Latest News

We are delighted to announce that we have achieved a number of accolades at the HEA (Highway Electrical Association) 2018 Annual AGM and Awards Event.

Who are the HEA?

The HEA is uniquely placed to represent all those involved in the highway electrical sectors covering areas such as street lighting, traffic signals, cameras, communications, traffic signs, variable message signs and environmental monitoring equipment. The HEA has in excess of 110 organisational members covering contracting organisations, manufacturers and distributors as well as a number of consultant/overseeing and client organisations. Accredited to ISO9001, the HEA is one of the largest and most influential bodies in the highways/lighting/electrical sectors.

HEA-HEMSA — Luminaire Manufacturer of the Year 2018 | Winner! — ASD Lighting PLC

ASD Lighting are truly delighted to announce that we have been voted the luminaire manufacturer of the year 2018! All manufacturers that are part of the HEA are added to a voting list, which is then voted for by all contractors that work in the street lighting industry. They score our performance across a wide range of criteria (service, deliveries, and product quality to name a few) over the course of the past year.

To win this award is a huge honour and an excellent endorsement of our products and customer service level from our customer base.

We would like to attribute this award to everyone at ASD Lighting, in all departments, that works so hard to satisfy and continually grow our street lighting customer base.

We would like to sincerely thank all our customers for their votes and continued support as we go in to 2019 striving to enhance our reputation and market position even further. **Thank you!**

Latest News

HEA-HEMSA — Product of the Year | Commendation — Highway Diamond™ Elite Range

Our Highway Diamond™ Elite Range was highly commended by the judging panel, a reflection of our commitment to high quality luminaire design + manufacture and genuine market leading delivery times.

HEA-HEMSA — Employee of the Year | Runner Up — Brian Holmes

Having put forward the nomination for Brian Holmes for the effect he has had on gaining our customer base in street lighting, we are delighted to inform all that he received a special recognition in the category of Employee of the Year due to his years of hard work, product knowledge and commercial awareness contributing hugely to the overall success of the ASD Lighting Street Lighting Division.

Latest News

RELUX®

ASD Lighting PLC are excited to announce that our entire catalogue of luminaires has been completely updated and is now available to use through the Relux Calculation Software Online Database.

The Relux lighting design software has almost 200,000 users in Europe alone and is available for download worldwide free of charge.

Thanks to this our customers can now use ASD Lighting's product data within their lighting design projects, and even download full descriptive datasheets to complete their project submissions.

ASD Lighting presents a comprehensive range of commercial, domestic, industrial, street and security lighting which has been designed, developed and manufactured to the highest standards with design flair and creativity.

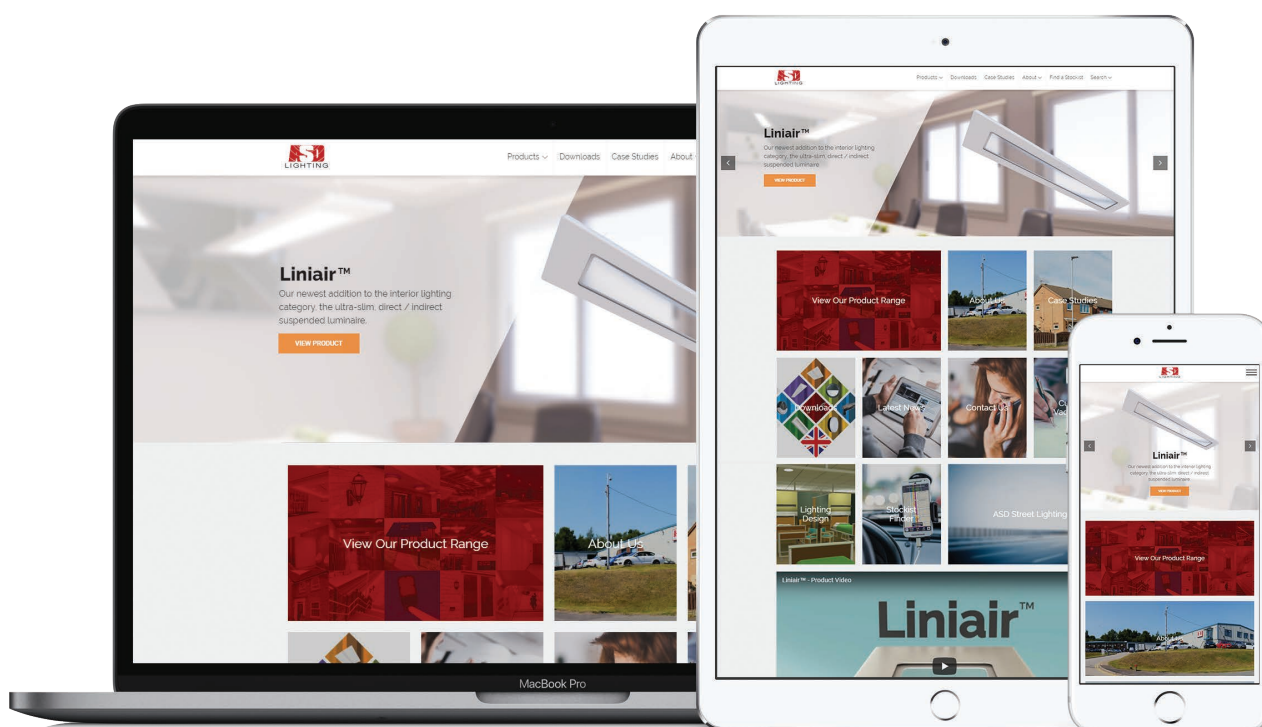

Offering a multitude of LED, lamp and operating options, our range provides practical solutions to an array of interior and exterior lighting applications.

At ASD we have combined our skill and expertise in the design and manufacture of lighting to provide a unique portfolio of products which are not only attractive and hard wearing, but include practical and time saving installation features.

Our unique approach to lighting design has led us to develop products to provide practical solutions to a wide variety of internal and external applications, both commercial and domestic.

ASD has developed a service to ensure that we work in partnership with our customers, to build a relationship that can be trusted and relied upon. We offer a unique product range with innovative features, with the best quality at the right price to ensure customer satisfaction, providing products Brighter by Design.

LIGHTING

ASD Lighting is unique amongst British Companies, a true manufacturer of lighting with a reputation for innovation and quality.

We have combined our skills and expertise in design and manufacture of lighting to provide a unique portfolio of products which are not only attractive and hard wearing, but include practical and time saving installation features.

ASD Lighting, formed in 1983, have been manufacturing in the UK from our 200,000-sq ft. factory in Rotherham for over 35 years.

- Employs 200+ people.
- Broad product range.
- Manufacturing facilities in Yorkshire.
- Global marketing and distribution.
- Full UK manufacturing, injection moulding & aluminium spinning facilities.
- 200,000 square feet factory.
- UK design.
- UK manufacturing provides:
 - Excellent delivery.
 - High product quality.
- ISO 9001, 14001 & OHSAS 18001.

Street Lighting Production Line

Surface Mount Technology line (SMT) Laboratory

Design - With future in mind.

Our in-house Product Design Team create lighting solutions to ensure that we meet the ever changing demands of customers, turning thoughts and aspirations for products into reality, with both style and sophistication.

