dimming control
- Override control
- Time delay function
- Scene call

Features

- Power supply: 30V DC
- Output voltage: 2V DC
- Output current: 0.85mA

Description	Dimensions h x w x d (mm)	Configuration	Cat ref.
Flush Mount 2 Channels with 2 LED Output Terminals	35 x 38 x 12	TX/ETS	TXB322
Flush Mount 4 Channels with 4 LED Output Terminals	35 x 38 x 12	TX/ETS	TXB344

TXA306

Input Modules

Allows 230V switching products to be interfaced with a tebis system.

Description	Supply	Width	Configuration	Cat ref.
4 x 230V Inputs	Bus 30V DC	2 Mod	TX/ETS	TXA304
6 x Volt free - 230V	Bus 30V DC	6 Mod	TX/ETS	TXA306

Control commands are transmitted directly onto the bus without the need for output controls. Wiring is simplified as power supply is taken direct from the bus. Time switches are used in control of lighting, heating, shutters movement, domestic appliances, sockets, etc. in order to improve comfort and saving energy.

Functions

- 7 day programmer, 56 steps of program, minimum setting step of 1 minute
- Possible to program impulses (1s to 30min)
- Automatic change of schedule for summer/winter

Programming Key EG005

For programming the time switch

- Copy or saving the program
- Making circuit On or Off temporarily (blinking)
- Permanent priority settings On or Off (manual)

Software

- For programming from PC or on the product not connected in the system
- 5 years functioning reserve with lithium battery
- Bar graph display of day profile

Other Functions

- Impulse programming (1s to 30min)
- Presence simulation
- Back light screen
- Holiday mode - priority setting On or Off between two dates
- Possible to lock keyboard and programming by EG004 key

TXA023

- Can be synchronized on radio via signal DCF77 with help of EG001 antenna.
- Via bus, master timer can set time and date of TXA023

Installation

Programming is carried out by configuration device TX100GB via media coupler or by ETS.

For technical details see page 6.27.

TXA022

Time Switches

2 channel 7 day Function - ON/OFF, Up/Down, heating control scene selection, master or slave clock function. Product setting on current hour and day.

Description	Supply	Width	Cat ref.
Weekly Time Switch	Bus 30V DC	2 Mod	TXA022
Weekly Time Switch with DCF Capability	Bus 30V DC	2 Mod	TXA023
Antenna for TXA023	-	-	EG001

EG004

Accessories

Description	Cat ref.
Locking Key (to stop unauthorised changing of the program)	EG004
Blank Programming Key (to save program from switch or software)	EG005
USB Adaptor and Interface Software (for transferring the program from the PC to the key)	EG003G
Storage Key Module (holds 3 keys)	EG006

EG006

Light sensitive switches are used for automatic control of indoor and outdoor lighting or for the control of blinds, or curtains or shutters according to ambient lighting.

Energy Saving

Maximises natural light resulting in energy savings.

Principal Applications

- Residential building - outdoor lighting
- Commercial and industrial sector - classrooms, offices, windows, car parking, etc.

Comfort

Light sensitive switch will avoid excessive light or will limit overheating of the premises by appropriately managing shutter or blind operation.

Assembly

Light measurement is carried out with the help of a photo resistive cell connected to the product.

The cell has two versions:

- Flush mounted ref. EE002
- Surface ref. EE003

Note: Switch and cell are required.

Installation

Programming is carried out by configuration device TX100GB via media coupler or by ETS.

For technical details see page 6.28.

TXA025

Light Sensitive Switch

Control of indoor or outdoor lighting circuits (ON, OFF, Dimming) as well as the blinds, curtains or shutters according to the ambient light.

Measures ambient light via cell EE002 or E003 and transmits control command when preset level is reached. The information of the cell connected on TXA025 can be shared via Bus with several other TXA025. This makes several levels of regulation possible.

Description	Supply	Width	Cat ref.
2 Sensitivity Ranges: 2 to 200 lux, 200 to 20000 lux. Modes: Auto / Manual / Test. Potentiometer for level setting LED for set point crossing indication. Max. distance between cell and TXA025: 100m (delivered without cell).	Bus 30V DC	2 Mod	TXA025

EE002

Photo Resistive Cells for TXA025

Description	Cat ref.
Flush Mounted Cell has 1m, 2 x 0.75mm ² Cable	EE002
Surface Mounted Cell has 4m, 2 x 0.75mm ² Cable	EE003

EE003

Used for automatic lighting control or heating of the premises based on occupancy and lighting level.
Principal applications - Offices, corridors, conference rooms, classrooms, etc

Functions - ON/OFF control, Up/Down control, heating control, scene selection, time delay and priority setting, setting dimming levels, Master/slave function.

The bi-directional detector head can be oriented at 90° to adapt the zone of detection depending on the configuration of the room. A large area of detection - with the help of two integrated sensors, these products are able to detect movements in a large area and detect presence (person working in office) in a smaller area.
Products delivered with BCU (coupling unit to the bus)

2 Versions of Detectors

- 2 channel detector with On/Off control AND
- 1 channel lighting regulator detector (for maintaining constant light)

Installation

Programming is carried out by configuration device TX100GB via media coupler/ETS.

For technical details see page 6.29.

TX510

2 Channel Presence Detector 360°

Channel 1: Switching based on presence and lux level. Switching takes place when presence is detected and the lux level is below the set point. Lux level settings - 5, 100, 200, 300, 500, 800, On permanent, Delay off time - 1min to 30min Application - switching off lighting, blinds, curtains or shutters.

Channel 2: Switching based on presence only. Uses both delay on and delay off for switching. Delay off 30 sec > 10 mins - Delay on = 30 secs Delay off 10 mins ≤ 60 mins - Delay on = 5 - 60 mins

Application: heating, ventilation, etc.

Description	Dimensions dia. x depth (mm)	Supply	Cat ref.
Light intensity from 5 to 1200 lux Time delay for lighting Time delay for presence Area covered - 13x7m at 2.5m height	110 x 31	Bus 30V DC	TX510

TX511

1 Channel Presence Detector 360°

Associated with Tebis dimmers, it is possible to maintain light intensity in a room at a constant level as long as there is presence in the room irrespective of changes in the natural lighting.

3 Operating Modes

- Mode 1 - Dimming inactive (only presence info used)
- Mode 2 - Dimming active as per light setting on product potentiometer
- Mode 3 - Dimming active. Lighting instruction can be changed by long push on communicating PB of presence detector

Description	Dimensions dia. x depth (mm)	Supply	Cat ref.
Light intensity from 5 to 1200 Lux Time delay for lighting Area covered - 13 x 7m at a height of 2.5m	110 x 31	Bus 30V DC	TX511

TCC510S

1 Channel Presence Detector 360°

Occupancy sensors TCC510S are presence detectors designed to detect low amplitude movements (movements from body or arms). Detection is by means of the pyroelectric IR sensor located under detection lens.

The occupancy sensor measures the brightness in the room on a continuous basis and compares it to the level preset on the potentiometer (or by means of the remote control EE807) by ETS parameter. These products are part of the Tebis installation system.

Configuration

- E-mode TX100 V.2.6.0 or >: detailed description in User's Instructions supplied with the configurator.
- S-mode ETS : Application software STCC510S. Database and description available from manufacturer.

Lux and time delay settings via EEK001 or potentiometers located on the device

Description	Dimensions dia. x depth (mm)	Supply	Cat ref.
Light intensity from 5 to 1200 Lux Time delay for lighting Area covered - 13 x 7m at a height of 2.5m	110 x 31	Bus 30V DC	TCC510S

Automation products provide commands in form of contacts. Input information such as rain, wind, sunrise, sunset, indoor and outdoor temperature, as well as commands from remote telephone interface are received and forwarded to input modules for controlling the outputs in the Tebis system.

Wind detector - helps in protecting blinds and shutters in the event of strong wind by creating a closing command.

Weather station - it includes a sensor block and a modular unit for interpretation. It is a complete system with input sensor, processing and weather data transmission. It also integrates a weekly programmer equipped with DCF77 antenna.

TG050

Wind Detector

Helps protect blinds in the event of strong wind. Consists of an anemometer and electronic box. Use with the Tebis system - contact of anemometer can be connected to input module TXA304 and TXA306. (For further details see page 6.25).

Description	Dimensions dia. x depth (mm)	Supply	Cat ref.
Level of detection adjustable from 5 to 55km/h (Factory preset to 25km/h)	110 x 31	230V AC 50 Hz	TG050

TH020B

Telephone Gateway 3 Inputs, 3 Outputs

- Remote control : 3 relay outputs
- Status indication : for each output
- User friendly voice guide in English
- Remote alarm detection and sending of voice messages to 3 programmed telephone numbers
- Recording of your own messages
- Voice messages for room temperature indication possibility to use together with an answering machine on the same telephone line
- Personal secret code to limit access to the device
- Timed switch-off of the relay output (from 1 second up to 59h 59min 59sec)

Description	Width (mm)	Supply	Cat ref.
Analog telephone line (PSTN) 48VDC 3 relay output 5A-250V AC1 1 temperature measurement CTN 10 kOhm 2 alarm inputs : 1 input 0-30VAC/DC 5mA min 1 input 0-230V AC 5mA min Power shutdown detection	5 Mod	230VM $\pm 15\%$ 50/60 Hz	TH020B

Environment

Working temperature : 0/+50°C
Storage temperature : -20/+70°C
IP 30, IK03

Connection

Flexible 2 x 2.5mm² max
Rigid : 2 x 2.5mm² max

These products serve as output interfaces for the Tebis system. They ensure the control of the electrical devices by taking commands transmitted by the input products.

Lighting output products allow control of all types of devices by On/Off control or dimming. Without modifying the wiring, it is possible to achieve:

- On, Off or dimming controls in individual and grouped or general controls
- Functions such as time delays, priority settings, scene selection or multi-applications.

All the output modules are equipped with output status display and with a manual override setting on front of the product.

For control of:

- Lighting
- Heating
- Power outlets
- Any load controlled by a simple contact

Note: Refer to technical information for de-rating for alternative load types.

For technical details see page 6.30.

TXA204C

TXA206D

TXA207C

Lighting and Heating

Functions:

- ON / OFF & ON / OFF Override
- LED indication of each output state
- High end timer function
- Full quick connect connections
- Full symmetrical top down cross through connections
- Large front labelling
- Local on device hand override, permanent or time limited

Description	No of Volt-Free Contacts	Supply (twisted pair)	Width (mm)	Cat ref.

Dimmers**TXA210N, TXA210AN, TXA213N, TXA215**

Universal dimmer with automatic load recognition.
Min/Max level local setting.
Manual mode that allows dimming even when the bus is disconnected.

Easy mode: (TX100GB)
Implementation of the channel dimming actuator scene.

S-mode: (ETS software)

Easy channels features
32 light scenes with a related scene speed.

Fixing of output state when bus is disconnected.

Enhanced override modes (forced).

