Power Meter Series PM3250

Multi-tariff capability
The PM3200 range allows arrangement of kWh consumption in four different registers. This can be controlled by:
■ Digital Inputs. Signal can be provided by PLC or utilities
■ Internal clock programmable by HMI
■ Through communication

This function allows users to:
■ Make tenant metering for dual source applications to differentiate backup source or utility source
■ Understand well the consumption during working time and non working time, and between working days and weekends
■ Follow up feeders consumption in line with utility tariff rates