In the last year, two truly innovative LED products have been successfully launched based upon specific requirements of the lighting market; the ViperRail™ and Highway Diamond™ Elite.

Develop - To make the future brighter.

The drive to reduce both energy and CO2 has led to a shift in the requirements of many stakeholders within the lighting sector. The growing pace of technological innovation along with the investment in both people and new facilities at ASD Lighting, have enabled the business to evolve, embrace and meet new and growing challenges, which many of our customers now face.

Photometric Laboratory

Once a product is delivered, the process is not over. The ASD Lighting Product Design Team regularly meet with customers and liaise with other internal departments to ensure that products evolve, and where possible, improvements are made to areas such as ease of installation, quicker maintenance and improvements in photometry or efficacy.

UK Manufacture - To deliver quality, on time.

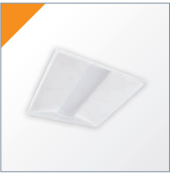

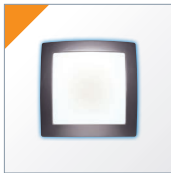

Fast and efficient delivery allows us to meet the demands of today's robust business requirements. 15 state of the art injection moulding machines with in-house spinning and die casting allow us to meet these demands.

Our fast and efficient manufacturing processes, in-house specialists and state of the art technology allows us to meet the ever changing requirements of our customers, whilst offering industry leading services and delivery times.

Interior Lighting Solutions

ASD is pleased to present a comprehensive range of decorative commercial lighting which has been designed, developed and manufactured to the highest standards with design flair and creativity. Offering a multitude of lamp and LED operating options, the range provides practical solutions to an array of interior lighting applications.

Rhapsody
1200 x 600

A range of internal luminaires ideal for office lighting.

Specification

- Recessed ceiling mounted.
- White colour finish.
- Constructed from steel, finished in white (RAL9016) with a premium polycarbonate opal refractor.
- 60,000 hours to L70.
- Supplied with 4000 K LED with a CRI of >80.
- Designed for office lighting and is suitable for areas with display screen equipment (DSE) workstations.
- Standalone proximity sensor.
- Suitable for areas where infection control is required. Hospital Technical Memorandum: "Lighting should be planned so lamps can be easily cleaned with no ledges or ridges where dust can gather".
- IP20.
- 5 Year LED guarantee.

Options

- Emergency option available.
- Available in 1-10V and DSI / DALI Dimmable.
- 3% to 100% pre-programmed e-Motion™ Corridor dimming.
- DSI / DALI Dim / Analogue options available.
- 3000 K available on request.
- Plug & Play options available.
- Air Handling option.
- Anti-vandal version available.

Exterior Lighting Solutions

Increasingly, the adequate provision of external lighting is seen as essential in providing a safe environment, whilst curbing light pollution by reducing upward glare.

Designed for use where the aesthetics of the lighting scheme are of paramount consideration our systems have constantly been re-evaluated to provide units that deliver these requirements and help combat the increasing threat of vandalism or theft from property.

Stealth Elite

Designed, Developed &
Manufactured in the UK

A robust high performance exterior luminaire.

Specification

- Wall mount.
- Black and titanium colour finishes available.
- Flood, wide and T beam angle distribution available.
- Die cast aluminium (powder coated).
- Clear / opal diffuser options.
- DALI Driver as standard (requires different wiring than standard product in order to use DALI).
- 10KV Surge Protection.
- Integrated Over Voltage Protection.
- Standby Power less than 0.5W.
- High operation temperature version available.
- ULOR as low as 0.6%.
- Standard specification paint finish passes 1000 hours Salt Spray Test in accordance with BS EN ISO 9227:2006.
- > 100k hrs L90-B10.
- Latest generation of LED chips.
- IP65 / IK10.
- 5 Year LED guarantee.

Options

- Emergency option available.
- PIR / Photocell options available.
- 3000 K available on request.
- Step Dim (Additional PIR required).
- Astro Dim (Additional Photocell required).
- Presence Detection (Additional PIR required).
- CLO.

Cage

A comprehensive range of attractive, vandal resistant luminaires suitable for internal and external use.

Specification

- Wall mount.
- Black, white, titanium and satin aluminium colour finishes available.
- Vandal resistant polycarbonate body and diffuser.
- 283mm and 353mm base sizes available.
- Louvre, eyelid or cage fascia to reduce upward glare (Cage fascia 353mm only).
- Screw down cover.
- Simple installation.
- 353mm metal based version features multiple side entries.
- IP65 / IK10.
- 5 Year LED guarantee.

Options

- Emergency option available (353mm only).
- PIR / Photocell options available.
- 3000 K available on request (353mm only).
- HI-LO PIR (luminaire at 10% during periods of inactivity, 100% light output when HI-LO PIR detects movement).
- Anti-tamper screws available.
- Fluorescent options available.

Litehouse Bollard

Designed, Developed &
Manufactured in the UK

The ASD LiteHouse bollard provides a stylish, robust and efficient unit for illuminating pedestrian areas, pathways & carparks and defining routes and edges within designated areas.

Specification

- Root mount & surface mount versions.
- Black and titanium colour finishes available.
- Bollard column available in high impact PVC or powder coated aluminium.
- Maximises downward light & minimises upward light.
- Diffuser available in opal and Fresnel prismatic.
- Adjustable ground trim / kick plate (optional).
- Root mount first fit kit.
- PVC shaft option simplifies earthing requirements + removes touch potential.
- 60,000 hours to L70.
- IP65 / IK10.
- 5 Year LED guarantee.

Options

- Emergency option available.
- Photocell option available.
- 3000 K available on request.
- Access door option available in galvanized steel version only.
- Fluorescent options available.

Crossing

Rail
& Infrastructure

ASD Lighting Factory

Industrial high bay option.

The ENSO™ Collection will be available in the first quarter of 2019. Please get in touch with sales for further information and specifications.

Highway Diamond™ Elite Range

Designed, Developed &
Manufactured in the UK

**HIGHWAY
DIAMOND
ELITE**

The Highway Diamond™ Elite offers a complete family of luminaires with an unsurpassed flexibility of lumen outputs, optical distributions and specification features.

Specification

- UK designed, developed and manufactured.
- Colour finished in black (RAL 9005) or light grey (RAL 9006).
- 10 Day delivery lead time.
- Four body sizes.
- Tool free maintenance (excluding Micro Highway Diamond™ Elite).
- 3000 K, 4000 K & 5700 K available on request.
- 100,000 hours (L90, F10).
- CE certification / ENEC mark.
- IP66 / IK10.
- 5 Year LED guarantee, (extended warranties available).

Options

- Emergency option available.
- Mini Cell option available.
- NEMA Socket option available.
- PIR option available.
- Wall bracket option available.
- Corner wall bracket option available.
- Front, side & rear light shield options available.
- Other RAL colours available on request.