TXA210N Universal dimmer 1 channel 600W**TXA210AN Universal dimmer 1 channel 300W****TXA213N Universal dimmer 3 channels 300W**

3 modes possible :

- 3 channels 3 x 300W
- 2 channels 600W / 300W
- 1 channel 900W

TXA215 Universal dimmer 1 channel 1000W

Dimmer with LCD display
Local setting of the dimming parameters (min/max, soft ON, soft OFF, dimming speed) and light scenes.
8 light scenes that can be activated locally.

For technical details see page 6.31 - 6.32.

TX211A

Output Modules for Variable Lighting (Dimmer Control)

For lighting loads requiring 1/10V dimming signal. Functions include ON/OFF and variation in lighting/ dimmer control.

Description	Width	Cat ref.
3 Outputs 1/10V	4 Mod	TX211A

These products serve as output interfaces for the Tebis system. They ensure opening and closing control of shutters, roller shutters, curtains, blinds, flaps etc. They interpret commands such as Up, Down, priority setting for Up or Down and Wind detection commands transmitted by input modules. All the output modules are

equipped with output status display and with a manual override setting on the front.

- Note:
- Shutter output modules will open and close KNX/EIB compatible actuators
 - Blind output modules will open, close and incline the slats of KNX/EIB compatible actuators

For technical details see page 6.34.

TXA224

Output Device for Shutters or Blinds

For control of roller-shutter curtains or venetian-blinds motors, KNX/EIB

- Functions:
- UP/DOWN
 - Blind inclination and STOP
 - UP/DOWN/STOP manual override
 - LED indication of each output state
 - Wind security functions
 - Blocking
 - Priority
 - Scenes
 - After bus failure position

Description	Width	Cat ref.

Thermostat TX320

Continuous room temperature regulator, featuring real-time temperature measurement, capable of sending an adjustment value to a servo or actuator, so to achieve the desired room temperature. It can control both heating device and air-conditioners.

Heating output, 6 channels

This device is designed for installation into a hot water circulation system, to control a 24V valve servo, e.g.: floor heating facilities. Output switching utilises a Triac so that noiseless switching can be achieved.

Valve Control Servo

This servo has a bus connection, which can be directly installed onto the universal valve of the radiating heaters. The corresponding valve servo and motorized device is controlled via the room temperature controller.

For technical details see page 6.33.

TX320

Thermostat**Features:**

- Power supply: 30V DC
- Measuring range: 0°C to 40°C
- 3 external contact points used for measuring input terminals, such as window magnetic contact points

Function:

- Heating / Cooling
- 2 step heating - Primary and Supplementary
- Work mode: Comfort, Standby, Night time, Frost / Overheat protection
- Switch, Light dimming, Blinds control

Description	Dimensions h x w x d (mm)	Cat ref.
Thermostat	27 x 84 x 80	TX320
Floor temperature sensor for TX320	-	EK087
Outside temperature sensor for TX320	-	EK088

TX206H

Heating Valve Controller (6 Channels)**Features:**

- Power supply: 230V power socket
- System voltage of 30V DC
- 6 channel for 24V heating valves (max 13 valves/channel)
- 6 channel output

Function:

- Adjusting value in %
- Override service
- Summer operation

Description	Dimensions h x w x d (mm)	Cat ref.
Heating valve controller (6 channel)	70 x 755 x 302	TX206H

TX502

Valve Control Servo with Room Temperature Regulator

Features:

- Power supply: 30V DC
- Property: 5 LEDs used to display servo locations
- Interface: 1m, 6-core cable is included

Function:

- Automatic regulating apparatus and temperature collection apparatus
- Work mode: Comfort, Standby, Night time, Frost
- Orientated start up
- Forced service
- Summer operation

Description	Dimensions h x w x d (mm)	Cat ref.
Valve control servo with room temperature regulator	70 x 755 x 302	TX502

RF input modules of EIB/KNX are used as interfaces for volt free contact and switches or conventional pushbuttons. Using these modules it is possible to control the electrical devices connected in the network by transmitting an RF signal. They can control RF output modules as well as TP wired products with the help of the media coupler TR131A. These products are particularly useful for renovating or extending existing installations.

2 or 4 inputs - 230V or Battery Operated

These input modules are available in following versions

- 2 or 4 input module version - flush mounted
- With power supply of 230V AC or with battery.

Operating temperature : 0°C to 45°C

Installation

Link allocation is to be done by configuration device TX100GB. These products can also communicate with TP wired products with the help of media coupler TR131A.

General Characteristics of the Radio System

Frequency - 868.3 MHz
Range - variable according to the environment - up to 30m indoor, 100m in free air. Noise measurement is possible by TX100GB.

RF System

- Maximum number of RF products = 256
- Maximum number of RF input translations by the media coupler to twisted pair output products = 63

For technical details see page 6.35.

TRB302A

RF Input Modules (Battery Operated)

Frequency: 868.3 MHz

TRB302B

Radio push-buttons and remote controls enable easy addition of control points without wiring work. They are suitable for all situations : new systems, renovations or post installation. These products are included in Tebis system. They control both radio output modules as well as twisted pair products via TR131A.

Radio Remote Control

These are portable radio emitters of EIB/KNX standard. The remote controls are available in 4, 8 and 24 ways.

Putting Into Service

Allocation of the links is carried out by TX100GB configurator. These products also communicate with twisted pair products via the TR131A bus radio / twisted pair

General characteristics of the radio system

- Frequency : 868.3 MHz
- Range : it is variable according to the environment : up to 30m inside, up to 100m in free air.

Working temperature :
0°C to +45°C

A measurement of the signal interference is possible by TX100GB

RF system

- Maximum number of RF products = 256
- Maximum number of RF input translations by the media coupler to twisted pair output products = 63

For technical details see page 6.36.

TU404

KNX Radio Remote Controls

Power supply: CR 2430 3V Lithium Battery Cell (life 3 years)

Unidirectional products: Emitter

Transmission indicated by LED

Functions:

- Start/Stop, Dimming
- Up/Down + Alarm
- Override
- Scenarios

The RF EIB/KNX input/output modules are used as an interface between volt free contacts of switches or conventional pushbuttons at input level and electrical devices at output level for direct control. These products are able to communicate with other RF or TP wired products (via media coupler TR131A). They are particularly useful for renovating or extending existing installations.

1 Input + 1 Output 10A

For creating simple lighting functions for integrating in a group, general controls or other scenario functions by simple programming.

2 Inputs + 1 Output Shutter/Blind

For creating shutter control function for integrating in a group, general control or other scenario functions by simple programming.

Installation

Link allocation is carried out by configuration device TX100GB. These products also communicate with TP wired products with the help of media coupler TR131A.

General Characteristics of RF System

Frequency - 868.3 MHz
Range - variable according to the environment - up to 30m indoor, 100m in free air.
Noise measurement is possible with the TX100GB.

RF System

- Maximum number of RF products = 256
- Maximum number of RF input translations by the media coupler to twisted pair output products = 63

TRB501

1 Input + 1 Output 10A

Product supplied with input/output module pre-configured for control of the connected output.
Power supply: 250V AC 50Hz

Functions of Input:

- ON/OFF, Dimming
- Priority Setting
- Scenarios

Functions of Output:

- ON/OFF Control
- Time Delay
- 8 Scenes
- Priority Setting

Description

Bidirectional Product for Transmitting and Receiving

RF KNX output modules take commands transmitted by input modules. They interface between commands and electrical equipment.

These bidirectional products are able to communicate with all other RF or TP wired products (via media coupler TR131A). They are particularly useful for renovation or for equipment already installed.

1 RF Output 16A

This flush mounted module helps control circuits of lighting, VMC, heating, solenoid valves, etc.

Expansion

All RF output products can be integrated by simple programming, in zone group control, general or centralised controls and in scenarios functions.

Installation

Link allocation is carried out by configuration device TX100GB. These products can also communicate with TP wired products via media coupler bus/radio TR131A. General characteristics of the radio system

Frequency - 868.3 MHz
Range - variable according to the environment - up to 30m indoor, 100m in free air.
Noise measurement is possible with the TX100GB.

RF System

- Maximum number of RF KNX products - 256

For technical details see page 6.37.

TRB210

1 Flush Mounted Dimming Output 200W

For remote control of dimmable lighting.

Power Supply: 230V

Frequency: 868.3MHz

Functions of Output:

- ON/OFF control
- Dimming 0-100%
- LED Indication of each
- 8 Scenes

Features

The Tebis.KNX Domovea visualisation and control system connects the Tebis.KNX bus system with the IP world.

This is provided by the energy efficient Domovea server with modular design, which is housed within the distribution board.

All data on the server can be accessed from any connected Windows® compatible client, whether it be a conventional PC, laptop or wallmounted touch panel. The same functionality can be used as a software solution, without any hardware. Internet access is ensured via the Hager Portal.

Advantages

- Server in modular form
- Able to be updated via USB interfaces
- Intuitive user interface for display and control of:
 - Lighting
 - Blinds and roller shutters
 - Heating control
 - Graphic display of energy consumption

- Connection of IP cameras
- Integrated logic and sequence module
- Worldwide access via the Domovea Internet portal (www.domovea.com)
- iPhone & Android App for local or remote use.

TJA451

Domovea system package

Consists of TJA450 Domovea server with remote access & TGA200 power supply

TX100GB configurator

The TX100GB portable configurator is the tool which programs the desired functions and displays the links between all the products being found in an installation : wire products and/or unidirectional or bi-directional radio system. If the system contains wire products, it is necessary to use the media coupler TR131A. A USB flash drive inserted in TX100GB backs-up all the data relating to a system.

Description of the keys

Description of the keys:

 Screenkeys
Function of each key is indicated on the screen above them, the function changes depending on the screen

- Validates the operation in progress
- Selects the menu
- Validates the entry

- Change the function of the keys on the left (selection of either an input number or a function) return to the previous menu

- Activates the selected output
- Starts the numbering of the outputs of the installation

- Access to the help screens for installation

- Access to menus

Description of the symbols:

-  Battery charge level
-  Output
-  Input
-  Radio product
-  Wire product
-  Preparation of a link
-  Link established
-  Delete a link

Sound

-  A single "beep" indicates a successful operation
- A double "beep" indicates an unsuccessful operation

Expert Tip

There are 2 ways to select a channel :

- Selection of an input by acting on the appliance that control it : push-button, switch or remote control. Selection of an output by acting on the manual control of the output product.

- Selection of the inputs or outputs with TX100GB by their numbers with the help of  keys

Radio system

The TR radio system (to KNX standard) exists in input products, output products and products with combined input/output. They communicate between themselves by using the 868 MHz radio frequency. The products are classified into 2 categories :

- The unidirectional input products : they are only emitters and have only information sent.
- The bidirectional products : they are both emitters and receivers and can thus send and receive information.

These latter ones can also be configured as radio repeaters by TX100GB to increase globally the reliability of the transmission.

Supply of radio system is done, in the following way :

- By 230V mains
- By a battery cell

In an installation containing only radio system, the configuration is done only with TX100GB configuration tool; the media coupler is not used.

The products with combined input/output are pre-programmed; for example for a 2 input products and 1 output or control of roller shutters, the basic functions as for example up/down are preregistered. Only modification of functions, as for example to carry a centralized control, need the use of TX100GB.

