Electrium

UK Manufacturing

Electrium is a UK based electrical engineering company that produces electrical installation products for professional installers & specifiers.

We design, we build and we test products in our independently verified, accredited, registered test laboratories so that our distributors can be confident that the products they sell to installers are quality assured from beginning to end.

As a Siemens company Electrium complements its own range with Siemens technologies to offer its customers products that meet the very latest installation requirements.

Verification & Accreditation

Electrium operates two UKAS accredited registered test laboratories and uses approved verification processes to deliver products & assemblies which fully meet the requirements of the relevant BS EN product standards.

With ISO 9001 accredited production facilities, dedicated R&D teams & specialist product managers you can rely on Electrium to deliver solutions that meet client needs & the requirements of the IET Wiring Regulations

Quality & Sustainability

Electrium is registered by Intertek as conforming to the requirements of ISO 14001 in respect of its activities in design, manufacture, test & supply of wiring accessories, circuit protection, factory built assemblies & associated products.

ISO 14001 sets out the criteria for environmental systems and provides a framework for companies like Electrium to set up an effective environmental management system.

Electrium is approved by Alcumus ISOQAR as compliant to ISO 14001 and has been awarded the sustainable business certification by Groundworks.

Electrium is also accredited for its use of ISO 45001 Health & Safety standard.

Carbon Reduction & Social Responsibility

Installing solar power systems at our production facilities, replacing the lighting systems with LED technology, changing heating boilers from Gas to Bio-mass, introducing paints that cure at lower temperatures, mapping, monitoring, reducing & recycling waste with none going to landfill are just a few examples of how Electrium is creating a sustainable business structure.

Electrium is taking corporate social responsibility & employee well being seriously. Creating green spaces at the workplace, developed & maintained by a team of dedicated volunteers, working with Procure Plus to help recruit local people who might otherwise have difficulty in gaining employment, providing an online wellbeing network for employees positive mental health. Carrying out volunteer work at public sites like the Memorial Orchard at Cannock Chase to do the vital maintenance.

Improving Standards

Electrium is a key player in developing standards and lobbying for changes that will improve levels of safety in residential & commercial UK electrical installations.

By working alongside the IET & BEAMA on the development of the Wiring Regulations Electrium (as part of BEAMA) has helped to raise the safety standards that are set by the regulatory process, and by providing its innovative product solutions Electrium helps installers meet those needs.

Electrium also works with the EDA providing and using its training modules for improvement of standards in the industry and investing in its people.

Electrium Products

The Electrium portfolio includes cable management products, wiring accessories, domestic and commercial circuit protection systems.

Each Electrium product range has its own product management team to support customers throughout the supply chain, and in after sales.

As market leader Electrium brings innovative product solutions to market, innovations such as being first with a single module AFDD that fits standard consumer units, and offering single module SPDs for consumer units to meet Amendment 2 of the Wiring Regulations.

Electrium Online

The Electrium website is the place to find detailed product specifications, product images, technical specifications, downloadable data sheets & other additional information.

You can find product and installation videos, links to our podcasts, download catalogues, or simply read the online content in our FAQ's section.