Suitable Applications

Footpath

Residential

Cycle
Routes

Car Parks

Traffic
Routes

Pedestrian
Crossing

Rail
& Infrastructure

Motorway

Parkgate Costa Drive Thru

Highway Diamond™ Elite Range

Designed, Developed & Manufactured in the UK

Technical Data	Standard Features	Additional Detail
LED	✓	Designed solely for an LED light source
Driver	✓	DALI Programmable, CMS Compatible
Driver Current	Various	200 - 700 mA
Dimming	✓	Multiple Step / Part Night
Constant Light Output	✓	
Photometric Lens Options	✓ (Multiple)	Inc. Narrow / Medium / Wide / Extra Wide / Pedestrian Crossing
Luminaire Materials	Die-Cast Aluminium	Housing / Spigot / Fixing Clip
RAL Colours	Black / Light Grey	9005 / 9006
Correlated Colour Temperature	Various	Warm White / Neutral White / Cool White
Colour Rendering	> 80 > 72	Warm White Neutral White / Cool White
Ingress Protection Rating	IP66	Gear & LED Compartments
Impact Protection Rating	IK10	Optical Cover
Optical Cover	✓ Flat Cover	UV Stable Polycarbonate
Entry to Gear Compartment	Tool Free	Simple fixing clip
Driver Gear Tray Replacement	Tool Free (Excluding Micro Highway Diamond™)	Completely replaceable without tools required
Inbuilt Anti-Tamper Facility	✓	Instructions provided in the luminaire
Protection Class	Class 1	
Warranty Period	Standard 5 Years	Extended Warranties Available
Specification	✓ (Various)	Inc. CE Certification / ENEC Mark
Design Life	100,000 hr	(L90, F10)
Mains Voltage	220-240 V / 50-60 Hz	
Operating Temperature Range	-40 to +55°c	Based on ambient external temperature
Surge Protection	Inbuilt Driver	10 kV (1 pulse) / 8 kV
Vibration Tested	✓	Certificates - EN 60068-2-6 & EN 60068-2-64 (Micro Highway Diamond™ documentation submitted)
Manufacturing Location	UK

ASD LIGHTING
**SMART
 WATCH™**

Designed, Developed &
 Manufactured in the UK

Premium street & amenity lighting now available with integrated security & surveillance cameras.

Following on from the great success of the Highway Diamond™ luminaire, ASD Lighting partnered with Axis communications to integrate their surveillance cameras into the Highway Diamond™ Elite Midi range (44 - 84 LED's) of premium exterior luminaires.

Connectivity Options

Internal Storage
 (all data stored on 128gb SD Card in the luminaire)

Hard Wired
 (ethernet)

Wi-Fi
 (accessed remotely within Wi-Fi Range)

3G/4G wireless
 (accessed remotely from any location)

Suitable Applications

Urban Areas

Car Parks

Rail

Cycle Routes

Smartwatch™ Overt Bullet Camera

Designed, Developed &
Manufactured in the UK

Designed to be clearly visible to act as a deterrent, the bullet camera provides excellent image quality in HDTV 1080p resolution, even in complex light conditions.

The camera features Corridor Format, pixel counter, remote focus and zoom, as well as P-Iris control – ensuring optimal depth of field, resolution, image contrast and clarity.

The I/O port can be used for notification to an alarm panel or control of a relay. Axis Zipstream technology significantly reduces bandwidth and storage requirements. The outdoor-ready camera comes with an adjustable weather shield.

- Lightfinder and WDR – Forensic Capture.
- Axis Zipstream technology.
- HDTV 1080p at up to 60 fps.
- Built-in IR LEDs with OptimizedIR, 20 meters (66 feet).
- I/O support and Edge Storage.
- Up to 22,000 lumen output.

Bullet Camera Specification	
Lens	"Varifocal Remote focus"
Resolution	1080p
Horizontal Field of view (in 1080p)	96°-33°
Vertical Field of view (in 1080p)	50°-18°
Dust Resistant	✓ (IP66)
Moisture Resistant	✓ (IP66)
Frame Rate	50/60 fps (50/60Hz)
Operating Temperature Range	-30°C to +50°C
Warranty	3 years
Wide Dynamic Range Enabled	Forensic Capture
Quad View	×
Zipstream	✓
Two Way Audio Enabled	×
Alarm in-/outputs enabled	✓
Pan / Tilt / Zoom	Digital
Lightfinder	✓
Speed Dry (rain removal)	×
Auto Image Stabilisation	×
Auto-Tracking	×

Smartwatch™ Overt Dome Camera

Designed, Developed & Manufactured in the UK 

Designed to be clearly visible to act as a deterrent, the ASD Dome Camera is a fixed dome network camera that offers superb video performance in HDTV 1080p/5 MP resolution.

It complies with the SMPTE 274M standard and can cover a large area with exceptional detail and light sensitivity. Wide dynamic range and day/night functionality provides high image quality even in low-light conditions. With multi-view streaming, the full view and up to 8 individually cropped out view areas can be streamed simultaneously.

The Dome Camera has support for digital pan/tilt/zoom, two-way audio, audio detection and input/output ports for external devices. With its weather-proof and vandal-resistant casing, it is perfectly adapted for harsh environments.

- HDTV 1080p/5 MP.
- P-Iris control.
- Remote zoom and focus.
- I/O ports and two-way audio.
- Outdoor-ready and IK10 vandal-resistance.
- Up to 22,000 lumen output.

Dome Camera Specification	
Lens	Adjustable
Resolution	1080p
Horizontal Field of view (in 1080p)	84°-30°
Vertical Field of view (in 1080p)	63°-22°
Dust Resistant	✓ (IP66)
Moisture Resistant	✓ (IP66)
Frame Rate	"2MP - 30fps 3MP - 20fps 5MP - 12fps"
Operating Temperature Range	-40°C to +55°C
Warranty	3 years
Wide Dynamic Range Enabled	✓
Quad View	×
Zipstream	✓
Two Way Audio Enabled	✓
Alarm in-/outputs enabled	✓
Pan / Tilt / Zoom	Digital

Smartwatch™ Overt PTZ Camera

Designed, Developed & Manufactured in the UK

Designed to be clearly visible to act as a deterrent, the compact, outdoor-ready PTZ Camera delivers smooth HDTV 720p video at 50/60 fps, with 30x optical zoom and autofocus. Axis Sharpdome technology provides full scene fidelity and sharp images in all directions—above as well as below the horizon. Quick and precise pan performance of over 700°/s makes it easy to change viewing position and follow fast moving objects.

The PTZ Camera supports Axis Lightfinder technology, making it extremely sensitive to low light, and Wide Dynamic Range – Dynamic Capture for challenging lighting conditions. Axis Speed Dry function easily removes water drips from the dome glass, providing sharp images in rainy weather.

- Sharpdome technology.
- Speed Dry function.
- Lightfinder technology.
- Axis Zipstream technology.
- Pan performance 700° per second.
- Up to 22,000 lumen output.

PTZ Camera Specification	
Lens	Adjustable
Resolution	720p
Horizontal Field of view (in 1080p)	58.3°-2.1°
Vertical Field of view (in 1080p)	34.9°-1.3°
Dust Resistant	✓ (IP66)
Moisture Resistant	✓ (IP66)
Frame Rate	up to 25/30fps or 50/60 fps (50/60Hz)
Operating Temperature Range	-40°C to +70°C

ASD Street & Flood Lighting Columns

Types of Column

Stepped Tubular Steel

Now the most frequently used column for conventional street lighting because of the lower price, consisting of a constant diameter column shaft with a larger diameter base compartment. The change in diameter is achieved by means of a short taper, frequently known as the shoulder. The angle of taper varies for different manufacturers and processes. The majority of columns have a single reduction although there are examples of two or more.

