

Firefly fire safety clips

To hold cables securely in place in the event of a fire, Marshall-Tufflex have developed a range of spring-loaded Firefly fire clips for the inside or outside of mini/maxi trunking and conduit. The internal version fits within trunking prior to cable installation and the external version can be retrofitted.

Regulations

Regulations prohibit the use of non-metallic clips or plastic trunking as being the sole means of support for cables.

Firefly clips meet the requirements of BS7671:2015 Wiring Regulations to secure all surface cables in escape routes, preventing people from becoming entangled and allowing escape.

Saving lives in the event of a fire

Firefly fire safety clips

To comply with the latest fire regulations, Marshall-Tufflex supply a range of Firefly fire clips to secure cables within or outside of mini trunking, maxi trunking or conduit. The clips are designed to prevent cables from falling in the event of a fire, helping to keep escape routes free and accessible.

Product information

- Fire safety clips to comply with BS 5839-1
- For use within mini trunking, maxi trunking and conduit
- Spring loaded design for easy installation or removal of cables
- Designed for quick installation and to maximise internal trunking space
- Internal version to fit within trunking prior to cables being installed
- External version to retrofit onto existing installations
- Melt point over 1000°C
- Kits available including all required fixings/screws ready for installation
- Independently tested and certified by an accredited test house
- Patent applied for