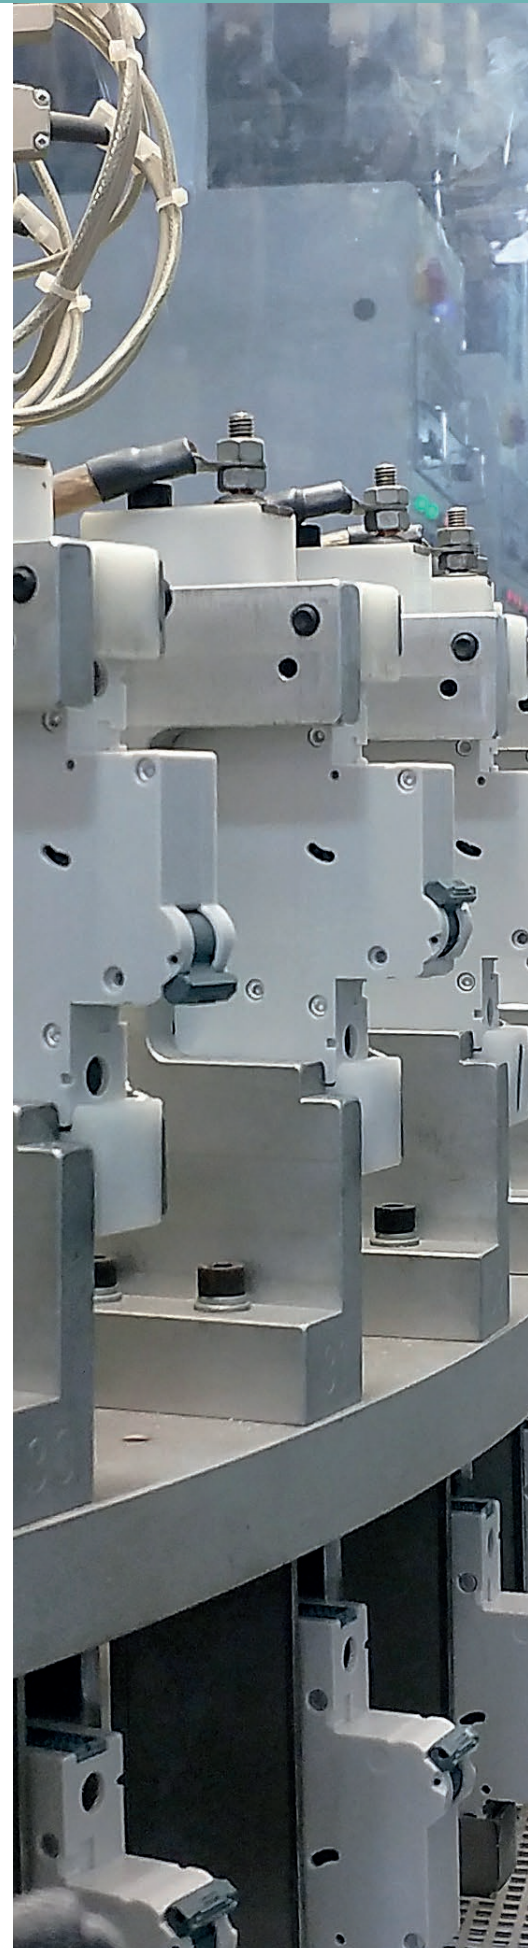

Alongside the product data there's lots of information about the latest changes to the IET Wiring Regulations and which products are available to meet the new requirements.

Finding your local contact is easy, they are all featured in the support section of the Electrium website, just type in your postcode to find name & number.

The contact us page provides email addresses & phone numbers for your commercial office contacts who will provide technical support & quotations.

You can also sign up for the Electrium Newsletter.

Alternatively you may wish to simply learn more about Electrium & its brands, combined they have over 400 years of industry excellence.

Electrium Brands

Crabtree began with the flick of a switch. In 1919 John Ashworth Crabtree designed and patented a quick make & break switch. This innovation, which safely managed electrical switching arcs was the beginning of a philosophy that became the culture of electrical safety for Crabtree.

Nowadays Crabtree products range from large industrial panel boards & factory built switchgear assemblies to simple light switches & socket outlets, with lots of ranges in between.

Wylex was established in 1897 as an electrical contractor who later turned their attention to designing and manufacturing electrical accessories at its newly acquired production site in Manchester.

That same site is still a design and manufacture site for Wylex products to this day. Wylex is the leading name in the UK for domestic circuit protection products.