Conical or Octagonal

A constant taper circular section or a folded sheet polygonal section, which can be a regular or irregular polygon, generally with eight sides are quite common and can perform better in high wind exposure areas. A circular section with a constant diameter base compartment and a variable diameter shaft is also available.

Max Windage	
4 m	0.79
5 m	0.45
6 m	0.27
8 m	0.23

Max Headload	
4 m	50kg
5 m	50kg
6 m	30kg
8 m	30kg

Types of Protection

Hot Dip Galvanizing

Now the most frequently used corrosion protection system for steel lighting columns due to its sacrificial properties and its equal protection to the internal and external surfaces of a column. Galvanizing is carried out to BS EN ISO 1461. In the last ten years it is claimed that the life of the galvanized coating has doubled due to the reduction of airborne pollutants and the halving of the rate of loss of thickness.

Painting

There is a very large range of different painting systems that can be applied to bare steel, aluminium sprayed surfaces or galvanised surfaces. In coastal areas such painting can also further protect the galvanising from the continuous sea salt spray.

Root Protection

We recommend bitumen root protection or glass flake root applied to that part embedded in the ground and for 250mm above ground. This prevents corrosion, resist mechanical abrasion but also attack from electrolytes in the ground water that can cause the material of the root to be conducted onto surrounding objects by electrolytic action. For particular soil types and for local authorities.

Types of Protection

Hot Dip Galvanizing

Now the most frequently used corrosion protection system for steel lighting columns due to its sacrificial properties and its equal protection to the internal and external surfaces of a column. Galvanizing is carried out to BS EN ISO 1461. In the last ten years it is claimed that the life of the galvanized coating has doubled due to the reduction of airborne pollutants and the halving of the rate of loss of thickness.

Painting

There is a very large range of different painting systems that can be applied to bare steel, aluminium sprayed surfaces or galvanised surfaces. In coastal areas such painting can also further protect the galvanising from the continuous sea salt spray.

Root Protection

We recommend bitumen root protection or glass flake root applied to that part embedded in the ground and for 250mm above ground. This prevents corrosion, resist mechanical abrasion but also attack from electrolytes in the ground water that can cause the material of the root to be conducted onto surrounding objects by electrolytic action. For particular soil types and for local authorities.

Lighting Column

Height	4 m
	5 m
	6 m
	8 m
	(7 & 9 m available on request)
Ingress protection rating	IP66
Impact protection rating	IK10+
Body material	Galvanized steel
CE mark	Yes
Manufacturing location	Europe
Structural Warranty	20 Years (Depends on environment & conditions above ground)
Expected Lifespan	20 - 40 Years

ASD Street & Flood Lighting Columns

Definitions

Nominal Height

This is the height of the column and bracket combination from ground level to the axis at the point of entry into the luminaire at the luminaire fixing.

Bracket Projection

This is the horizontal distance from the vertical axis of the column to the point of entry into the luminaire at the luminaire fixing, frequently incorrectly called "outreach" which is the horizontal distance from the vertical column axis to the centre of the light source (used for lighting design). It is important to state if single arm, double arm or multiple arm brackets are required.

Flange Plates

The structural plate at right angles to the column axis at, or near, ground level to secure the column to a foundation or structure by means of foundation bolts, frequently incorrectly called "base plate" (see below).

Planting Depth

The length of column shaft below the intended ground level, known as the root, for embedment in the backfilled soil to provide stability to the column shaft.

Base Plates

An anti-sink plate at the bottom of the root of a column which may either be fixed to the column or supplied separately.

Base Compartment(s)

The area at the base of a column shaft to house electrical equipment. While a single compartment is usually required, double door columns are also available for double arm brackets or to house additional equipment. It should be noted that the sizes of the door openings have been standardised in the UK to 600mm by 115mm or 500mm by 100 mm.

Luminaire Weight & Windage

The effective weight and projected area of the luminaire in the vertical plane, used for column design or selection for appropriate wind resistance.

Luminaire Fixing

The extension of the bracket or column shaft onto which the luminaire is fixed, usually known as the "spigot" although this term is not used by EN 40.

Post Top Columns

Where there is no projecting bracket, although a vertical extension may be used, and the luminaire is fixed on its axis directly above the column shaft.

Post Top Mount Columns

Where the spigot is similar to that for post top columns, with or without an extension, and the luminaire is fixed onto this spigot but projects sideways.

Lantern & Security Lighting Solutions

At ASD we are aware of the ever increasing demand made on external lighting, both courtesy and security.

Our systems have constantly been re-evaluated to provide units to help combat the increasing threat of theft or vandalism to property.

Combining the skills and expertise from over 30 years' experience in the lighting industry, we have designed a range of lighting suitable for all outdoor applications. Using the latest manufacturing techniques we have a range that meets the demands of domestic and commercial installations with robust casing and extremely effective and reliable PIR and photocell options.

Half Lantern

Designed, Developed &
Manufactured in the UK

A traditional wall mounted half lantern ideal for doorways to optimise illumination for entrance areas.

Specification

- Wall mount.
- Black, white and titanium colour finishes available.
- Vandal resistant polycarbonate body and diffuser.
- Simple installation.
- Shatter-proof polycarbonate detector.
- PIR range of 6 metres.
- 110° angle of detection.
- Photocell: dusk to dawn sensor.
- Designed to BS EN 60598.
- IP44 / IK10.
- 5 Year LED guarantee.

Options

- PIR / Photocell options available.
- HI-LO PIR (luminaire at 10% during periods of inactivity, 100% light output when HI-LO PIR detects movement).
- Fluorescent options available.

Suitable Applications

Residential

Footpath

Industrial Lighting Solutions

Where other areas within lighting provision have evolved in terms of style and efficiency, industrial lighting has remained at a relative standstill. At ASD Lighting we constantly strive for design and technological innovation within all areas and as a result are able to present a versatile range of luminaires for industrial and warehousing environments.

Illuminated Handrail Lighting Solutions

The ViperRAIL™ LED is an innovative solution to stairway, access ramp and bridge deck lighting.

The solution is totally bespoke and tailored around each individual project to ensure maximum efficiency.

ViperRAIL

172 - 175

ViperRAIL
Anti-Climb

176 - 177

ViperRAIL™ LED Illuminated Handrail System

Designed, Developed & Manufactured in the UK

A stylish yet functional LED handrail.

Specification

This luminaire is a high performance bespoke engineered handrail with integral IP65 LED lighting units for the illumination of stairs, walkways & bridges.

The ViperRAIL™ LED system is the ideal solution where stairs and walkways need to be illuminated in a discreet and uniform method.

Available with either brushed stainless, powder coated or warm-touch finishes. This handrail is suitable for both internal and external use.

The striking design features and the use of LED light, allows it to architecturally enhance the environment where it is installed. At the same time the ViperRAIL™ LED provides the essential safety requirements for pedestrians.