Radio range (indicative data) :

- in open field : 100m
- Inside a building : up to 30m

A pure radio system can contain **up to 250 TR products**.

The 868 MHz : a dedicated frequency

The frequency used is 868 MHz. This frequency is harmonized at the European level. There are 2 levels emission power :

- Repeater products : 25mW maximum
- Battery cell products : 10mW maximum

As comparison, a portable telephone emits with a power of around 2000 mW.

It is to be noted that the regulator authorities have specially attributed the band of 868 MHz to building automation and home automation : the occupation or "duty cycle" rate is predefined and thus avoids the saturation problems of the band. The 868 MHz is outside ISM bands and cannot be thus saturated by permanent emissions (headphones for example).

Topology 2 : Tebis radio system

Combined system : Wire + Radio

The combined system needs to put in place a TR131A media coupler to transmit the messages of wire products to the radio system and vice versa.

For systems which contain both wire and radio products, the information given above for topics 1 and 2 remain valid. But you must take into account the following limitations :

- Maximum of 63 products of 250 possible radio systems can communicate with TP wire products.
- Maximum 50 links can be established from the wire part to the radio part.
- 1024 channels are available and distributed in 512 channels of inputs and 512 channels of outputs.

Example :

- 6 output products = 6 channels
- 4 input products = 4 channels
- 2 input radio products = 2 channels

Topology 3 : Mixed Tebis system containing both twisted pair and radio products

Topology and architecture of a system

Each installation consists of input and output products which can be wire or radio.

For wire products, a TXA111 bus supply must be installed.

Media and communication support :

- Wire products : use of the bus cable (2 x 2 x 0,8mm)
- Radio system : the link is done by 868 MHz reserved radio frequency

Topology 1 : Wire installation

Each Tebis product can exchange Information with all other Tebis products connected to the bus cable. Supply of bus is done in continuous 30V DC SELV.

The right side outline gives the maximum lengths of the bus cable with a TXA111 supply.

The following values must not be exceeded :

- Total maximum length : 1000m
- Maximum distance between twisted pair 2 products : 700m
- Maximum distance between supply and a product : 350m

The above data define an EIB line. Each EIB line needs a supply and can have up to 64 communicating products.

Role of the TYF130 line coupler

The line coupler “expand” and put back into form the signals on the bus cable and allow to extend the system. Thanks to the coupler the primary line can be extended up to 3 times.

Maximum limit of an “extended” line:

The diagram on the right shows the maximum limits of the system with 4 supplies and 3 line couplers. The lengths of different elementary lines remain the same but at the end, the following

- Total maximum length : 4 x 1000 m
- Maximum distance between 2 products on the same line : 700 m
- Maximum distance between supply of an elementary line and any product of the same elementary line : 350 m

You can thus install at the maximum $4 \times 64 = 256$ TX products

Role of the TR131A

In the configuration phase of the installation, the TR131A is the interface between the TX products, connected among themselves by the bus cable and TX100GB radio configuration tool.

After putting into service, the TR131A can be withdrawn and reused to configure other systems.

Nevertheless in case of modification of the system or for maintenance needs it will be necessary to reinstall again the media coupler, that is why, **we recommend leaving TR131A in the system.**

Several system architectures can be found :

1. fully wire systems
2. fully radio systems
3. combined wire and radio systems

The topologies corresponding to these 3 types of systems are described below :

Tebis Wire System

Extension of a Tebis system using wire products

You can extend a line and install more than 64 products by using line couplers and additional supplies (maximum 3).

Note: Power supplies do not count as product, but line couplers do.

Description of the system

Tebis is a flexible and functional electrical installation for lighting control, roller shutters and adjustment of the temperature room by room. From the implementation point of view, the main difference in relation to a conventional system is the separation of the control and power.

The controlled loads, for example lighting, roller shutters, controlled sockets, are to the output products, themselves connected to connected upstream protection devices. It is no longer necessary to connect from various 230V switch wires from switches, push buttons, to the controlled loads.

The input products implement the orders of the user (pushbuttons, detectors,...) they are interconnected by a unique bus cable distributed star-shaped or in a continuous loop, or by radio frequencies.

Tebis therefore carries out, the functions required by simple programming and creation of links between input and output products.

The cabling phase of a Tebis system is independent from the programming phase of the functions.

The designing of a system is simplified by allowing a flexible adaptation to customer demands.

Composition of the system

Each installation consists of input products and output products which are interconnected either:

- By bus cable : called also wire link (or cable pair) or twisted pair
- By radio : called also RF link (or radio frequency), in 868 MHz

Several system types may be implemented:

- Completely "bus" wire systems with TX products
- Completely radio systems with TR-TU-TD products
- Combined systems, combined twisted pair and radio products

Configuration and commissioning

For configuration, the TX100GB radio configuration tool and TR131A media coupler are used. The configuration information of the system is safeguarded in a standard USB flash drive, placed in TX100GB.

The configuration can be done very easily with the TX100GB portable radio tool : room by room, product by product or function by function.

System products are used in the following manner for the system type implemented:

Wire system principles

The bus products are supplied by safety very low voltage bus. The configuration needs TX100GB configurator and TR131A media coupler.

After configuration the media coupler can be removed and used for another project but needs to be reinstalled if later modifications are required.

Radio system principles

The radio products are powered by the mains or a battery. The configuration is carried out directly with TX100GB and the radio products (without media coupler).

Combined system (bus+radio) principles

The configuration is carried out with TX100GB and TR131A media coupler. In this case, it is necessary to leave the media coupler in place to ensure communication between wire and radio.

Symbol and Function

Applications	Symbols	Control Type	Control Product
Lighting		Switching on only	Automatic contact or push button, or TXA023, TXA025
		Switching off only	Automatic contact or push button, or TXA023, TXA025

Electrical Connection TXA112, TXA111

TG050 Wind Safety Detector

Composition of the products:

- An anemometer and its fixing support,
- Weatherproof interface box,
- The fixing screws of the box (piercing Δ 6 mm).

Electrical characteristics:

- Supply voltage : 230V 50 Hz,
- Contact type (wind safety) : 230V 4A (protection by slowed 4A fuse)

Functional characteristics:

- Wind speed threshold adjusting : up to 55km/h per potentiometer factory setted 25km/h)
- Reaction time at the threshold excess : 3 seconds (5 seconds max.)
- Wind blocking time : 10 minutes (fixed)

Environment:

- Class II insulation
- IP65 protection index
- Working temperature : -25°C to + 50°C.

Connection:

Capacity : 0.5 to 2.5mm²

Overall size:

- Size of weatherproof box (overall) : 80 x 100 x 52mm
- Centre distance from fixing : 90mm

Working Principle

To exploit the wind safety function with the Tebis.KNX system, it will be necessary to link the contact of the anemometer to an input of the TXA306 module and programme the wind safety link with the configurator. The TG050 wind safety detector is used as protection device for blinds against gusty winds.

If the speed of the wind measured by the anemometer exceeds for 3 consecutive seconds a threshold adjusted by potentiometer, the total assembly of the blinds is launched instantaneously and the blinds are maintained in high position for 10 minutes at the minimum. (other controls become inactive)

If the speed of the wind has weakened sufficiently after 10 minutes, the wind safety is deactivated; the control of the blinds is authorized again.

Technical Specifications

Electrical characteristics

- Supply : 30 V DC bus EIB
- TXA022 : consumption : max. 9,5 mA
- TXA023 : consumption : max. 10 mA

Working characteristics

- Programming capacity : 56 steps to be distributed over the two channels
- Minimum time between 2 steps : 1 minute
- Start precision : 5 1.5 sec / 24h
- Start reserve : lithium battery cell (battery life 5 years)
- The product is placed in home position (display switched off) after 1 minute of voltage absence. It returns to Auto mode immediately on return of the voltage or on pressing on a key.
- Protection index : IP 20

Environment

- Working temperature: -5 to +45 °C
- Storage temperature : -20 to +70 °C

Connection with Cage Terminals

- Flexible : 1 to 6mm²
- Rigid : 1.5 to 10mm²

Reset

- Of the programme: it can be fully reset by simultaneously pressing the 3 bottom keys (←OK & menu). The time and date are maintained.
- Total : by simultaneously pressing on all 5 keys (+, -, menu, ok & ←)
- All the product content is deleted. After a total reset, it is necessary to reset the clock switch to hour and day.

Main Characteristics

- Product delivered set to current hour and day
- Automatic changing of summer / winter time
- Programming key for permanent exemptions for copying or safeguard of the programme
- Programming by day or group of days
- 56 step of program On, Off, 1 sec to 30 mn or dimming
- Permanent manual On or Off (fixed),
- Temporary manual On or Off that can be parametered by configuration tools
- Temporary exemptions On or Off (flashing),
- Vacation mode: forcing On or Off between two dates
- Presence simulation
- Bar chart displaying daily profile
- Possibility of locking the key
- Programmable off-voltage
- DCF synchronization (TXA023 ONLY)
- Possible display of date and hour on the bus

Product presentation

You can go to Auto mode at any time with the menu key. If no action is done for 1 min, the switch returns to Auto mode.

TXA025 Twilight Switch

Function

This product is intended for automatic control of lighting, of shutters and blinds according to the measured light intensity. When set lux level is reached, the order of control is transmitted via the Bus to output modules.

Electrical characteristics

Supply

30 V SELV Bus

- Time delay at the initialisation : 30s
- Adjustment range : 2-200 and 200-2000 lux
- ON / OFF in Manu mode

Environment

- Working temperature : 0 °C to +45 °C
- Storage : -20 °C to +70 °C

Connection

Capacity :

- Flexible : 1² to 6²
- Rigid : 1.5² to 10²

Probe

Use double insulated cable for wiring of the EE003 surface mounted cell or for lengthening the cable of the EE002 flush mounted cell.
Max. distance : 100m

Overall Size

- Size : 2 Modules (35mm)

Several TX Channels

It is possible to adjust a level by photocell switch. The light intensity measurement is carried out by a unique probe connected to a TXA025 which retransmits the value of light intensity to other TXA025 on the system via the EIB Bus.

- 5 Detection lens
- 6 Sensor for light intensity measurement

The output modules TXA204C, TXA206A/B/C et TXA207C have 4, 6 or 10 independent outputs (free of potential) to carry out the following controls :

- ON/OFF
- Time delays ON or OFF of 1 second to 12 hours
- Priority settings start or stop
- Sophisticated time lag switch 1 sec. to 24 hours

In "Auto" mode, the start and stop orders come from the input modules of Tebis.

In "Manual" mode , these controls are accessible by the push-buttons in front of the module (priority setting). These products are configured with tool TX100GB or by ETS Software* *additional functions : heating application with TXA 204C and TXA 206A/B/C/D.

Electrical Connection

TXA204C 4 Outputs

TXA206A/B/C/D 6 Outputs

TXA207C 4 Outputs

Technical Characteristics**Dimmers**

The Tebis dimming offer includes:

- Dimmers with direct output 300, 600 or 1000 W
- Units with 1 or 3 outputs

Dimmers with Direct Output

Completely renewed, this extended range integrates the new design and the quick connect system.