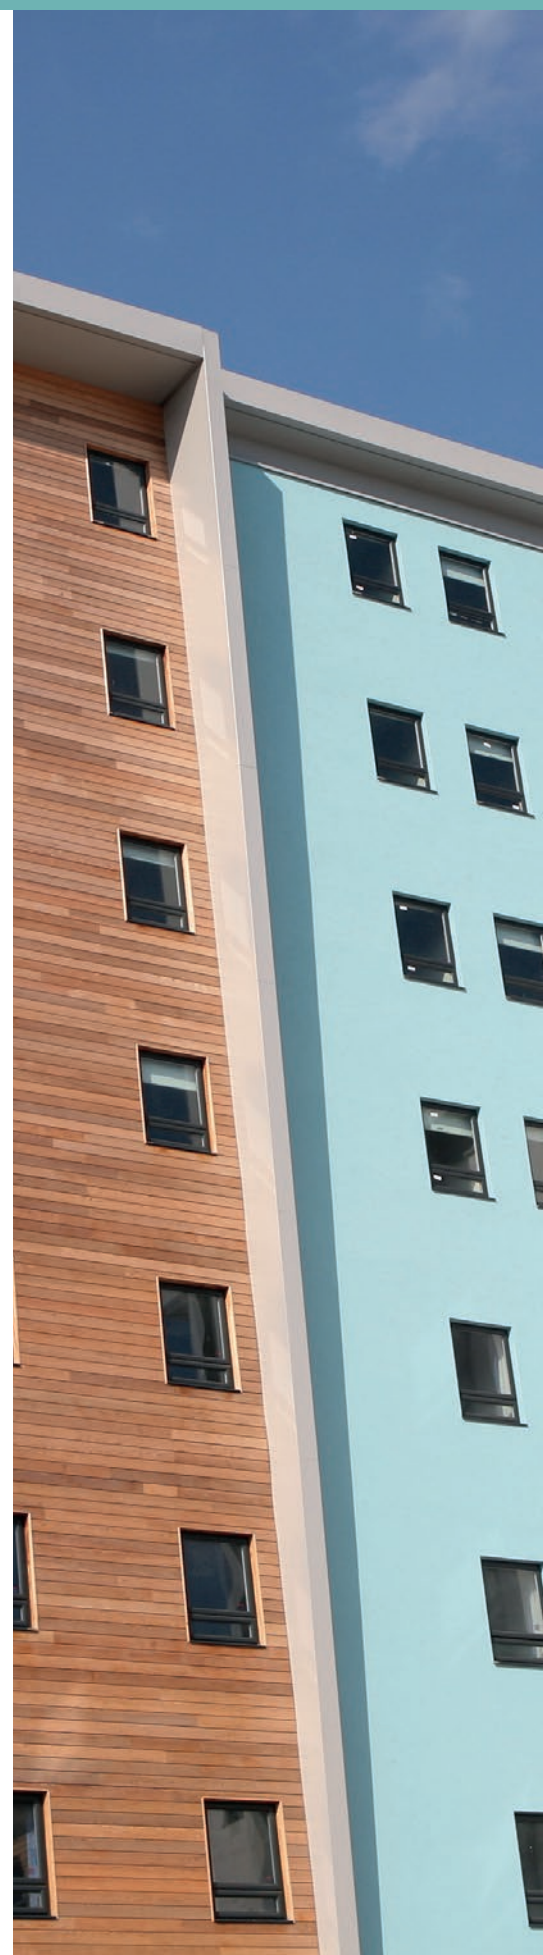

Volex Accessories now specialises in wiring accessories for residential and light commercial applications, the various product ranges cater for new build and refurbishment projects in private or social housing applications.

Originally part of Ward & Goldstone, Volex Accessories roots can be traced back to 1892, in the early 1920's they were manufacturing motorcycle lighting sets, and later supplied complete electrical systems to car makers.

Appleby ranges now include residential safety alarms i.e. smoke alarm, heat alarm and CO alarm. Plus a range of cable management products including switch & socket boxes, and dry liner boxes for all types of wiring accessories which makes them a universal choice in all types of installations

Appleby was established in 1840 in Willenhall, Staffordshire as a manufacturer of electrical pattress boxes and metal pressings.

FIRST DIGIT

Protection against solid foreign objects and access to hazardous parts

The first digit covers protection against penetration by solid objects, which includes hands and tools such as screwdrivers. At the lowest of seven levels, 0, no protection is offered, either of the equipment itself from damage by intrusion or of a person contacting live or moving parts. At the highest, 6, there shall be no entry of dust.

The letter X can be used in place of the first or second digit to indicate that tests have either not been made or are not applicable.

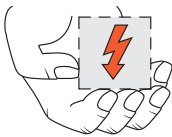

SECOND DIGIT

Protection against ingress of water

The second digit covers the degree of protection against the entry of water, on a progressive scale. For example, number 1 indicates that dripping water shall have no harmful effect, and number 6, that water projected in powerful jets against the enclosure from any direction shall have no harmful effects.

The letter X can be used in place of the first or second digit to indicate that tests have either not been made or are not applicable.