- Project specific LED handrail system.
- Handrail manufactured from 316 stainless steel.
- Super tough IK10 polycarbonate luminaire optics and anodised aluminium heat sink.
- Symmetrical / asymmetric distributions available.
- 48mm diameter handrail.
- In excess of 100,000 hours to L85 B10.
- Class III luminaire SELV compliant.
- Warm to touch coating available if required.
- 4000 K CRI 75 light source as standard other colours available.
- Full range of rail end terminations and supports available.
- Dimming available as an option.
- Can be connected to static inverter / ups to offer emergency operation.
- LED module lengths available: 300, 600, 900 and 1200mm.
- Can be used for compliance with building regulations Part K, BS5395, DDA.
- Single and twin circuit wiring available.
- Available in any paint colour.

ViperRAIL™ LED Illuminated Handrail System

Designed, Developed & Manufactured in the UK

Asymmetric

Asymmetric provides illumination to walkways or gives an ambient glow to walls, highlighting the route of travel without the need for lamp posts.

Bi-Asymmetric

Bi-Asymmetric provides even illumination from the rail to either side of it, ideal for divider rails and a modern alternative to lamp posts.

ViperRAIL™ Modular Anti-Climb System

Designed, Developed & Manufactured in the UK

The ViperRAIL Modular Anti-Climb system is the ideal solution for installations where an illuminated handrail would be unsuitable.

This is a high performance, vandal resistant, bespoke engineered modular lighting, containment & anti-climb system.

The design creates a structure to discourage climbing for open bridge decks over roads & railways.

This slip fronted trunking system comes with its own containment compartment for through-wiring.

Unlimited additional containment compartments can be added for additional services + through wiring.

Our ViperRAIL Modular Anti-Climb system is available as individual luminaires or a continuous run.

For more information, a tailored design and pricing, please contact our

ViperRAIL™ Modular Anti-Climb System

Designed, Developed & Manufactured in the UK

- Project specific LED slip fronted trunking system.
- Manufactured from extruded aluminium.
- Super tough IK10 polycarbonate luminaire optics and anodised aluminium heat sink.
- Asymmetric distribution.
- In excess of 100,000 hours to L85 B10.
- Class III luminaire SELV compliant.
- 4000 K CRI 75 light source as standard other colours available.

- Dimming available as an option.
- Can be connected to static inverter / ups to offer emergency operation.
- 1000 and 2000 lumens per linear meter.
- Single and twin circuit wiring available.
- Inbuilt containment compartment.
- Available in any paint colour.

Commercial Department on **T: 01709 843354** or **E: rail@asdlighting.com**

Utility & Emergency Lighting Solutions

ASD's range of high quality, hard wearing and practical Utility & Emergency luminaires are designed and manufactured to meet the exacting demands of specifiers, contractors and end users.

Government tariffs on energy now require genuine savings to be made. The ASD's utility and emergency fittings offer a comprehensive range of energy saving lamp options to meet L1 building regulation requirements. All fittings are produced to the highest quality, to meet the demands of BS EN 60598.

Surface / Wall

LED emergency exit sign.

Specification

- Surface, wall or recessed mount.
- Mild steel body in white. Acrylic legend – clear panel with screen print legend detail.
- Low power consumption reduces running costs.
- Easy to install.
- Available with up, down, left and right legend.
- 12 LED strip 1W.
- Can be affixed into solid or suspended ceilings.
- Product life 16.5yrs @ 3000hrs per year.
- IP20.
- 5 Year LED guarantee.

Options

- Available in Emergency, Self-Test and DALI.
- 3 hour maintained and non-maintained versions.

Emergency SafeRoute™

Designed, Developed & Manufactured in the UK

Colour Finish

White
SR_/W

LED Types

- 12 LED strip 1W.

Materials

- Body: Mild steel in white – RAL9016.
- Acrylic legend – clear panel with screen print legend detail.
- Battery: Sealed nickel cadmium type.

Installation

- Surface, wall or recessed mount.
- Rear cable entry.
- 4 way terminal block.
- 220-240v 50/60Hz.
- Mains power consumption maintained mode 4W 30mA.
- Batteries 3 cell Ni-Mh 2.0Ah.
- Recharge period 12 hours.
- Main body retained into ceiling by two suspension springs which allow a rigid fix without need for additional tools.
- Whole unit installed into ceiling as one piece - no need for separate trims etc.
- Surface (ceiling) or wall mount.
- Recess ceilings between 5 - 25mm.

Standards

- IP20.
- 'F' Mark.
- CE.
- BS EN 60598.
- Class 1.

Secure Environments Lighting Solutions

Secure environments require special consideration and expert knowledge when it comes to lighting. Working closely with our clients in this sector has enabled ASD to offer luminaires with some unique design features to allow ease of installation, ease of maintenance, high efficiency and most of all a comfortable and safe environment for patients and staff.

Profile Anti-Ligature

Designed, Developed &
Manufactured in the UK

An anti-ligature luminaire ideally suited to environments where consideration of the actions of individuals need priority such as hospitals, prisons, secure and care units.

Specification

- Ceiling & wall mounted.
- White colour finish as standard, satin aluminium option available.
- Steel body & vandal resistant premium opal polycarbonate diffuser.
- Vandal resistant / anti-ligature (where riot conditions do not exist).
- Tamper proof fixings.
- 434mm, 524mm and 590mm sizes available.
- IP20 (IP44 available as an option).
- 5 Year LED guarantee.

Options

- Emergency option available.
- Night light option available.
- DSI / DALI Dimmable available.
- Microwave on / off available.
- e-Motion™ Corridor available.
- Fluorescent options available.

Rhapsody Anti-Vandal

Designed, Developed & Manufactured in the UK

A 600 x 600 range of anti-vandal luminaires ideal for secure environments.

Specification

- Recessed ceiling mounted.
- White colour finish.
- Constructed from steel, finished in white (RAL9016) with a premium polycarbonate opal refractor.
- 60,000 hours to L70.
- Supplied with 4000 K LED with a CRI of >80.
- IP20 (IP65 available on requested).
- IK10.
- 5 Year LED guarantee.

Options

- Emergency option available.
- Available in 1-10V and DSI / DALI Dimmable.
- 3% to 100% pre-programmed e-Motion™ Corridor dimming.
- 3000 K available on request.
- Plug & Play options available.

ZIP Anti-Ligature

Designed, Developed &
Manufactured in the UK

Ideal for mental health & secure unit Installations, enhanced with the 'quick click' paddle connector; the push in connector eases wiring and reduces installation time.

Specification

- Recessed mounted down light, with ZIP adjustable fixing clip suitable for ceiling systems.
- White colour finish.
- The pre-attached adjustable ratcheted fixing enables the fitting to be installed easily; with just a few clicks the luminaire is held in position.
- Engineered for simple installation & low maintenance.
- IP65 rated.
- 20 Joules of impact resistance (IK10).
- 5 Year LED guarantee.

Options

- TPA rated version available on request.
- Emergency option available.
- DSI / DALI Dimmable available.

Lighting Management & Modular Wiring

Lighting Management is a way of controlling the light we use on a daily basis in everyday situations. ASD Lighting takes pride in offering this range of highly efficient state of the art lighting controls. We offer a variety of systems from integral occupancy sensors to sophisticated dimming systems, for applications such as offices & classrooms, based on amounts of natural daylight & occupancy. This unique range is adaptable to its surrounding environment & highly energy efficient.