It includes the following products:

- TXA213N : 3 outputs 300 W
- TXA210N : 1 output 600 W
- TXA215 : 1 output 1000 W
- TXA210AN : 1 output 300W

These products allow the direct connection of the incandescent, fluorescent, ELV halogen or LED loads. They adapt automatically with the type of connected load and have an integrated overheating and overload protection.

Other Advantages

- Manual control even when bus is disconnected.
- Mini/maxi level local setting
- Memorizing up to 8 different scene levels of lighting.
- Call of present level by priority setting

Dimmers 1-10 V : TXA211

The module TXA211 is provided for control by output:

- Up to 30 dimmers EV 100 or EV 102,
 - Up to 25 electronic ballasts at 20mA
 - Possibility to memorize up to 3 different scene lighting levels.
- In manual mode, the push-buttons situated on the product allow the priority setting of the outputs when there is supply voltage on the bus.

Dimming Principles

Only one push-button is needed to select a dimming circuit according to following principle :

- 1 brief press = start or stop
- 1 long press = increase or decrease

At each switching on, the dimmer restores the last stored level, except when scenes are called.

The dimming control is also possible with 2 push-buttons:

- 1 push-button for start or increase by short or long press
- 1 push-button for stop or decrease by short or long press

Output module 4 shutters, blinds or curtains TXA223, TXA224, TXA225 and TXA226.

The whole range of the products blinds and shutters is divided into two applications:

- TXA223 and TXA225 modules manage the controls up, down and stop. They are used to control roller shutters, awning blinds, etc.
- TXA224 and TXA226 modules manage the controls up, down, stop, as well as the inclination of slats.

The TXA225 and TXA226 products are used for direct current motor control. The controls UP and DOWN are obtained by polarity reversal.

In "Auto" mode, the movement orders come from the input modules of the Tebis system.

In "Menu" mode, these controls are accessible by the push-buttons in front of the module (priority setting).

Supply	230V 50Hz ± 15%	230V 50Hz ± 15%
Input		2 inputs, potential free
Output	1 shutter output, 6A 230V AC1	1 shutter output, 6A 230V AC1
Maxi. power loss	2W	2W
Min. time between revertive pulsing	600ms	600ms
Radio frequency	868.3 MHz	868.3 MHz
Emission range		
• Inside a building	Max. 30m	
• Open area	Max. 100m	
Working temperature	0°C to +45°C	0°C to +45°C
Storage temperature	-20°C to +70°C	-20°C to +70°C
Degree of Protection	IP30	IP30
Size	48 x 53 x 30mm	48 x 53 x 30mm
Connection Through Cage Terminal		
• Flexible	0.5 to 2.5mm ²	0.5 to 2.5mm ²
• Rigid	0.5 to 2.5mm ²	0.5 to 2.5mm ²

Rolling shutters / blinds

TRB221 : 1 output

TRB521 : 2 inputs / 1 output

Sollysta

Wiring Accessories

Sollysta offers a complete range of wiring solutions for any application.

Specifically designed to inspire confidence, the modern design combines stylish aesthetics and quality without compromising on functionality, reliability or safety. Sollysta is not just good to look at; it protects as well.

White moulded	7.2
Decorative	7.16
Grid	7.34
Metalclad	7.40
IP66	7.46

Sollysta

White moulded

The range of Sollysta wiring accessories is the easiest in the market to install with the shallowest back projection for more cabling space. Behind the faceplate the terminals face in the same direction with lead ins for wiring, backed off screws held captive to prevent loss, wire end stops and clear white labelling off a dark grey background.

The wall switches are the market's first with a neutral loop terminal contained within the accessory. This allows contractors to complete the loop connection in the switch instead of in the ceiling rose. Not only does this reduce cabling and the uncomfortable time spent working at ceiling level, but it also meets the needs of BS7671 since the connections are readily accessible for inspection.

Wall Switches & Dimmers	7.4	Telephone, TV & Data	7.10
Isolator Switches & Socket Outlets	7.5	Euro Frontplates & Modules	7.11
Cooker Control Units & Outlet Plates	7.6	Ceiling Switches, Fan Isolator Switches & Light Switches	7.12

Double Pole Switches	7.8	Part M Wiring Accessories	7.15
Shaver Socket	7.9		

WMPS11

WMPS12W

Wall Switches

- Unique patented loop terminal allows neutral looping at the switch.
- Complies with BS EN 60669-1, a.c. only.
- 'X' rated - No need to derate for fluorescent loads.
- Two way switches can be wired either 1 way or 2 way.
- Clear terminal markings: 1-way L1 2-way L2
- Capacity of each terminal 2 x 4.0mm² conductors.
- For mounting boxes see selection chart on page 7.50.
- For multigang switches use of a 25mm mounting box will provide increased wiring space.
- Supplied with M3.5 x 20mm long fixing screws.

Switch Dimmers

- Stylish flush buttons give easy press action.
- Quick press for on/off.
- Hold button down to dim or brighten light level.
- Leading edge.
- Soft start feature prolongs lamp life.
- Suitable for dimming mains and dimmable transformer extra low voltage lamps.
- Complies with BS EN 60669-2-1 (including BS EN 55015).
- Automatic switch off in event of transformer instability protects the dimmer and the transformer.
- Supplied with M3.5 x 30mm long fixing screws.

WMDR1/400R

Rotary Push Button Dimmers

- Quick press for on/off.
- Rotary dimming control.
- 1 or 2 way switching.
- Supplied with M3.5 x 30mm long fixing screws.
- Suitable for resistive loads e.g. incandescent loads.
- Suitable for mains halogen lamps without the need for derating.
- Not suitable for fluorescent, LED or inductive loads.
- Complies with BS EN 60669-2-1 (excluding clause 26 EMC requirements).
- Also available in our grid range see page 7.38

WMPS3PIF

Isolator Switches

- Complies with BS EN 60669-2-4
- Rated conditional short circuit current (Inc) 1500A tested with Hager MTN110 6kA B curve MCB.
- Capacity of each terminal 2 x 4.0mm² conductors.
- For mounting boxes see selection chart on page 7.50.
- Supplied with M3.5 x 20mm long fixing screws.

WMSS82

Switched Sockets

- Unique patented 3 part safety shutter.
- Complies with BS 1363-2, a.c. only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- All terminal screws grouped in-line and upward facing for ease of installation.
- Clear printed and engraved terminal markings.
- Capacity of each terminal: 5 x 2.5mm² conductors switched; 4 x 2.5mm² unswitched (for other sized conductors see terminal capacities on page 7.51).
- For mounting boxes see selection chart on page 7.50.
- Supplied with M3.5 x 30mm long fixing screws.

WMCC50

Cooker Control Unit

- Complies with BS 4177.
- Switch and socket are double pole.
- Twin earth as standard.
- Available with optional LED indication.
- Main switch is suitable for isolation.
- All terminals are upward facing for ease of installation.
- Clearly printed terminal marking.
- Capacity of terminals 2 x 6.0mm², 1 x 16.0mm².
- For mounting boxes see selection chart on page 7.50.
- Supplied with M3.5 x 30mm long fixing screws.

WMCC50N

WMP2FO

Outlet Plates

- Complies with BS 5733.
- Terminal capacity:
 - 20A 2 x 6.0mm²
 - 45A 2 x 10.0mm² conductors
- 20A plate features 2 separate terminals for each of Line, Neutral and Earth so flexible and fixed wiring do not occupy the same terminal.
- Single screw fast fix cable clamp.
- Supplied with M3.5 x 30mm long fixing screws.
- 45A features large open brass terminals for ease of installation.
- Protective red washer must be used under cable clamp to prevent damage to cable.

13A Switched & Unswitched Fused Connection Units

- Complies with BS 1363-4.
- Cable clamp accommodates up to 1.5mm² flexible cord.
- Single screw fast fix cable clamp.
- Available with LED light indicator in rocker.
- All terminal screws upward facing for ease of installation.
- Clearly printed terminal markings.
- Capacity of each terminal 2 x 6.0 mm² conductors.
- For mounting boxes see selection chart on page 7.50.
- Supplied with M3.5 x 30mm long fixing screws.

For bespoke printing options please see page 7.51.

WMSO100

Shaver Socket

- Complies with BS EN 61558-2-5
- Capacity of each terminal 2 x 2.5mm² conductors.
- Designed for use in bathrooms and shower rooms and incorporates a double wound transformer for an earth free supply.
- Input 230V a.c. output dual voltage 230V a.c. and 115V a.c. outlets.
- Rating 20VA on either voltage.
- Primary circuit protected by a self resetting thermal overload device.
- Insertion of shaver plug automatically switches on the transformer.
- Supplied with M3.5 x 30mm long fixing screws.

Wall Switches - Raised Plate

- Unique patented LOOP terminal to allow Neutral looping at the switch.
- Complies with BS EN 60669-1, a.c only.
- 'X' rated - No need to derate for fluorescent loads.
- Two way switches can be wired either 1 way or 2 way.
- Clear terminal markings: 1-way L1 2-way L2
- Capacity of each terminal 2 x 4.0mm² conductors.
- For mounting boxes see selection chart on page 7.50.
- For multigang switches use of a 25mm mounting box will provide increased wiring space.
- Supplied with M3.5 x 20mm long fixing screws.

Socket Outlets

- Unique patented 3 part safety shutter.
- Complies with BS 1363 Part 2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- All terminal screws grouped in-line and upward facing for ease of installation.
- Clear printed and engraved terminal markings.
- Capacity of each terminal: 5 x 2.5mm² conductors switched; 4 x 2.5mm² unswitched (for other sized conductors see terminal capacities on page 7.51).
- For mounting boxes see selection chart on page 7.50.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

Grid Switches

- Complies with BS EN 606691-1 switches, BS 5733 fuse carrier.
- Shallowest switch modules for ease of installation.
- Modules clip from the front for ease of installation and maintenance.
- Terminal screw can be accessed with modules clipped into frames.
- Frames locate to finished wall level.
- Frames clip to ease alignment for 6 gang and 8 gang applications.

WPPS12W

Metalclad White Wall Switches

- Unique patented LOOP terminal to allow Neutral looping at the switch.
- Complies with BS EN 60669-1, a.c only.
- 'X' rated - No need to derate for fluorescent loads.
- Two way switches can be wired either 1 way or 2 way.
- Clear terminal markings:
 - 1-way L1
 - 2-way L2
- Capacity of each terminal 2 x 4.0mm² conductors.

Metalclad White Socket Outlets

- Unique patented 3 part safety shutter.
- Complies with BS 1363-2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- All terminal screws grouped in-line and upward facing for ease of installation.
- Clear printed and engraved terminal markings.
- Capacity of each terminal:
 - 5 x 2.5mm² conductors switched; 4 x 2.5mm² unswitched (for other sized conductors see terminal capacities on page 7.51).

Sollysta

IP66

Manufactured from a tough, durable thermoplastic, the Sollysta IP66 range is ideal for indoor and outdoor applications where wiring accessories may be vulnerable to the potentially harmful effects of dust or water ingress. The IP66 rating assures total protection from ingress of dust and protection against powerful water jets.