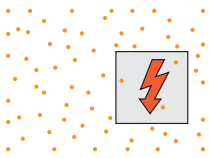

IP 0  No protection

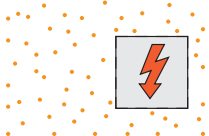

IP 1  Protected against solid objects up to 50mm eg accidental touch by hands

IP 2  Protected against solid objects up to 12mm eg fingers

IP 3  Protected against solid objects over 2.5mm eg tools and wires

IP 4  Protected against solid objects over 1mm eg tools, wires and small wires

IP 5  Protected against dust – limited ingress, no harmful deposits

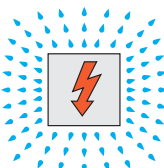

IP 6  Totally protected against dust

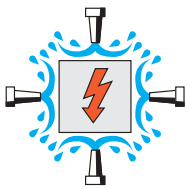

IP 0  No protection

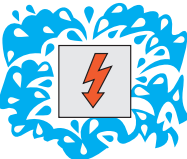

IP 1  Protected against vertically falling drops of water eg condensation

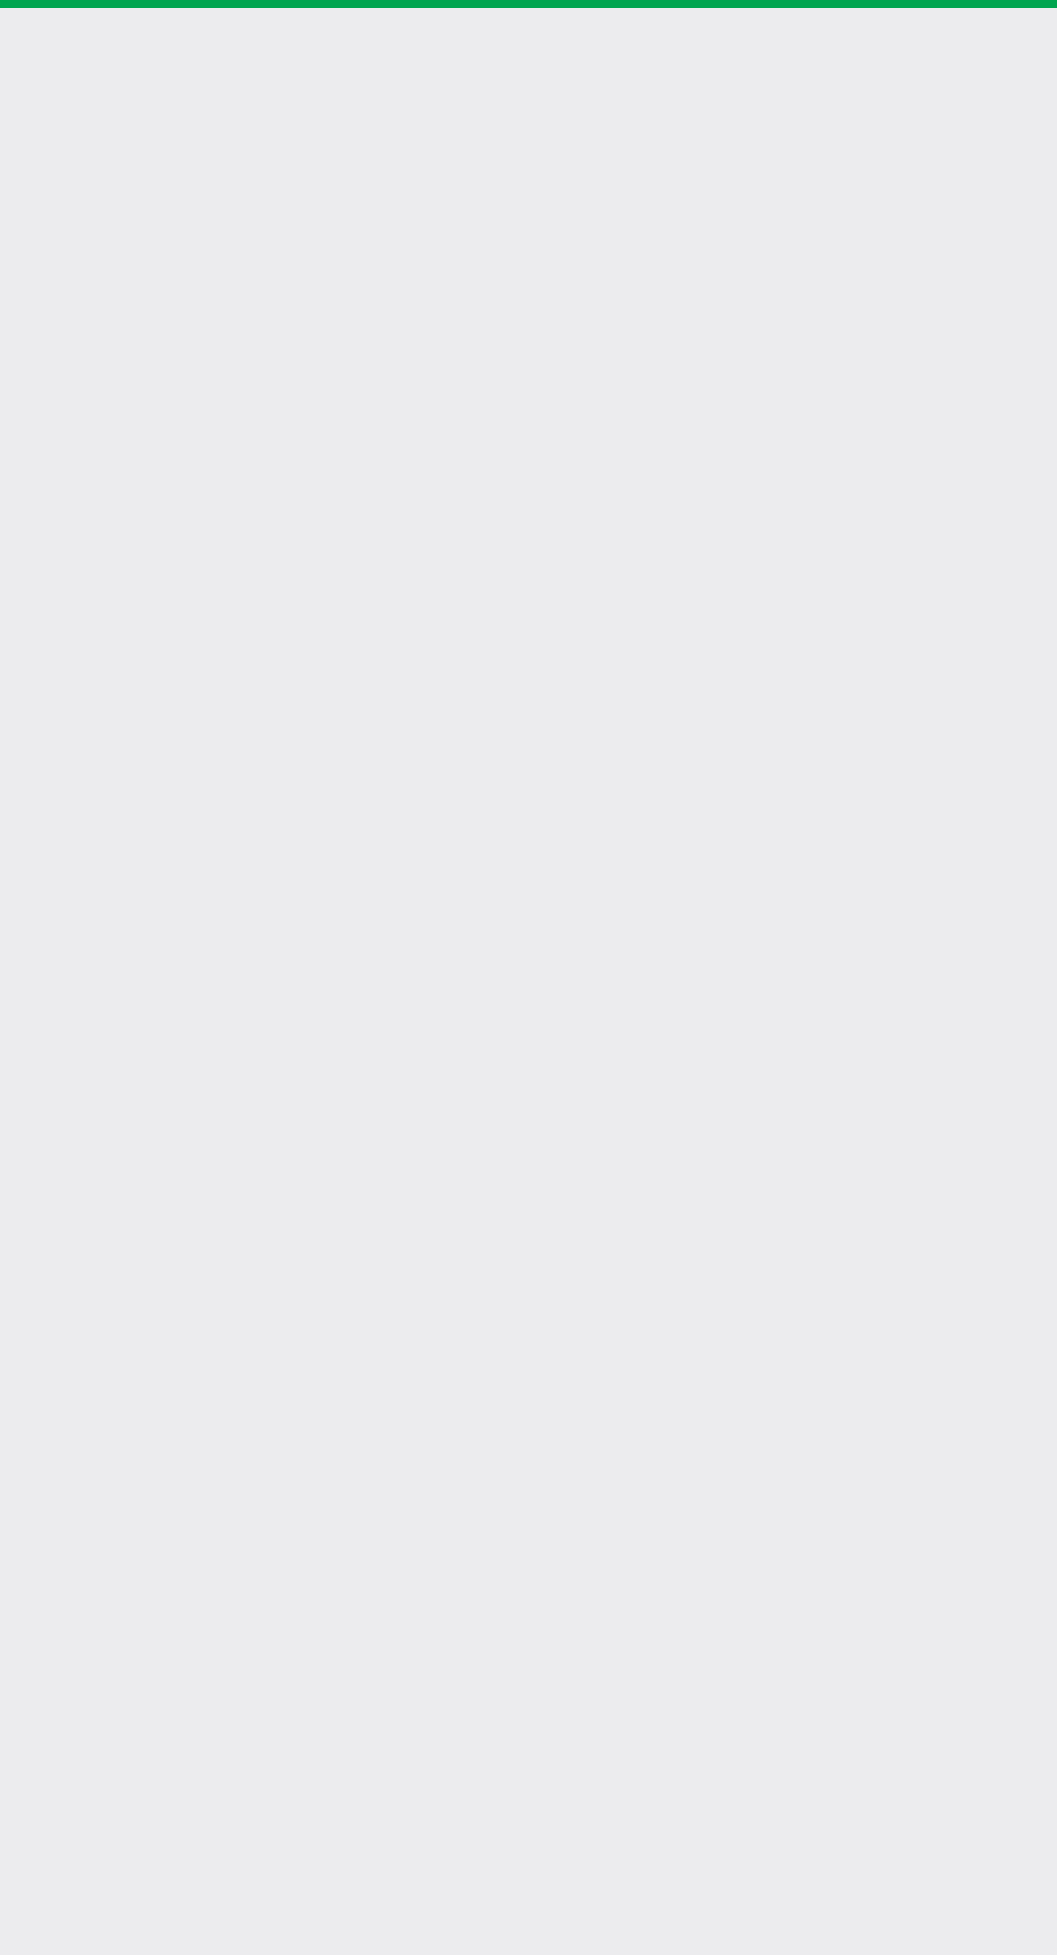

IP 2  Protected against direct sprays of water up to 15° from the vertical

IP 3  Protected against sprays of water up to 60° from the vertical

IP 4  Protected against water splashed from all directions – limited ingress permitted

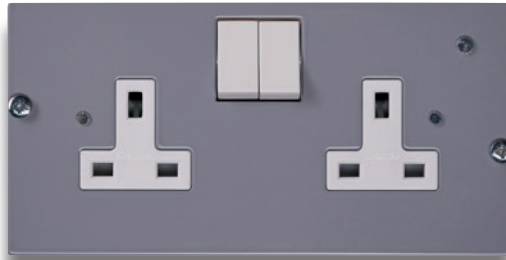

IP 5  Protected against low pressure jets of water from all directions – limited ingress permitted

IP 6  Protected against strong jets of water eg for use on ship decks – limited ingress permitted