Technical data

• Operating voltage	220-240VAC
• Switched power	Max. 400W (capacitive) Max. 800W (resistive)
• Standby power	0.5W
• Warm time	20s
• Detection area	10 / 30 / 50 / 75 / 100%, can be customized
• Hold time	5s / 30s / 180s / 300s / 15min / 25min, can be customized
• Daylight threshold	2Lux / 5Lux / 20Lux / 30Lux / Disable
• Sensor principle	Microwave motion detector
• Microwave frequency	5.8GHz+/-75MHz
• Microwave power	<0.2mW
• Detection range	Max. (Ø x H): 8m x 5m
• Detection angle	30° - 150°
• Mounting height	Max. 5m
• Operating temperature	-35°C - +70°C
• IP rating	IP20 (IP65 – Mounting in Hytronik special box)
• Certificate	Semko, EMC, CE, R&TTE, SAA

Simple on off function

Adjustable sensitivity, lux and time

Internal daylight threshold (if enough ambient light sensor will not trigger).

Usage suitability – Corridors / washrooms / lobbies etc.

User commissioning

Intelligent Photocell Single Point

Photocell Advance Version with Remote Control

Thanks to the Photocell Advance function, these daylight sensors can be built inside the fixture completely. The fixture is effectively controlled by the daylight sensor, automatic on/off operation based upon daylight.

- Works from behind the fixture cover / diffuser.

With insufficient natural light, the light switches on at 100%.

The light turns off completely whenever natural light reaches above pre-set daylight threshold.

The light automatically turns on at 100% when natural light lux level drops below pre-set daylight threshold.

The light turns on at full or dims to maintain the lux level. The light output regulates according to the level of natural light available.

The light dims to minimum level then switches off when natural light is sufficient.

The light automatically switches on when natural light is insufficient.

Commissioning via HRC-11 remote

Built into the fitting and can be used internally

DS06 photocell

As above but with daylight harvest functionality

Needs to be used in conjunction with a 1-10v driver

Can be used in a master slave configuration (wired)

Usage suitability - corridors / washrooms / lobbies etc. Where ambient light is available during daylight hours.

User commissioning

e-Motion™ Corridor (Down to 10%) Single Point

The e-Motion™ Corridor enables the illuminance to be linked to the presence or absence of people.

A conventional relay motion sensor is connected. The luminous intensity is increased when a person enters the room. When the person leaves the room the motion sensor switches off after a certain delay and the luminous intensity is automatically reduced.

The e-Motion™ Corridor is particularly beneficial in applications in which light is needed round the clock for safety reasons, for example in public buildings, large apartment complexes, car parks, pedestrian underpasses and underground railway stations. Since the luminous intensity only has to be increased when there is a demand for light the e-Motion™ Corridor offers effective lighting management and helps save energy and costs. Another benefit of the e-Motion™ Corridor is the enhanced convenience of automatic lighting controls.

Basic e-Motion™ Corridor dimming to 10%
 Fitting will stay on at 10% day or night
 Internal photocell disabled
 ON time set on microwave
 Sensitivity set on microwave
Usage suitability – Corridors / washrooms / lobbies etc.
 User commissioning

e-Motion™ Corridor (On/Off) – CFDP Single Point

Features

-  24 hour daylight monitoring dawn/dusk sensor
-  Special photocell to measure and differentiate natural light from LED light from behind the fixture cover
-  One-touch daylight learning via remote control
-  Tri-level dimming control based upon occupancy (also known as corridor function)
-  Easy-on-the-eye operation which makes the light turning on/off less uncomfortable
-  DIP switch offers multiple current selections for different luminaire requirements
-  5 Year, 50,000hr Warranty

2 24h Daylight Monitoring Function

Now with Photocell Advance technology, natural daylight will override the occupancy sensor.

Automatic on/off, based upon natural daylight conditions, our innovative and patented software enables our antenna with built-in daylight sensor to provide a "smart photocell" or dawn/dusk function from behind the luminaire cover, preventing the need to drill for an external photocell. This function is activated when the stand-by period is set to "+∞".

The light switches on at 100% when there is movement detected.

The light dims to standby level after the hold-time.

The light remains in dimming level at night.

1 ↔ 3 goes in cycle at night ...
100% on when movement detected, and dims to 10% in long absence.

The light turns off completely when natural light reaches above daylight threshold.

The light automatically turns on at 10% when natural light is insufficient (no motion).

Settings on this demonstration:

- Hold-time: 10min
- Daylight threshold: 50lux
- Stand-by dimming level: 10%
- Stand-by period: +∞

Commissioning via HRC-11 remote or dip switches on the driver.

Detection range, hold time, daylight threshold standby time and standby dimming level can all be pre-set.

Fitting will turn OFF when the ambient light threshold is met.

Usage suitability - Corridors / Washrooms / Lobbies etc. Where ambient light is available during daylight hours.

User commissioning

Master / Slave control

All features:
 868MHz FSK transmission mode (other Frequencies available)
 Supports e-Motion™ Corridor or organic style of response, dependent on occupancy
 Rotary switch allows easy commissioning of small installations (15 groups)
 Remote control *teach n learn) allows unlimited groups.

There are two types available with group settings either via rotary switch grouping or remote control selection.

Perfect solution for retrofitting where rewiring is not possible.

Transmitter range 30m indoor, 100m in open space.

Daylight threshold selectable.

Mounting height max 6m.

RF Frequency 915MHz (FSK mode).

Detection range max (DxH) 12m x 6m.

User commissioning

Wired DALI broadcast but controlled via Bluetooth (phone, tablet etc.)

If you want total control over your lighting, including an option to regulate it from your smartphone, but have concerns that the equipment involved will be complicated and difficult to use — worry no more! The Luxeye Sense DALI BT is a lighting control unit with an integrated light and presence sensor, and a DALI broadcast output channel, that works out of the box and is easily operated using a pushbutton. Now you can ensure that the use of light in areas like offices, conference rooms, training rooms and corridors is cost-effective and well managed. The Luxeye Sense DALI BT regulates light and light intensity according to the presence, or otherwise, of people and of ambient light. And if the pre-settings are not suitable for your needs, no problem — you can change them quickly and easily at the unit, using a screwdriver. You can even control the light and settings from a smartphone, using a free app that you download from the Apple or Google app store. With the Luxeye Sense DALI BT as part of your total lighting system, you can be sure that money is not being wasted on light that is not needed, while providing reliable, high quality light exactly when and where appropriate; all in a simple, straightforward and reliable way.