Wall Switches	7.48

WXPPS12

Wall Switches

- Sockets and switches are from the unique and popular Sollysta White Moulded range.
- IP66 rating conforms to BS EN 60529 : 1992.
- Functional products tested and certified to appropriate British Standards.
- Robust and rugged enclosures designed to withstand the elements.
- Unique double hinge allows lid to fully open through 180 degrees.
- Fixing point for padlock.
- Cable entries:
90 x 90 = 4x20, 1x20 & 1x25
103 x 116.5 = 4x20, 1x20 & 1x25
164 x 116.5 = 6x20, 1x20 & 1x25

The Ingress Protection (IP) for all low voltage enclosures up to 1000 V a.c. and 1500 V d.c. is defined in identical fashion by the standards EN 60529 - IEC 529 it comprises the letters IP followed by two character numerals and or additional/supplementary letters.

The first character numeral indicates the degree of protection provided by the enclosure against access to hazardous parts by preventing or limiting the ingress of a part of the human body or an object held by a person and ingress of solid foreign objects.

The first character numeral:

Protection against foreign objects

IP	Description	
0		Non-protected
1		Protected against solid objects $\geq$ than 50mm
2		Protected against solid objects $\geq$ than 12.5mm
3		Protected against solid objects $\geq$ than 2.5mm
4		Protected against solid objects $\geq$ than 1.0mm
5		Dust-protected
6		Dust-tight

Additional letter (in option)

Protection of people against access to hazardous parts

	Description
A	Protected against access to hazardous parts with the back of the hand
B	Protected against access to hazardous parts with a finger
C	Protected against access to hazardous parts with a tool - $\varnothing$ 2.5mm
D	Protected against access to hazardous parts with a wire - $\varnothing$ 1mm

The second character numeral indicates the degree of protection provided by the enclosure with respect to harmful effects on the equipment due to the ingress of water. An X signifies that the tests are not applicable to the product.

The second character numeral:

Protection against ingress of water with harmful effects

IP	Description	
0		Non-protected
1		Protected against vertically falling water drops
2		Protected against vertically falling water drops when enclosure tilted up to 15°
3		Protected against spraying water
4		Protected against splashing water
5		Protected against water jets
6		Protected against powerful water jets
7		Protected against the effect of temporary immersion in water
8		Protected against continuous immersion in water

Printed Products

Many of our Sollysta wiring accessories are available with printed options, such as Washing Machine, Dishwasher etc.

For a full list of products generally available from stock please go to www.hager.co.uk/printedproducts

We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

Junction Boxes & Ceiling Accessories

Including the award winning downlighter junction box, maintenance free junction box and traditional junction boxes.

Also includes our safety lampholders and pendants. Designed to make life easier for you. When the lamp is removed from the lamp holder body the power is automatically disconnected at the contacts; ensuring that there is no risk of access to live parts.

Downlighter Junction Box	8.2
Traditional Junction Boxes	8.3
Safety Lampholders	8.4
Safety Pendant Sets	8.5
Ceiling Accessories	8.6

- Complies with BS EN 60670-22.
- Fits through a 58mm diameter hole.
- Cable clamps to prevent strain on terminations.
- 3 plate terminal style with captive terminal screws.
- Separate terminals for flexible cords.
- Junction box selection chart see page 8.7.

J501

Downlighter Junction Box

Junction box complete with incoming and outgoing cable clamps. Three plate terminals with separate terminals for flexible cords.

Current Rating	Dimensions h x w x d (mm)	Terminal capacity (mm ²)	Pack qty.	Cat Ref.
16 Amp	122 x 53 x 27	3 x 3 x 1.5mm ² 1 x 2 x 1.5mm ²	10	J501

Maintenance Free Junction Boxes

- Comply with BS EN 60670-22.
- Suitable for use in 'inaccessible' areas.
- Spring fit terminals do not relax over time.
- Four separate cable terminations per connector.
- Junction box selection chart see page 8.7.

J804

Maintenance Free Junction Box

Junction box complete with incoming and outgoing cable clamps.

Current Rating	Dimensions h x w x d (mm)	Terminal capacity (mm ²)	Pack qty.	Cat Ref.
32 Amp - 3 Terminals	140 x 65 x 30	3 x 4 x (0.5-4.0)	10	J803
20 Amp - 4 Terminals	140 x 65 x 30	4 x 4 x (0.5-4.0)	10	J804

- Complies with BS EN 60670-22.
- Slot terminals are ideal for taking spurs off uncut ring or loop circuit cables.
- Solid machined brass terminals.
- Junction box covers secured by single centre screws (apart from J701 which has two screws).
- J701 and J701/TB junction / adaptable box will accept 16mm x 16mm and /or 16mm x 25mm mini-trunking.
- Junction box selection chart see page 8.7.

J201

Knockout Slot Terminal Junction Box

Description	Dimensions dia x h (mm)	Fixing centres (mm)	Terminal capacity (mm ²)	Pack qty.	Cat ref.
20 Amp, 4 Terminal, Brown	59 x 25	50.8	3 x 1.5	10	J201

J601

Selective Entry Slot Terminal Junction Boxes

Description	Dimensions dia x h (mm)	Fixing centres (mm)	Terminal capacity (mm ²)	Pack qty.	Cat ref.
20 Amp, 4 Terminal, Brown	79 x 26	50.8	3 x 1.5	10	J301
30 Amp, 3 Terminal, Brown	89 x 32	50.8	4 x 2.5	10	J401
20 Amp, 6 Terminal, Brown	89 x 26	50.8	3 x 1.5	10	J601

J701/TB

Junction / Adaptable Box

Description	Dimensions h x w x d (mm)	Terminal capacity (mm ²)	Pack qty.	Cat ref.
No terminals	122 x 156 x 32	-	10	J701
With terminal block, cable ties, and related wiring card	122 x 156 x 32	4 x 1.5	10	J701/TB

- Complies with BS EN 7895.
- T2 = heat resistance rating (210°C).
- Automatically disconnect power at the contacts when the lamp is removed.
- 50.8mm fixing centres for non-access versions. Use with mounting blocks MB326E/MT.
- Solid brass plungers and copper plated steel springs maintain plunger pressure throughout their long life.
- Body angle of angled batters set at 30°.
- Access lampholders have integral RL624 ceiling rose base and heat resisting PVC tails.
- All pendants incorporate automatic cord grips and sleeve caps for ease of flexible cord stripping.

SEL212

Bayonet Cap Cord Grip Lampholders

Description	Pack qty.	Cat ref.
Safety Cord Grip Lampholders - Short Skirt	20	SEL212
Safety Cord Grip Lampholders - Home Office Shield	20	SEL214

SEL354

Safety Straight Batten Lampholder

Description	Pack qty.	Cat ref.
Three Terminal - Home Office Shield	20	SEL354

SEL96T

Safety Access Batten Lampholder

Description	Pack qty.	Cat ref.
Straight 2 Terminal Body, 3 Terminal and Earth Base - Home Office Shield	10	SEL96T
Angled 2 Terminal Body, 3 Terminal and Earth Base - Home Office Shield	10	SEL106T

- Pendant set complies with BS EN 60598-1.
- Capacity of each terminal: 3 x 1.00mm² conductor
- Common base with 'access' batten lampholders.
- Barriers between terminals.
- Flexible pendant cord restraining hooks.
- Fixing centres 50.8mm.
- Feet on base to aid mounting on uneven surfaces.
- 3 separate knockouts accept 1, 2 or 3 x 1.5mm² conductors.
- Optional halo RL602 (see page 8.6).

624SEL212/6

Pendant Sets with Access Ceiling Rose

Description	Pack qty.	Cat ref.

Lighting Connection & Control

Our range of Klik range of 4 and 7 pin products offer a wide range of lighting connection and control solutions such as lighting distribution, occupancy sensor control, lighting control module functionality and the ability to connect to a central lighting control system.

Klik 4 pin	9.2
Klik 7 pin	9.10
Controls	9.18

Klik 4 pin

Lighting Distribution System

With the Klik connector, luminaires can be plugged in seconds, with absolute safety and without circuit isolation. The secure mechanical and electrical connection gives complete confidence in the systems integrity.

Today there is pressure on all areas of construction is to reduce costs. The installation speed of Klik makes a significant contribution to both the on-site wiring and on-going maintenance costs, whether from a single outlet PCR or a multi-outlet marshalling box.

Marshalling Boxes	9.4
Occupancy Sensors	9.4
Plug-In Ceiling Roses & Covers	9.5
Pre-Wired Plug-In Ceiling Roses & Covers	9.6
Plugs	9.7
Pre-Wired Plugs	9.8
Socket Outlets & Mounting Boxes	9.9

KLDS4

KLDS8

KLDS12

Marshalling Boxes

Klik marshalling boxes are used in conjunction with Klik 3 and 4 pin plugs to connect luminaires within an area. The Klik marshalling box can be separated into two independently switched circuits. These circuits can be controlled via wall switch or occupancy sensor.

- Complies with BS 5733
- Main terminal rating 16 Amps
- Socket outlet rating 6 Amps
- Separate terminals for flexible conductors, rating 10 Amps
- Socket outlets accept either Klik lighting (3 pin) plugs, Klik auxiliary (4 pin) plugs or Klik pre-wired leads
- Short circuit tested 1500A conditional rating

Description	Pack qty.	Cat ref.
4 Way Klik Lighting Distribution Unit	1	KLDS4
6 Way Klik Lighting Distribution Unit	1	KLDS6
8 Way Klik Lighting Distribution Unit	1	KLDS8
10 Way Klik Lighting Distribution Unit	1	KLDS10
12 Way Klik Lighting Distribution Unit	1	KLDS12

Occupancy Sensors

EEK510B

Hager occupancy sensors come complete with integral photocell and the facility for wall switch override.

- Can be programmed for presence or absence
- Range 7m diameter for large movements, 5m diameter for small movements
- Factory presets, lux = 400, time = 20 min, presence detection
- EEK001 programming tool is easy to use with 2 memory settings to enable repeatability
- EEK002 remote control comes with a wall mounting bracket for storage and allows room occupant to have control of lighting output

EEK001

Description	Pack qty.	Cat ref.
Standard Occupancy Sensor, Pre-Wired 3m	1	EEK513W
Standard Occupancy Sensor (without cable)	1	EEK510B
Surface Mount Kit	1	EEK005
Programming Tool	1	EEK001
Remote Control	1	EEK002
Long Range/ Corridor Occupancy Sensor	1	KLOS6LR

PCR2000

3 Pin Plug-In Ceiling Rose & Cover

The 6A plug-in ceiling rose is used to offer a pluggable connection for luminaires. The luminaire can be connected and disconnected under load.

- Complies with BS 6972 and BS 5733:2010
- Sockets have 4 terminations: line, neutral, earth and loop-in

- Plugs have 3 terminations: line, neutral and CPC
- Fixing: 50.8mm Standard Diagonal (BESA)

Description	Pack qty.	Cat ref.
3 Pin Plug-in Ceiling Rose White	10	PCR2000

CR64AX/R

4 Pin (including Auxiliary) Plug-In Ceiling Rose & Cover

Klik 6A pre-wired plug-in ceiling roses are used to connect luminaires to a fixed wiring installation. Auxiliary contact available, a typical use is for emergency lighting.

