

High Current MCB Extension Box

- Add on enclosure provides facility to supply and protect larger loads from a 250A MCB Distribution board
- Can accommodate 2 x TP or 6 x SP MCBs from 63A-125A
- D Type MCBs are also available in 40A, 50A & 63A for motor rated loads
- Fully shrouded busbar kit included for safe connection from distribution board

High Current MCB Extension Box

Havells continues to enhance its PowerSafe range of distribution boards for commercial and industrial applications with the introduction of a high current MCB add on enclosure for supplying and protecting loads above 63A.

Specifically designed to be easily connected to the top of a standard 250A rated distribution board the high current MCB extension box provides a level of flexibility not catered for by other manufacturers.

Supplied with a fully shrouded busbar connection kit it is now possible to extend a standard 250A distribution board to accommodate either two triple pole 27mm pitch MCBs or six single pole MCBs (40A-125A). MCBs are available in both C and D types to achieve isolation, over current protection and a level of discrimination with other protective devices.

Key Features:

- 25kA Icc rated 250A busbar assembly manufactured to EN61439-1
- Fully lockable Lid (barrel lock to be ordered separately)
- Complete with blanking modules for unused ways
- Fully shrouded busbar interconnection kit
- Up to 2 x TP or 6 x SP 27 High Current MCBs can be accommodated

High Current MCB Extension Box & Accessories

Extension busbar section to fit high current (27mm) MCBs upto 125A.