Product benefits

- Automatic start of light regulation after power-on (out of the box function)
- Basic functionality without configuration thanks to applied pre-settings
- Easy and fast customization of important parameter via screwdriver
- V(λ) corrected light sensor element
- Predefined and customizable configurations for all applications
- Password protection for user and configuration APP access
- Easy report generation of all commissioned sensors
- Easy report sharing via email
- DEMO Mode usable without device

Product features

- One DALI broadcast output channel
- Daylight-dependent regulation and presence-dependent control of light
- Operation via standard pushbutton
- Outputs with electronic reversible short-circuit and overload protection
- Change of delay time with screwdriver direct at the sensor
- Change of lighting intensity with screwdriver direct at the sensor
- Halogen free polycarbonate plastic housing
- Controller with integrated light and presence sensor, DALI output channel
- Presence detection via passive IR element
- Light control with app connection via Bluetooth
- Light control via smart phone
- Adjustment of all settings via smartphone
- Individual activation and deactivation of light and presence sensor
- Function indicator with three color LED
- Various shutters included for different detection areas

Hard wired system

Suitable for up to 20 drivers

Controlled by iOS 8.4 and Android 4.x app (free download)

Password protection for user and configuration APP access

Daylight dependant regulation and presence dependant control of light

Can be used with an external momentary switch

Detection range typically 7.0m diameter with a mounting height of 3.0m

Usage suitability – corridors, small offices, classrooms, conference rooms

User / Professional commissioning*

* Professional commissioning at daily rates.

Basic Dim

The three most important criteria that modern lighting management systems have to meet are visual comfort, suitability to the tasks being performed and energy efficiency – compactDIM supports all these. With just a small addition you can turn your luminaire into an intelligent system. Compact and with low stand-by losses, it will then save you energy.

DALI TOUCHPANEL BASIC

Touchpanel

DALI TOUCHPANEL BASIC performs a variety of lighting tasks in small and medium-sized rooms such as offices, hotel rooms, classrooms and meeting rooms and is very easy to use. Luminaires can be switched on and off, dimmed and grouped via the control panel with six individually assignable keys. DALI TOUCHPANEL BASIC is available in the four layouts COMBINATION, GROUP, SCENE and TUNABLE WHITE.

Another advantage is the ease of commissioning by means of a DALI connection. What's more, lighting scenes can be saved and colour temperatures can be set. Using simple rotary switches, up to 15 lighting scenes and 14 groups can be defined. Another benefit is simple commissioning thanks to DALI connection and four preprogrammed types. .

basicDIM wireless – introduction to intuitive light control

Integrated in the luminaire, the basicDIM wireless module allows anyone to have convenient, wireless interaction with luminaires, including configuration, commissioning and lighting control by the user. Simple control using Bluetooth smart can already be observed from the compact user interface. Its eight buttons enable switching on and off, dimming, scene selection and the setting of the colour temperature and light proportion. The lighting control can also be operated using an app.

- BasicDIM wireless module
- Wireless controllable with Android/iOS smart device
- Forms a wireless communication network with up to 127 nodes
- Commissioning via mobile phone / tablet device
- Individual / group control via app
- BasicDIM wireless user interface
- Battery powered wireless wall switch
- 4 scenes
- Dim up / down
- Usage suitability – Corridors, small offices, classrooms etc**
- User / Professional commissioning*

* Professional commissioning at daily rates.

Comfort DIM

Properties

- Colour touch screen (7")
- Background lighting with RGB LEDs
- User-friendly application software
- With DALI system functions of addressing and grouping
- USB and ethernet interface
- Can be remote-controlled via standard internet browser or em-LINK software (available at www.tridonic.com)
- Up-/downloading of the emergency lighting test report and firmware via USB or Ethernet
- 5-year guarantee

Lighting management

- Lighting management system with up to 128 DALI devices
- Start-up, control and operating unit
- Manual dimming and switching
- Manual scene recall or timed scene recall with a maximum of 99 sequences
- Tunable White (colour converter) control (colour temperature along the Planckian Locus)
- Weekday-controlled sequence programming (schedule)
- User-defined labelling of scenes, groups, sequences and schedules
- Optimised mode for RGB coloured light management

Emergency lighting management

- For small and medium emergency lighting systems with up to 120 DALI emergency lighting units (60 for each DALI line) per DALI x/e-touchPANEL O2
- 2 addresses for external status controls
- Function and endurance tests can be conducted in accordance with local regulations
- Supports patented addressing function ("EZ easy addressing")
- Individual labelling of groups and devices
- Calendar-controlled function and duration test
- Interconnection of up to 25 panels for bigger installations possible

DALI x/e-touchPanel O2
Lighting and emergency lighting xcontrol system

DALI touchPanel O2
Operating and control unit

Hard wired system
DALI control system with 2 mode options
Lighting management in mains mode
Emergency lighting mode
Needs an external DALI power supply
Commissioned via on screen prompts and addressing tool (article number 89899836)
Usage suitability – Medium / small offices, classrooms, lecture theatres, residential homes
User / Professional commissioning*

* Professional commissioning at daily rates.

DALI Basic

The DALI RC BASIC SO is a DALI control unit for use with your LMS. With a maximum power input of 9 W, it is suitable for up to 64 DALI electronic control gears and can be expanded using DALI repeaters. It allows you to control up to 4 lighting scenes (one under daylight-dependent control) and 4 freely-assignable lighting scenes (3 under daylight-dependent control), has 3 inputs for up to 6 light or presence sensors and 5 inputs for startup/operation. It also gives you presence detection with user-definable delay (1..30 min) and has an integrated floating fault contact for lamp fault reporting. Great for conference rooms and office lighting, DALI RC BASIC SO lets you dim or switch all the luminaires in the system, and is set up without software.

Product features

- DALI control unit
- Presence detection with user-definable delay (1..30 min)
- Integrated floating fault contact for lamp fault reporting
- Control of up to 4 lighting scenes (one of which under daylight-dependent control)
- Control of up to 4 freely assignable lighting scenes (3 under daylight-dependent control)
- 3 inputs for up to 6 light or presence sensors
- 5 inputs with make contacts for startup/operation
- Maximum power input: 9 W

Product benefits

- All the luminaires in the system can be dimmed or switched
- Setup without software

The versatile DALI LS/PD BASIC is a light and presence sensor, suitable for luminaire installation and ceiling mounting. It can be used purely as a light sensor or purely as a presence sensor. Ideal for use within light fittings, in offices and conference rooms, DALI LS/PD BASIC can also be separately mounted, and is set up without software, making it a simple but helpful addition to your light management system (LMS).

Product features

- Light and presence sensor for luminaire installation and ceiling mounting
- Can also be used purely as a light sensor or purely as a presence sensor

Hard wired system

Din rail mounted

Can be used in conjunction with sensors to detect presence and ambient light regulation

Can be used with DALI repeaters to extend the system

Usage suitability – Medium / small offices, conference rooms, classrooms, lecture theatres, residential homes

User / Professional commissioning*

* Professional commissioning at daily rates.

ConneDim

Tridonic unveils conneDim, an easy-to-integrate light management system solution for industry and commerce. The system, comprising conneDim Gateway and conneDim Cloud, combines cost efficiency and user-friendly design with decentralised light monitoring and control options from anywhere in the world.

Product features

- Independent lighting control for up to 256 DALI gears on 4 DALI lines
- Can be expanded by connecting multiple gateways on the same network
- Cloud based web interface for configuration and monitoring
- Simple setup via mobile App or Cloud service
- Status LED for indicating the operating status
- Connects to Tridonic DALI Interface RS232 PS/S
- Works with Tridonic DALI comfortDIM portfolio
- Cross DALI line control with DALI XC, DALI touchPANEL and DALI MSensor
- Freely programmable daily scheduling with calendar function
- DALI emergency lighting unit test scheduling and monitoring via the conneDim Cloud
- Cloud based maintenance, e-mail alerts, predictive warnings and visual monitoring
- Open JSON-RPC TCP control protocol for linking to building automation systems
- 5-year guarantee

Step No. 1

Set up your DALI network with sensors, pushbuttons, touchpanels and DALI devices – all connected to a DALI line.

