

Powersaver Immersion Controllers & Electronic Time Switches

Our Powersaver range includes a variety of options and functions to provide the perfect controller for your application. Below is a selection of just three functions, see over for the full Powersaver range specifications.

BOOST TIMERS

Powersaver switches all come with boost functionality, giving you the confidence that expensive to run heating and appliances can't be left on for longer than necessary. All models come with multi-press options of half, 1 or 2 hours running time.

BOOST, SELECT & PS DUAL FLEXI

TIMED CONTROL

Powersaver's timed controller is designed for single immersion elements but can be used to control any electric circuit up to 16A. Selectable programming modes; 24 hour, 5/2 day & 7 day. Common uses include heated towel rails, storage heaters and garden water features. It can even handle up to 400W of LED lighting.

SELECT

LOW TARIFF ELECTRICITY

The PS Dual Flexi is suitable for controlling single, dual and twin immersion elements. The unit is pre-programmed with Economy 7, Economy 10 and Eco 20:20 low tariff electricity rates to ensure that hot water is only called for during off-peak hours. It also has flexible settings to minimise these times further to maximise energy savings.

PS DUAL FLEXI

Powersaver Immersion Controllers & Electronic Time Switches

Our range of controllers provide the time control facility needed to help households lower their electric hot water costs by minimising energy consumption.

Powersaver Boost

- Ideal for applications that need short term operating times
- Indicator light shows boost time period; 1/2, 1 and 2 hour
- Fits directly into a single gang patress box
- 16A rated
- Specifically designed to be used with appliances that need to be left on over a period of time but that can be easily forgotten to be switched off - switches appliance off automatically after boost

PSB

Powersaver Select

- Give the ability to program electrical appliances in order to improve their energy efficiency as well as enhancing their functionality to increase the comfort of the end user
- Up to 3 On/Off operations per day
- 1/2, 1 and 2 hour boost periods
- Can be set to one of three cycles; 24 hour, 5/2 day and 7 day
- 16A rated
- Automatic Summer/Winter time change
- Button lock feature
- Fits directly into a single gang patress box

PSS

Powersaver Dual Flexi

- Dual immersion controller with pre-set programs for Economy 7, Economy 10 and Eco 20:20 tariffs.
- Automatic Summer/Winter time changeover
- 13A rated
- Rotary switch for pre-set program choice
- Allows you to further minimise the pre-set programs to maximise energy saving
