

Variable speed drives
Altivar 31
High performance
instinctively!

For 3-phase asynchronous motors from 0.18 to 15 kW

Welcome to the
Simply Smart*
world
compliments of
Telemecanique...

The Altivar 31
opens the doors
to this world by
offering you:

- **Simplicity,**
- **Compactness,**
- **Open access,**
- **Flexibility.**

From machine
design to
machine
maintenance, be
guided by your
instinct...

*Simply Smart :
more ingenuity and
intelligence for continually
improving ease of use

Altivar 31

forget *frontiers...*

A worldwide offer :

Wide choice of voltage ranges

- Single-phase 200 to 240 V.
- 3-phase 200 to 240 V.
- 3-phase 380 to 500 V.
- 3-phase 525 to 600 V.

Adherence to specifications

- Integrated EMC level A filter, conducted and radiated.
- With or without local controls on the drive.
- Positive and negative logic.
- DIN rail mounting.
- UL Type 1 kit.

15 kW

to

0.18

Variable speed drives for 3-phase
asynchronous motors
with or without local controls

Standards and certifications:

EN 50178 - EN 61800-3
EN 55011 - EN 55022 :
class A, class B with option

LISTED 170M
IND,CONT,EO

N998

Enrich your *machines*...

Benefit fully from the new functions of the Altivar 31...

High performing and reliable, it naturally blends into your applications. Select a product that adapts to the running of your machines....

Materials handling

- +/- Speed.
- Brake sequence.
- Motor switching.
- Limit switch management.
- Switching frequency up to 16 kHz.
- Current limitation.
- Linear ramps, S, U or customised.
- Second ramp.
- Ramp switching.

Textile machines

- 16 preset speeds.
- Bi-polar +/-10V input reference.
- Traverse control
- PI regulator.

Pumps, ventilation

- Regulator and preset PI, automatic/manual.
- Automatic restart.
- Stopping modes on fault.
- Limitation of operating time at low speed.
- Detection of current, torque, thermal state thresholds of drive and motor.

Special machines

- Current limitation.
- Catch on the fly.
- Controlled stop on loss of line supply.
- Operation on line at -50%.

Packaging / packing

- Brake sequence.
- Downstream contactor control.
- Accessible DC bus.

... plus many other possibilities:

- Protection of machine by locking parameters.
- Multi-assignment of logic inputs.
- Saving a set of parameters.
- Management of external faults.
- Display of parameters: current, power, torque, speed, frequency, etc.

With its **high performance** and numerous **functions**, the Altivar 31 still remains **simple**...

Follow your *instincts*...

Operational in the blink of an eye!

- «**Plug and drive**», the Altivar 31 takes control of your machine as soon as it is plugged in.
- **Autotuning**, it quickly adapts to the motor and provides dynamic performance in complete safety.
- **Efficient**, it meets all the requirements of your applications using a few simple parameters via the built-in display.

The closest **possible** to your machines

- Local controls: potentiometer, start/stop buttons available on drive.
- Remote terminal for installation on drive or enclosure door: - parameters can be downloaded...

Extended functions using *PowerSuite** software workshop:

- Preparation and saving of configuration files.
- In connected mode: configuration, adjustment, control, monitoring of drive or downloading of files.

*Software which is common to the Altivar range of variable speed drives. Available in 5 languages (English, French, German, Italian, Spanish).

Save space!

The Altivar 31 is unobtrusive... it **simplifies the design and installation** of your enclosures due to it being exceptionally **compact...**

Reduced size

- with integrated EMC level A filters,
- with possibility of side by side mounting,

as well as providing a better solution to industrial environments, with operation up to 50°C without derating.

Communicate two ways better than one!

The Altivar 31 has extensive adaptability: it **easily integrates** in automation systems due to **open access...**

Remote monitoring using PowerSuite

Integrated Modbus and CANopen

- With these **two communication networks** available as standard, the Altivar 31 increases your connection possibilities for industrial automation systems.
- The operation and maintenance of installations is even more efficient since you benefit, in real time, of having precise information regarding your process.

Magelis display unit

Twido programmable controller

The inseparable... Altivar 31 and Twido on CANopen: the ideal solution for machine manufacturers...

CANopen adaptor

Adapt the Altivar 31 to *your environment*

The Altivar 31 takes into account the **characteristics of each machine...** the different variants available provide considerably increased ***flexibility***...

... the **closest possible to the motor**

With versions available in an **IP55** enclosure, the Altivar 31 remains **reliable** and **accessible** in harsh environments.

■ Ready to use

Forget the costs and design time and, in particular, the risks of **non EMC conformity**. Its IP55 enclosure comprises a drive, a Vario switch disconnecter with rotary knob, a potentiometer, a reversing switch and EMC cabling.

■ Customisable

Select your own motor starter solution. The drive is supplied on its own in an IP55 enclosure: according to your requirements, you can also integrate the various components that are necessary for your application (switch disconnecter or circuit-breaker, switches, pilot lights, potentiometer, etc.).

... for **integration in your enclosure**

■ Drive kit

Customise your enclosure. This provides you with the drive part ready for integrating in your installation with other components. Mounting of the heatsink externally simplifies heat dissipation.

Please contact your Schneider representative.

The efficiency of Telemecanique branded *solutions*

Used in combination, Telemecanique products provide quality solutions, meeting all your **Automation** and **Control** applications requirements.

Simple machines
Altistart 01: 0,37 to 75 kW
Altivar 11: 0,18 to 2,2 kW
Altivar 31: 0,18 to 15 kW

Complex, high power machines
Altivar 71: 0,37 to 500 kW

Pumping and ventilation machines
Altistart 48: 4 to 1 200 kW
Altivar 11...347: 0,18 to 2,2 kW
Altivar 21: 0,75 to 30 kW
Altivar 61: 37 to 220 kW

A worldwide presence

Constantly available

- More than 5 000 points of sale in 130 countries.
- You can be sure to find the range of products that are right for you and which complies fully with the standards in the country where they are used.

Technical assistance wherever you are

- Our technicians are at your disposal to assist you in finding the optimum solution for your particular needs.
- Schneider Electric provides you with all necessary technical assistance, throughout the world.