- Complies with BS 6972 and BS 5733
- PVC flexible cord complies with BS EN 50525-2-11
- Low smoke zero halogen flexible cord, complies with BS EN 50525-3-11

- All leads have prepared ends
- Sockets have 5 terminations: line, neutral, CPC, auxiliary and loop-in
- Plugs have 4 terminations: line, neutral, CPC and auxiliary

P22

3 Pin Plug

Klik 3 pin plugs are used to connect into a Klik socket giving a pluggable connection to luminaires.

- Complies with BS 6972 and BS 5733
- Suitable for use with any Klik 3 or 4 pin socket

- P22 plug is supplied in a plug-in ceiling rose, cat ref. PCR2000
- Plugs have 3 terminations: line, neutral and CPC

Warning

Plugs must not be fitted on the supply side of any installation - they must be connected to the load / fitting / appliance side of the installation.

Description	Pack qty.	Cat ref.
3 Pin Plug White	10	P22

P64AX/R

4 Pin (including Auxiliary) Plug

Klik plugs with auxiliary pin are used to connect into the Klik sockets giving a pluggable connection to luminaires.

- Complies with BS 6972 and BS 5733
- Suitable for use with any Klik 3 or 4 pin sockets

- P64AX plug is supplied in a plug-in ceiling rose, Cat. ref. CR64AX
- Plugs have 4 terminations: line, neutral, CPC and auxiliary

Warning

Plugs must not be fitted on the supply side of any installation - they must be connected to the load / fitting / appliance side of the installation.

S27

3 Pin Plug Socket Outlets

6A socket outlets are used in conjunction with 6A plugs to provide a pluggable connection to luminaires.

- Complies with BS 6972 and BS 5733

- Suitable for use with standard Klik 3 pin plug
- S27 socket is supplied in plug-in ceiling rose, Cat. Ref. PCR2000
- S27 socket will accept A1

cover

- S26/TC socket is an S26 architrave socket pre-assembled with a trunking clamp

Description	Pack qty.	Cat ref.
Ultra Flush Socket White	10	S21
Architrave Socket White	10	S26
Architrave Socket comes with Trunking Clamp	10	S26/TC
3 Pin Round Socket White	10	S27
Ultra Flush Round Socket White	10	S28

S64AX

4 Pin (including Auxiliary) Plug Socket Outlets

Klik.AX 6A socket outlets are used in conjunction with Klik auxiliary 6A plugs to provide a pluggable connection to luminaires.

- Complies with BS 6972 and BS 5733
- Suitable for use with standard

Klik 4 pin plug

- S27 socket is supplied in plug-in ceiling rose, Cat. Ref. PCR2000
- S27 socket will accept A1 cover
- S26/TC socket is an S26 architrave socket pre-

assembled with a trunking clamp

- All sockets have 5 terminations: line, neutral, CPC, auxiliary and loop-in
- Can be used with Klik 3 or 4 pin plug

Klik 7 pin

Secure connection system

Klik 7 pin can be used as a simple stand-alone digital lighting control unit or as part of a more complex building management system.

The Klik 7 pin range of unique plug and play connectors has been enhanced with a choice of products ideal for electrical contractors who want to add digital lighting control solutions to their offer.

Lighting Marshalling Boxes	9.12
Occupancy Sensors	9.12
Lighting Control Module	9.13
Link Leads	9.14
Luminaire Leads	9.14
Connectors, Ceiling Rose & Sockets	9.16
Switch Drop Leads	9.17

KLMB4W

Lighting Marshalling Boxes

The KLMB marshalling box allows the connection and control of multiple luminaires. The marshalling box utilises a robust extruded aluminium body.

- 7 Pole
- 4, 6, 8, 10, 12 outlet (Wire-in)
- 5, 7, 9, 11 outlet (Plug-in)
- 16A Rated
- BS 5733

- Short circuit tested: 1500A conditional rating

Occupancy Sensors

EEK513P

Hager occupancy sensors come complete with integral photocell and the facility for wall switch override.

- Can be programmed for presence or absence
- Range 7m diameter for large movements, 5m diameter for small movements
- Factory presets, lux = 400, time = 20 min, presence detection
- EEK001 programming tool is easy to use with 2 memory settings to enable repeatability
- EEK002 remote control comes with a wall mounting bracket for storage and allows room occupant to have control of lighting output

Standard & Digital Occupancy Sensors

KLCM413W

Lighting Control Module with KlikLink

The KLCM allows connection and control of multiple luminaires with four separate channels.

- Switching
- Dimming (DSI & DALI)
- Corridor hold
- Partition switching
- Daylight switching & dimming
- Scene settings

- Integral emergency test times
 - Reset profiles
 - Light level offset (channel to channel)
- See page 9.40-9.41 for more information

Controls

Lighting controls

Today's buildings need an efficient and seamless electrical solution. Our LED Lighting and Occupancy sensors range have been designed to complement and enhance your lighting control system.

Energy efficiency is an important factor for today's businesses. Our LED wall-lights provide energy saving with integrated PIR motion detection, whilst our ceiling mounted occupancy sensors are equipped with intelligent control technology, easily identifying when lighting is required.

Occupancy Sensors	9.20
Lighting	9.21

EE810

Presence Detector

The EE810 is a one-channel occupancy sensor & the EE811 is a two channel occupancy sensor designed to detect low amplitude movements (e.g. worker sitting at a desk). Detection is achieved using

2 pyroelectric sensors, each located under a detection lens. The sensors measure the brightness in the room on a continuous basis and compare it against the level preset by means of potentiometer.

The head of the detectors are directional at 90° and can be used to adjust the detection area according to the room configuration.

Presence Detector - Ceiling Mounted

Presence detector 360° 1 channel

Presence detector 360° 2 channel

Cat ref.

EE810

EE811

EE880

Corridor Motion Sensor

The EE880 corridor occupancy sensor is sensitive to infrared radiation emitted as heat from a moving body. The detector switches on the load connected to it when a heat-emitting body

moves within in its detection area.

The load remains lit for the period of time to which the detector has been set and until

it no longer detects movement in its surveillance area. This detector has been specially designed to meet the needs of corridors.

Corridor Motion Detector - Ceiling Mounted

IR corridor motion detector

Cat ref.

EE880

EE883

High Frequency Detector

The EE883 is a ceiling-mounted motion detector, active over 360°.

The detector employs Hyper Frequency technology and reacts to movements regardless of the temperature.

It can detect movements through doors, windows and even non-metallic low-thickness partitions.

High Frequency Detector - Ceiling Mounted

Circulation sensor high frequency

Klik Project Service

One of the characteristics of prefabricated wiring systems is that they are bespoke and made for a particular project. The product range is complemented by our specially developed Klik 7 pin service offer.

Sales

Highly trained, with an in depth technical understanding of Klik, the engineers are able to discuss in detail both the pluggability and control options available to the designer/consultant for the project.

Klik training

Klik project installations are carried out by electrical contractors who have been trained to the relevant level of competence. We will continually provide training to contractors from basic level through to advanced commissioning level. Our Klik project partners will have access to dedicated technical information and support from our technical engineers.

Design and quotation

Our design and quotation team use a dedicated software package to produce a fully marked up lighting distribution design layer drawing showing positions of products and cable runs. Volt drop and Z_s calculations for the system based on design length and cross sectional area. A comprehensive product list, presented in your format, by room, area or floor. A quotation in the format you require and finally a schedule of circuits with all necessary information already completed.

Once your quote has been sent to you we will contact you to ascertain it has been received, is clear, and meets your requirements. At this stage we will add to, or change the design as necessary to meet any changes to specification.

Order process

Once the order has been received our system will break it down to sub-orders to match the delivery schedule and products required by room or area. You will receive an order and delivery schedule confirmation.

Delivery and logistics

A dedicated team will fulfil the orders as required for dispatch direct to site. The Klik 7 pin components will be grouped to the customers requirements.

Technical support and commissioning

A dedicated team of Technical Support Engineers are on hand to assist with any system issues arising during installation. Most Klik 7 pin products will be easily setup on site by installers. However, some of the more in-depth control systems may require commissioning, we can quote for this service as part of the project.

To learn more about our Klik Project Service offering, please contact us:

Cables for Klik Plugs

	0.75mm ² PVC / LSF 3 Core	0.75mm ² PVC / LSF 4 Core	1.0mm ² PVC / LSF 3 Core	1.0mm ² PVC / LSF 4 Core
P22	Y	-	Y	-
P64AX	Y	Y	Y	Y

Application Notes

The mating face of each interface module must be mounted 0.1mm minimum proud of its proposed surround. Engaged plug sits centrally on socket but a minimum of 12mm extra clearance should be maintained north of the upper load grip to allow plug travel.

1. Strip cable as above -
Note: Trim cable tails to
double over for better
terminal contact.

2. Remove plug cover.

3. Pass cable through plug cover
centre hole.

4. Terminate conductors into
terminals.

5. Push outer sheath of cable
firmly into jaws of sheath grip,
making sure that at least 2mm
of sheath protrudes below the
grip.

6. Refit cover.

Klik Mounting Box Installation

Cable entry through spout in base of box for maximum wiring space.

MB2 knockouts in base and sides. Supplied with M4 x 20mm long
fixing screws.

Flush Mounting for Solid Walls

Cat No. S21

Mounting Methods

- Hanging from ceiling
suspension system with
Caddy Clips™
- Direct fixing to lighting
trunking
- Direct fixing to ceiling or wall
with No. 8 screws

Settings EEK513W/EEK515W

Wiring diagram EEK510B (no cable supplied)

EEK513W (Cable supplied connected to OS)

Mounting

The acknowledgment LED blinks during the sending of the IR message.

Technical specification
Power supply: 1x 3V CR2032
Shelf life of battery: 2½ years
Protection index: IP 30

Use

The remote control allows the user to set or modify presence detector settings. When the potentiometer is on auto test it allows single and multiple settings.

The SET key is used to send the IR messages to the occupancy sensors. Multiple settings can be stored in Memo 1 and Memo 2 and re-called to set several devices.

Single setting

Example: reset

Multiple settings

Define the parameters to be changed and press SET to send.

Example: for 25 minutes and corridor use, press 20', 5' and corridor.

In the case of 2 opposite states the green LED denotes ON and red LED denotes OFF (except Presence / Absence).

When no function is selected all LED's are OFF.

