

The Round Pattern Time Switch

Q550 ASTRO/SUNTRACKER RANGE

Astro/Suntracker switches automatically adjust themselves to follow Sunrise/Sunset times throughout the year, each model comes in a further 4 'Zone' variations to compensate for the different times throughout the British Isles (see map below). This makes them ideal for controlling external and internal lighting loads up to 20A or 3,600W of LED lighting with no need for a sensor. All models also contain a 100 hour battery reserve.

Q550.13 | 3-pin 1on/off Optional early OFF Day Omit ON

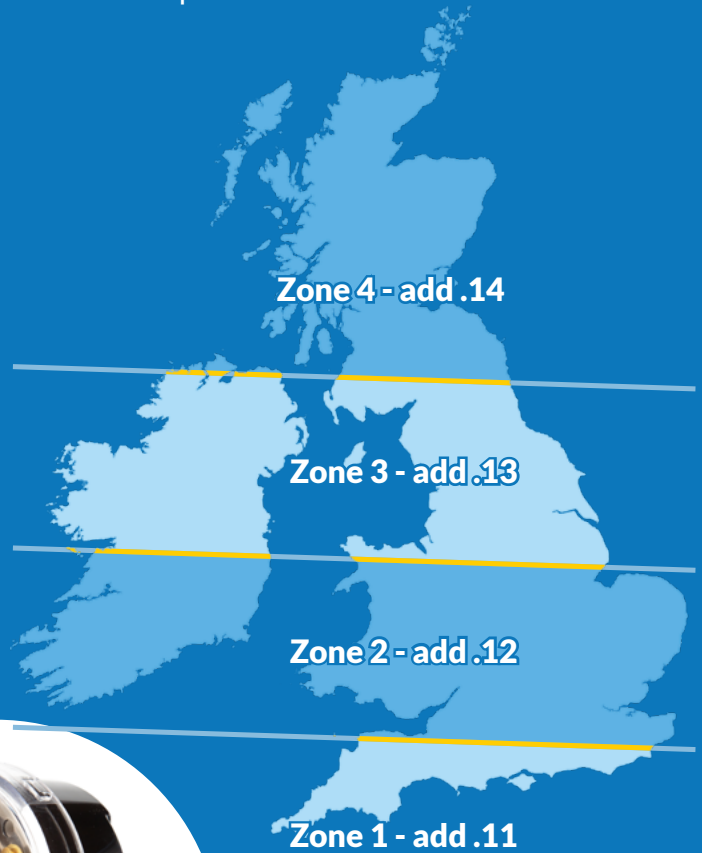

Q551.13 | 3-pin 1on/off Optional early OFF

Q551.14 | 3-pin 2on/off

Q553.13 | 4-pin 1on/off Optional early OFF

Q553.14 | 4-pin 2on/off

To get the correct times according to your location add the corresponding number to the end of the part number...

3-pin or 4-pin?

3-pin switches have common clock & switch connections,

4-pin switches have independent clock & switch connections enabling the use of a different switching circuit voltage, a Volt Free Contact, in effect.

The Round Pattern Time Switch

Sangamo have manufactured the renowned RPTS from our Port Glasgow factory since 1951, having sold over 11 million switches and counting. These 20A switches are famous for their high capacity, quality and reliability.

We often hear from customers who have had switches installed for over 5 decades and often on their second use, having outlived the equipment they were bought to switch!

Common applications include control of heating and ventilation systems and equipment control.

Q550 STANDARD RANGE

The standard 'red dial' time switch. Sangamo RPTS with red print on the dial contain a 100 hour battery reserve. These switches are standard on/off fixed time controls but with a wider range of variations and options than the S250 Range.

Q554.2 | 3-pin 2on/off Day Omit ON

Q554.3 | 3-pin 3on/off Day Omit ON

Q555.2 | 4-pin 2on/off Day Omit ON

Q555.3 | 4-pin 3on/off Day Omit ON

Q557.2 | 4-pin 2on/off Day Omit OFF

Q557.3 | 4-pin 3on/off Day Omit OFF

Q559.2 | 4-pin 2on/off Early OFF on one day

Q563.2 | 4-pin 2on/off SPDT changeover 10/20A

Q563.3 | 4-pin 3on/off SPDT changeover 10/20A

Q586.2 | 4-pin 2on/off Early ON on one day

S250 STANDARD RANGE

The basic 'black dial' time clock. The original RPTS model for those that need simple on & off switching of up to 20A. The dial is 24 hour but contains a Day Omit device which skips the ON operation on selected days.

S254.2 | 3-pin 2on/off

S254.3 | 3-pin 3on/off

S255.2 | 4-pin 2on/off

S255.3 | 3-pin 3on/off

E850 DIGITAL RANGE

Digital RPTS' combine the high capacity and reliability of the electro-mechanical models but provide full 7 day programming, allowing for more complex fixed time program schedules.

E854 | 3-pin 2on/off

E855 | 4-pin 2on/off

3-pin or 4-pin?

3-pin switches have common clock & switch connections,

4-pin switches have independent clock & switch connections enabling the use of a different switching circuit voltage, a Volt Free Contact, in effect.
