

## plications **Z LED Performance** Industrial applications Workshops, production lines, assembly lines, warehouse and storage facilities Commercial applications Exhibition halls, event centres, gyms, large recreational facilities, sports halls and retail

Pre-wired with 3M H05RN-F supply and dimming cable for quick and easy installation.

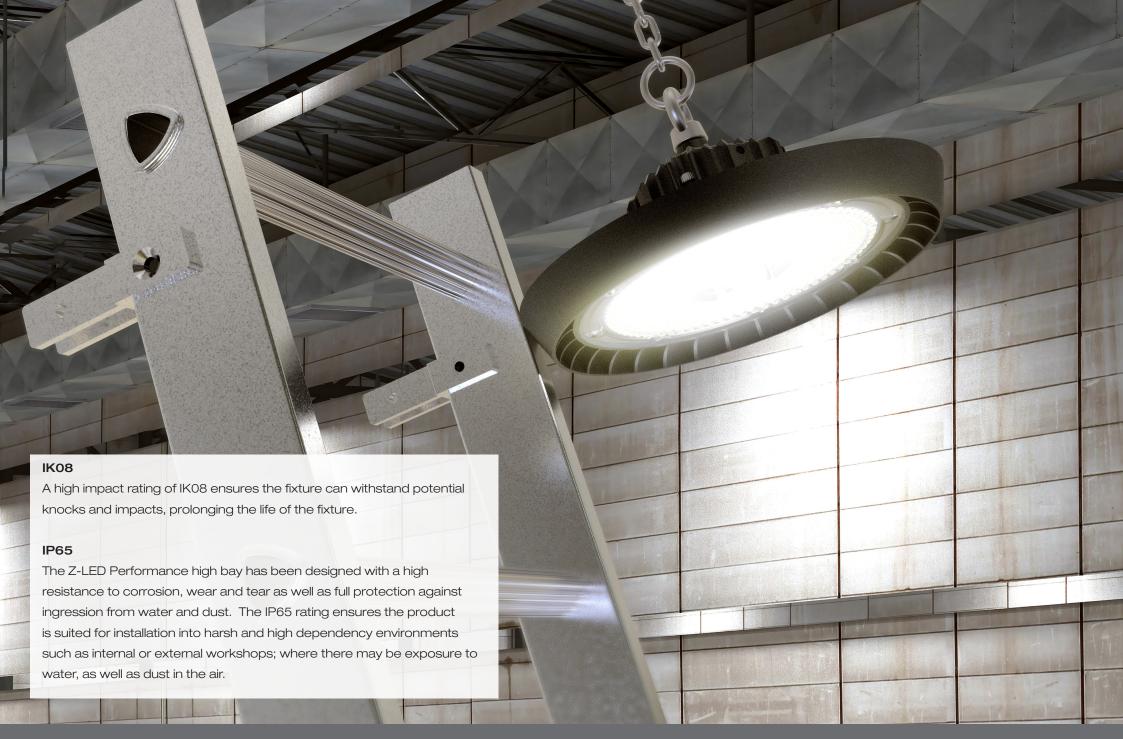

Durable polycarbonate diffuser with individual LED lens technology offers superior control of light distribution

Robust die-cast aluminium housing / heatsink provides high IK08 impact rating along with optimum LED thermal management Enhancing heat dissipation away from the LED array ensuring maximum product lifetime Silicone gasket provides IP65 ingress protection

IP65 plug-in programmable microwave sensor, with built-in daylight sensor, provides flexible controls for all applications.

# Robust **Design**

The high specification and engineered diecast aluminium body acts as a heatsink; dissipating heat away from the light engine, whist simultaneously ensuring the Z-LED Performance is highly durable and robust. The solid construction suits installation into industrial applications such as warehouses, storage facilities and workshops. The housing has been designed to withstand harsh environments.

Z-LED Performance benefits from a highly efficient polycarbonate diffuser with integral individual LED lens technology. Durable and lightweight in construction; while offering optimum performance and glare control. The polycarbonate lens ensures the luminaire is suitable for food processing applications.

## Energy efficient

The efficient Z-LED Performance offers an impressive efficacy of up to 150 Lm/W; reducing power consumption and lowering energy costs. Optimum performance and optics paired with the high Lm/W efficacies ensure fewer luminaires are required to achieve required light levels and uniformity.

An impressive LED lifespan of L80 B10 54,000 hours ensures minimal lumen depreciation over the lifetime of the luminaire.

A range of sizes and outputs (100W, 150W & 200W) ensures the Z-LED Performance is versatile; fit for industrial and commercial settings. It is ideal for use in workshops, production lines, warehouses and storage facilities. With the option of ceiling mounted, suspended and wall mounted, the luminaire is flexible and ideal for a range of applications. Z-LED Performance can also be used in commercial applications such as exhibition or event halls, gyms, sports halls and retail environments.

The Z-LED Performance has been constructed to withstand both high and low application ambient temperatures. It can be installed in applications which experience temperatures as low as -30°C, such as industrial refrigeration installations.

The die-cast aluminium housing offers superior heat dissipation to allow the product to operate in areas where the ambient temperature can reach 45°C.

### Datasheet

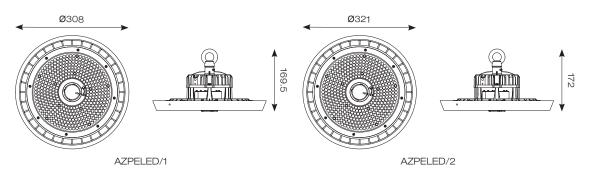

- Robust LED low/high bay for industrial, commercial and retail applications
- Die-cast powder coated construction and heatsink for optimum thermals and performance
- Alternative installation options by means of drop rods, jack chain and catenary wire. Bracket accessories available for ceiling or wall mounting
- High specification IP65 and IK08 ratings
- 100W exceeds performance of 150W HQI
- 150W exceeds performance of 250W HQI
- 200W comparable to 400W HQI
- Pre-wired with 3M of H07RN-F cable for ease and speed of installation
- Microwave sensor programmer and remote available for versatile commissioning
- LED lifespan L80 B10 54,000 hours
- 1-10V dimmable as standard

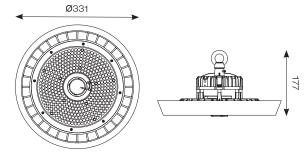

#### **LED Information**

CRI	Ra 80
CCT	4000K
Input	220/240V
Hertz	50/60Hz

Operating Temp -30°C to 45°C