Settings available

Key	Meaning	Indication	Function
	Presence	Green LED on	Presence on (automation mode)
	Absence	Red LED on	Absence on (semi automatic mode)
	Power Up	Green LED on	The light is automatically switched on for 30 seconds after power up
		Red LED on	During warm up phase, the light output is off
Reset	Reset	LED on	To return to factory settings (Lux = 400, time = 20 min, presence on, power up off and cell active)
Test	Test	LED on	To validate the detection area
	Time	LED on	To set the time It is possible to add times together e.g. press 2' and 5' for a time value of 7'
	Day level 1000 Lux	LED on	To set the value to 1000 Lux
	Learn	LED on	To learn the current Lux level
	Corridor 200 Lux	LED on	To set the value to 200 Lux
	Office 400 Lux	LED on	To set the value to 400 Lux
+	Lux +	LED on	To increase the Lux level (+100)
-	Lux -	LED on	To decrease the Lux level (-100)
	Active cell	Green LED on	The light is continuously measured
	Passive cell	RED LED on	The sensor will not switch the light off even if the ambient luminosity is sufficient
Memo and set Key			
Memo 1	Press	LED is on until a setting is changed	To load/unload Memo 1
	Long press	LED is on for 5s, then will blink until released. After release, the LED goes off in case of setting change	To save the current setting as Memo 1
Memo 2	Press	LED is on until a setting is changed	To load/unload Memo 2
	Long press	LED is on for 5s, then will blink until released. After release, the LED goes off in case of setting change	To save the current setting as Memo 2
SET	Short press (<5s)	LED flashes	To send an IR message of the current setting
	Long press (>5s but <10s) only available if no setting active	LED blinks until release press	To toggle automatic mode on DALI/DSI

Use
The remote control allows the user to set or modify settings on the presence detectors EEK513W and EEK510B.
Each button corresponds to a command.

Technical specification
Power supply: 1x 3V CR2032
Shelf life of battery: 3½ years

Excluding classes 10.1 & 10.3 are to aluminium enclosures

Mounting Options for Drop Rod

Option 1.

Klik 7 Pin LMB features open ends to allow you to slide the box into position before tightening for easier installation, or push the box up on to the nut and rotate to locate and tighten to secure.

Option 2.

Single sided LMB can be mounted from the top as option 1 or from the rear as shown. Note: Double sided LMBs can only be mounted with option 1.

Mounting Options for Wall & Ceiling

Klik 7 Pin LMB includes the Klik mounting accessory, this makes it much easier to mount LMB with Nail Guns or traditional fixings. 2 accessories are included with each LMB. Mounting Accessory can be clipped into the rear or top channel slot. It can be easily removed by inserting a screwdriver in the RELEASE slot.

Note: Double sided LMB can only be mounted on top channel slot.

Screw mounting tabs (x4)

Mounting Options for Trunking

Mounting Accessory can be clipped into the rear or top channel slot. It can be easily removed by inserting a screwdriver in the RELEASE slot.

Use a machine screw and nut to secure to trunking using Mounting Accessory

Fixed Wiring Connection

Klik 7 Pin LMB has 7 screw terminals available to the installer and are arranged in the end cap as per diagram. DA+/DA- connections can be used for DALI/DSI control.

Making a Connection

To connect, locate plug in socket and push down to connect and lock

To disconnect, press button to unlock and push up to remove.

Plug type is identifiable by the colour of the button

White: Luminaire Lead
Red: Luminaire & Emergency
Black: Link Lead

LCM Functions (via the KlikLink App)

Lighting Configuration Profiles.

The KLCM KlikLink App is pre-loaded with the most common room type configuration profiles. These are selected in the File Manager section of the KlikLink App and are provided to speed up the LCM set-up.

Switching - On/Off.

Each channel is capable of being switched via one of 4 switch inputs. This is an on/ off state utilised for standard luminaires.

Presence and Absence Sensing.

Each output channel can be set to Presence or Absence and can be different on each channel. Absence detection will give the best energy efficiencies by minimising unwanted activations, whilst Presence gives an immediate response to occupation in an area.

Sensor with integral lux sensor.

This allows daylight dimming and switch utilising any natural light available

Dimming – DSI, DALI (Broadcast).

The LCM takes information from the sensor and broadcasts a signal on the required channel to all connected luminaires and can be controlled via a retractive wall switch or utilising the daylight dimming function. The protocol for this broadcast is selected during programming.

Scene Setting.

4 lighting scenes are possible (plus global Up/Down-On/Off) and can be achieved with via centre off 2 pole retractive grid switch modules (3 grid modules to control all inputs) The LCM can be configured during programming to have 2 separate Scene profiles.

Partition Switch Function.

This allows the control of a room with a partition and switch fitted. If a partitioned room has individual wall switches controlling each section, when the partition is removed, both sets of switches could control the whole area. This can be used in conjunction with profiles.

Corridor Hold Function.

This is achieved by linking a series of LCMs together with an RJ45 lead and assigning certain channels with the attributes of a corridor. If there is any area occupied, the associated corridor lighting will be held ON.

Variable burn in up to 250 hrs.

Allows dimmable luminaires to be set at 100% output for the required burn in time period (Dimming is disabled during this period) This may be beneficial to the life of the lamps. After the burn in time, the LCM will return to any programmes set (e.g. dimming)

Integral Emergency Test Timers.

This allows the emergency test to be carried out via an emergency test switch. The timers can be set for up to 5 hours within the App. Whilst on test the other luminaires will dim to a pre-set value.

Light Level Offset between Channels.

This function allows the levels from different channels to set as a percentage of the lead channel. For example when a number of different dimming levels are set within an area as a scene set, the lighting levels can be adjusted universally across all channels, whilst maintaining the relationship between channels.

3 Level Timeout.

Allows the lighting to turn Off or Down in three stages. When no presence has been detected for the timeout period, the lighting can be turned down to the first set level, after a further period the lighting can be reduced further, after the final time period the luminaires can be turned off or driven to a minimum value set during programming.

check.hager

Counterfeiting: a plague gaining ground...

The counterfeiting of products is gaining ground throughout the world. In 2002 counterfeiting represented 7% of the world's trade, this has now risen to 10%. Counterfeiting does not only concern luxury items, but also covers electrical products where people's safety is endangered!

Counterfeit products do not bring any guarantee of safety or quality for our customers. These products can be dangerous, contain inappropriate materials or be of poor quality. In certain cases only the external appearance is preserved and the vital functions are removed to reduce the costs!

Let's act together!

1

Authentication Process

All of our circuit breakers, switches and earth leakage circuit breakers have been assigned a unique identification number which can be located on the side of the product. The identification number from each product is then stored in a protected data base. If it doesn't have a number please contact us immediately.

2

Dedicated Website

Our customers can access this database to check the authenticity of a Hager product by going to <https://check.hager.com>. The website will check the validity of the identification number on the product and confirm if the product is an authentic Hager product or a suspected counterfeit product, this result will be immediate.

3

Action Plan

Check the identification number by going to <https://check.hager.com>. If check.hager.com identifies the product as a counterfeit contact Hager on 01952 675612 along with the details of the wholesaler from which the product was purchased. We will then take all the appropriate information and collect the product for analysis. If necessary we will take appropriate legal action.

4

Ethical Charter

As a manufacturer we commit to:

- Provide our customers with the means to check the authenticity of our products.
- To communicate the results of any investigations.

Our distributors commit:

- To make sure that products purchased are not counterfeit products.
- To inform the manufacturers of any offers of counterfeit products.
- To support the actions of Manufacturers.

To ensure customers can check the authenticity of our products we have set up a simple and rapid procedure called:

<https://check.hager.com>

Check hager is a detection weapon to fight against counterfeiting.

Every circuit breaker, switch and earth leakage circuit breaker has a sole identification number recorded by Hager in our database.

Worldwide access to <https://check.hager.com> by any customer provides a quick and easy way of establishing the authenticity of products.

The information is in real time.

[illegible]

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

1. In these Terms the following expressions shall have the following meanings:
 - 1.1 "Buyer" the purchaser of the Goods from the Seller.
 - 1.2 "Seller" Hager Limited.
 - 1.3 "Contract" the contract for the sale and purchase of the Goods made pursuant to these Terms.
 - 1.4 "Delivery" delivery of the Goods in accordance with these Terms.
 - 1.5 "Delivery Address" the location for Delivery agreed by the Seller and the Buyer (save where it is agreed that the Buyer shall collect the Goods from the Seller's premises).
 - 1.6 "Delivery Date" the date for Delivery agreed by the Seller and the Buyer.
 - 1.7 "Force Majeure" any circumstances beyond the reasonable control of the Seller.
 - 1.8 "Goods" the products which the Seller has agreed to supply to the Buyer pursuant to these Terms.
 - 1.9 "Loss" all actions claims demands losses (direct, indirect, consequential or otherwise) expenses costs actions and proceedings.
 - 1.10 "Payment Terms" the terms of payment in respect of the Price (and where relevant any delivery order or handling charges) which unless otherwise agreed by the Buyer and the Seller shall require payment not later than the last day of the month following that in which the Seller notifies the Buyer that the Goods are ready for despatch or have been dispatched.
 - 1.11 "Price" the price of the Goods as set out in the Seller's current price list at the date of despatch.
 - 1.12 "Quotation" includes any quotation, estimate, or tender given or made by the Seller.
 - 1.13 "Terms" the terms and conditions set out herein including any special terms and conditions agreed in writing by the Seller and the Buyer.
 - 1.14 "Product Lifetime" is the reasonable lifetime of a wiring accessory product in this catalogue and is taken to be 25 years from the date of manufacture.
2. All orders are accepted and all contracts are made subject to the Terms which shall prevail and be effective notwithstanding any variations or additions contained in any order or other document submitted by the Buyer including without limitation any standard conditions of purchase of the Buyer. No modification, of these Terms shall be binding upon the Seller unless made in writing by a duly authorised employee of the Seller.
3. A Quotation does not constitute an offer by the Seller to supply Goods and every acceptance of any Quotation by the Buyer shall be deemed an offer by the Buyer to purchase Goods from the Seller and will not be binding on the Seller until the Seller has given written acknowledgement or acceptance of such order.
4. The Seller reserves the right by giving notice to the Buyer at any time before Delivery to increase the price of the Goods or any installment of the Goods to reflect any increase in their cost of production, delivery, provision or otherwise which is due to Force Majeure, including but not by way of limitation any fluctuations in the cost of raw materials.
5. Unless otherwise agreed by the Buyer and the Seller, the Price shall be for Delivery to the Delivery Address. The Price shall include carriage and transit insurance costs to the Delivery Address. The Price is exclusive of any VAT (which will be applied in accordance with the legislation in force at the tax point date) for which the Buyer will be additionally liable.
6. In addition to the price, an order charge of £10 shall be payable by the buyer on orders under the value of £250 (per order number). The Seller reserves the right to charge the Buyer a reasonable handling charge for special deliveries made at the Buyer's request.
7. The Seller shall be entitled to send the invoice for the Goods to the Buyer immediately the Goods have been dispatched or when they are ready for despatch but are prevented or delayed from being dispatched due to Force Majeure.
8. The Buyer shall pay the Price plus any VAT strictly in accordance with the Payment Terms. The Seller will afford the Buyer a 2.5% discount on the Price if payment is made on or before the due date. Non-compliance with the Seller's terms of payment shall constitute default without reminder. In case of default the Seller may without prejudice to any other of its rights under these Terms charge interest to accrue on a daily basis at the rate of 3% per month from the date upon which payment falls due to the actual date of payment such interest to be paid monthly. Except where insolvency laws provide otherwise the Buyer shall not be entitled to withhold or set off payment for Goods for any reason whatsoever.
9. If the Buyer shall fail to fulfil the Payment Terms in respect of any invoice of the Seller the Seller may demand payment of all outstanding balances from the Buyer whether due or not and/or cancel all outstanding orders and/or decline to make further deliveries except upon receipt of cash or satisfactory securities.
10. In addition to any right or lien to which the Seller may by law be entitled the Seller shall in the event of the Buyer's insolvency or the Buyer failing to render payment for any Goods supplied by the Seller when due be entitled to a general lien on all goods of the Buyer in the Seller's possession for the unpaid price of any Goods sold and delivered by the Seller under the same or any other contract.
11. In addition and without prejudice to its other rights the Seller may on 14 days notice to the Buyer sell any goods of the Buyer on which the Seller has a lien and shall be deemed the Buyer's agent for the purposes of effecting such sale. The Seller may apply the proceeds of sale towards the satisfaction of sums due from the Buyer without prejudice to the Seller's right to recover the balance thereof from the Buyer.
12. Any date or period set out in a Quotation or the Seller's acceptance of order or which is otherwise agreed by the Seller and the Buyer for the delivery of the Goods or any part of them is approximate only and time shall not be of the essence of such delivery. If the Seller is prevented from delivering any Goods at the time provided for delivery by reason of Force Majeure then the period for delivery shall in any event be extended by the time lost due to such Force Majeure.
13. Delivery shall be made by the Seller supplying the Goods to the Delivery Address and the Buyer shall be responsible for the unloading of the Goods at the Delivery Address and the cost thereof. Where the Seller and the Buyer agree in writing that the Buyer shall collect the Goods from the Seller's premises the Buyer shall arrange at its expense unless otherwise agreed in writing for the carriage of the Goods (including cost of insurance in transit) and the Goods shall be deemed to have been delivered upon their loading upon the carrier and for the purpose of these Terms "Delivery" shall be construed accordingly.
14. Should the Buyer fail to take Delivery on or before the Delivery Date the Seller shall be entitled:
 - 14.1 If it has not already done so to invoice such Goods forthwith and to take the invoice into account;
 - 14.2 To treat the Contract as repudiated by the Buyer and without prejudice to any other right it may have against the Buyer the Seller shall be entitled to resell the Goods and shall be entitled to be indemnified by the Buyer for any Loss which it suffers.
15. The Seller reserves the right to deliver the Goods by installments and where it does so each delivery shall constitute a separate contract and any failure by the Seller to deliver any one or more of the installments in accordance with these Terms or any claim by the Buyer in respect of any one or more installments shall not entitle the Buyer to treat the Contract as a whole as repudiated.
16. The Buyer shall store and transport the Goods in conditions that will preserve the Goods in good condition. The Buyer shall comply with all reasonable requests made by the Seller with regard to the conditions in which the Goods are to be stored and transported.
17. Packing cases and cartons in which the Goods are supplied are non-returnable and provided free of charge.
- 18.18.1 If the Goods are to be manufactured by the Seller in accordance with a specification submitted by the Buyer, the Buyer shall indemnify the Seller against all Loss suffered by the Seller in connection with any claim by a third party that the manufacture and/or supply of the Goods to such specification infringes the rights of any third party.
- 18.2 Unless otherwise agreed in writing all copyright and design rights in any drawings created by the Seller in the performance of the Contract shall vest in the Seller and remain the property of the Seller notwithstanding the purchase of the Goods by the Buyer.
- 19.19.1 Subject as expressly provided for herein all warranties, conditions, or other terms implied by statute or common law are excluded to the fullest extent permitted by law and the Seller shall have no liability to the Buyer other than as expressly set out herein.
- 19.2 The Seller makes no warranty as to the accuracy of all general drawings including weights and dimensions issued by the Seller and such drawings and any descriptions and illustrations contained in any catalogue, price list or other advertising material are for information only and are a general description of the Goods and do not form part of the Contract.
- 19.3 The Buyer shall be deemed to have inspected and quantified the Goods upon Delivery and the Seller shall have no liability to the Buyer in relation to short delivery or damage to the Goods in transit which was apparent on inspection or which would have been apparent on reasonable inspection unless such short delivery or damage is notified to the Seller and the carriers in writing within 3 days of Delivery specifying (in such detail as the Supplier shall reasonably require) the shortage in or damage to the Goods.

- 19.4 The Seller shall have no liability to the Buyer in relation to non-delivery of the Goods unless such non-delivery is notified to the Seller in writing within 10 days of the Delivery Date.
- 19.5 Where any valid claim in respect of short delivery or non-delivery of or damage to the Goods is notified to the Seller in accordance with these Terms, the Seller shall be entitled to supply goods to remedy any short delivery or non-delivery or damage free of charge or, at the Seller's discretion refund to the Buyer the price of the relevant Goods but the Seller shall have no further liability to the Buyer except in the case of death or personal injury caused by the negligence of the Seller.
- 19.6 Where the Seller does not manufacture the Goods or any part thereof the Seller shall have no liability in relation to any defect in or failing of the Goods other than to use its reasonable endeavours to pass to the Buyer the benefit of any guarantee given in respect of the Goods or part thereof by their manufacturer.
- 19.7.1 The company undertakes to replace or repair at its discretion products should they become inoperable within the time periods as outlined below:

Brand	Product lifetime	10 years	2 years
Hager wiring accessories	✓		
Metalclad ranges		✓	
dimmer switches, shaver units, portable lamps			✓
klik	✓		
occupancy sensors			✓
Tehalit	✓		
Hager			✓

- 19.7.2 In all cases defects shall be taken as arising solely from faulty materials and or workmanship and the defective goods must always be returned to Hager Ltd and Hager Ltd must be notified of the defect or suspected defect immediately the same became known to the Buyer. The Guarantee will be invalidated if the product has not been installed or maintained in accordance with the Company's instructions, has not been used appropriately or if any attempt has been made to rectify, dismantle or alter the product in any way.
- 19.8 The Seller shall not be liable to repair or replace defective Goods or part thereof if the Goods or part thereof have been subject to any misuse, unauthorised repair replacement modification or alteration.
- 19.9 The Seller shall not be liable for any Loss suffered by the Buyer due to the Seller's failure to meet its obligations under the Contract due to Force Majeure.
- 19.10 Except in respect of death or personal injury caused by the Seller's negligence, the Seller shall have no liability to the Buyer for any loss of profit, business, contracts, revenues or anticipated savings or for any special indirect or consequential damage or loss of any nature whatsoever and whether caused by the negligence of the Seller or its employees, or agents) which arises out of or in connection with the supply of the Goods and/or their use or resale by the Buyer, except as may otherwise be expressly provided for in these Terms.
- 19.11 For the avoidance of doubt nothing herein contained shall be deemed to exclude or restrict the Seller's liability for death or personal injury arising due to the Seller's negligence.
20. The risk in the Goods shall pass to the Buyer immediately upon Delivery.
21. The Buyer shall indemnify the Seller against all Loss (including without limitation the Price in respect of Goods completed, costs incurred by the Seller in respect of partially completed Goods, reasonable cancellation charges incurred by the Seller due to any subcontracts entered into to perform the Contract and estimated profits on the Goods under the Contract on which work by the Seller has not been started) suffered by the Seller which arises as a result of the cancellation of the Contract by the Buyer, the breach by the Buyer of any provision of the Contract or the negligence of the Buyer or any of its representatives.
22. Until payment by the Buyer in full of the Price of the Goods and any other monies due to the Seller in respect of all other products supplied or agreed to be sold by the Seller to the Buyer (including but without limitation any costs of delivery):
 - 22.1 The property in the Goods shall remain in the Seller and the Buyer shall hold the same as the fiduciary agent of and bailee for the Seller;
 - 22.2 The Buyer shall store the Goods separately from other products in a manner which makes them readily identifiable as being the property of the Seller and shall keep them protected and insured but shall be entitled to resell or use the Goods in the ordinary course of its business.
23. Until such time as property in the Goods has passed to the Buyer (and provided that the Goods are still in existence and have not been resold) the Seller shall be entitled at any time to require the Buyer to deliver up the Goods to the Seller and if the Buyer fails to do so forthwith the Seller or its agents may enter the premises of the Buyer and take possession of any Goods in which property remains in the Seller and remove and dispose of them as the Seller thinks fit. The Seller shall apply the proceeds of disposal (after deduction of all expenses) in discharge of the amount unpaid by the Buyer.
- 24.24.1 Save as may be otherwise agreed in writing between the Seller and the Buyer where Goods are supplied for export from the United Kingdom they shall be charged for and delivered FOB the air or sea port of shipment and the Seller shall not be obliged to give the Buyer the notice specified in Section 32(3) of the Sale of Goods Act 1979.
- 24.2 The Buyer shall be responsible for complying with any legislation or regulations governing the importation of the Goods into the country of destination and for the payment of any duties thereon. In particular, if any licence or consent of any government or other authority shall be required for the acquisition, carriage or use of the Goods by the Buyer the Buyer shall obtain the same at its own expense and if necessary produce evidence of the same to the Seller on demand. Failure to do so shall not entitle the Buyer to withhold or delay payment of the Price. Any additional expenses or charges incurred by the Seller resulting from such failure shall be for the Buyer's account.
- 24.3 The seller supplies the goods to the buyer on the sole basis that goods are on-sold by the buyer to suitably qualified, professional installers only.
25. If the Buyer:
 - 25.1 Shall default in or commit any breach of any of its obligations to the Seller under these Terms; or
 - 25.2 Shall be involved in any legal proceedings in which its solvency is in question; or
 - 25.3 Being a company shall present a petition or have a petition presented for its winding up or convene a meeting to pass a resolution for voluntary winding up or have a receiver appointed over all or any part of its assets or call a meeting of or enter into any composition or arrangement with its creditors or being an individual shall be presented with a bankruptcy petition; or
- 25.4 Shall cease or threaten to cease to trade or if in the opinion of the Seller serious doubts arise as to the Buyer's solvency then in any such case the Seller shall immediately become entitled (without prejudice to its other claims and rights under the Contract) to suspend further performance of the Contract for such time as it shall in its absolute discretion think fit or (whether or not notice of such a suspension shall have been given) to treat the Contract as wrongfully repudiated by the Buyer and forthwith terminate the Contract (either with or without notice to the Buyer) and if the Goods have been delivered but not paid for the Price shall become immediately due and payable notwithstanding any previous agreement to the contrary.
26. All Contracts shall be governed by English Law and the English Courts shall have nonexclusive jurisdiction for the hearing of any dispute between the parties.
27. These Terms supersede all previous Conditions of Sale of the Seller.
28. The Seller shall be entitled to assign or sub-contract all or any of its rights and obligations hereunder. The Buyer shall not be entitled to assign transfer sub-contract or otherwise delegate any of its rights or obligations hereunder.
29. It is a condition of any sale under these terms and conditions that both parties shall abide by the principles of The Electrical Installation Industry Charter adopted by the major electrical industry trade bodies and consequently shall avoid the distribution of counterfeit and/or non-compliant electrical products.

Conditions of Use
The products listed in this publication should be installed by suitably qualified professional personnel in accordance with the company's instructions, requirements of relevant legislation, regulations (including IEE Wiring Regulations) and the accepted practice in the industry.