Step No. 2

Install conneDim gateway Links the DALI lines and enables interoperation between all DALI standard devices. Enables wireless control through a standard wifi-router with a iOS or Android device. Once connected to the internet, it uploads all lighting data to the conneDim Cloud.

Step No. 3

Download your matching App for tablet or smartphone
conneDim Lite: App made for users to control their individual lights within the wifi-network.
conneDim Architect: App made for commissioning used by electrician/ integrators and for maintenance.

Step No. 4

Log-in to conneDim Cloud (optional)
 Online 24/7 worldwide available service through an internet browser on Windows or Mac. Monitoring site remotely, Schedule synchronisation, Maintenance, Emergency lighting tests, Energy Monitoring, Offsite Backup, Global Management & Reporting

Hard wired system

Cloud based for global monitoring of multiple sites

Emergency lighting monitoring and test reporting

Energy monitoring down to single light points

Initial cloud system costs and yearly gateway costs

Usage suitability – Large offices, schools, manufacturing plants, warehousing, healthcare, supermarkets, sports halls, public buildings

Professional commissioning*

* Professional commissioning at daily rates.

DALI Pro

Enjoy pinpoint control of your lighting system straight out of the box with this comprehensive control unit for light management systems. The DALI PRO CONT-4 arrives preconfigured, so there is no start-up procedure, but when you do want to change the settings, the process is straightforward. The unit acts as controller for four DALI lines, and up to 50 pushbutton/sensor couplers can be integrated. Its many useful features include an integrated clock for event control, a weekly scheduler and a e-Motion™ Corridor with preprogrammed settings. You can quickly and easily create lighting scenes and sequences, which the unit can store and recall. The DALI PRO CONT-4 is highly reliable, with a mains interruption buffer battery, and if you need to control large luminaire groups, this unit can be particularly good, since it can switch and dim up to 256 DALI ECGs and control up to 4 x 16 groups. You may find it useful in many areas, including offices, conference rooms, production and assembly facilities, classrooms and sports halls, and of course it integrates with other elements of OSRAM's DALI professional lighting systems, to let you create the light management system (LMS) that best meets your needs.

Product features

- Interconnection of up to 4 DALI Professional control units
- Configuration via LAN/WLAN/USB
- RGB color sequences
- Time-of-day-dependent color temperature adjustment (human centric lighting)
- Controller for 4 DALI lines
- Up to 50 pushbutton/sensor couplers can be integrated
- Integrated DALI supply
- 4 freely programmable switchover relays; load contact: 4x 5 A
- Daylight-dependent and/or presence-dependent or manual control
- Up to 4 x 16 groups can be controlled
- Integrated clock for event control
- Weekly scheduler
- Connection via push-in terminals
- Control of lighting scenes and sequences (recall/store)
- Housing for series installation
- Length of the DALI control cable: up to 300 m

Product benefits

- Easy and intuitive control via App
- Control up to 1024 DALI ECGs via LAN interconnectivity
- Plug and Play preconfigured for instant use without any startup procedure
- Mains voltage interruption buffer battery
- All the luminaires in the system can be dimmed or switched
- Simple creation of scenes and sequences
- Switching and dimming of up to 256 DALI ECGs per DALI Professional control unit
- A setpoint for daylight-dependent control can be stored by double clicking
- Sensor integration in DALI
- Remote access/remote maintenance

Hard wired system

Din rail mounted

Can be used in conjunction with sensors to detect presence and ambient light regulation

Interconnection of up to 4 DALI professional control units

Up to 50 push-buttons / sensors

Easy control via App iOS and Android

Graphic configuration with windows user interface

Usage suitability – Large offices, schools, manufacturing plants, warehousing, healthcare, supermarkets, sports halls, public buildings

Professional commissioning*

* Professional commissioning at daily rates.

ENCELIUM

An advanced, intelligent light management solution for commercial spaces seeking to optimize energy savings, streamline operations, improve occupant experiences and participate in the Internet of Things (IoT).

The Award-Winning ENCELIUM® EXTEND Networked Light Management System is a flexible and powerful way to monitor, analyze and manage interior and exterior commercial lighting spaces. It is the only lighting control system that can gather data from a range of lighting devices to adjust lighting usage with changing building and occupancy needs and requirements - making any building fit for the future.

Features & Benefits

- 360 degree, 3D graphical control and reporting
- Control one fixture or an entire campus
- Scales from a single control server
- Utilizes wireless and wired devices on the same system
- Can integrate into other BMS systems via a BACnet® interface
- Supplier agnostic control is compatible with 3rd party components
- Simple installation and design
- A handful of components do all the work
- Easily meet 90.1T-24, IECC, LEED, Green Buildings

The ENCELIUM EXTEND Networked Light Management System and Polaris 3D Software makes it possible to monitor, control and adjust your entire lighting network indoors and outdoors all from a single software platform.

This premier networked light management system enables building owners and facility managers to eliminate duplicate lighting control systems thus saving time and money to maintain and train staff on two different systems.

The Polaris 3D® software (displayed on the screen) enables end users to quickly identify, analyze and adjust their lighting network needs all from a centralized location.

The ENCELIUM® EXTEND Networked Light Management System (LMS) is designed for commercial spaces that seek advanced features and functionality including:

- Web-accessible system control
- Advanced energy reporting features and other data analytics
- Building automation system integration

Hybrid wired / wireless system
 EM monitoring wired
 Web access and possibility of remote maintenance
 Real-time light control, analysis of energy consumption
 Emergency lighting monitoring and test reporting
 Energy monitoring down to single light points
 Initial setup cost, no on-going costs.

Usage suitability – large offices, schools, manufacturing plants, warehousing, healthcare, supermarkets, sports halls, public buildings
 Professional commissioning*

* Professional commissioning at daily rates.

e-Motion™ Cloud

Wireless Lighting Controls

Wireless Lighting Control offers end-to-end Wireless lighting control solutions
Our system is installed in over 1,500 sites across the UK and Northern Europe

Regional shopping centres, Europe's largest automotive parts distribution centre, the largest multi-story car park in the UK, tech companies' offices (4,000+ luminaires per site), a chain of 400+ pet stores, police stations, the national bank, the largest global online retailer's distribution centres (5000+ luminaires per site), global TV headquarters, offices of the most prestigious car manufacturer, government offices, universities, private and public schools, multi-story car parks of two global car-park operators, port authorities, a global chain of coffee shops, London head office of top 5 chartered accountants (6,000+ luminaires), UK's largest airport, front and back of house lighting at several regional shopping centres, etc.

Why Wireless Lighting Control?

- Wireless Lighting Control which leads to reduction in cost, power consumption and carbon footprint.
- All products confirm compliance with Radio Equipment Directive, RED 2014/86/EU and The Luminaire Standard (BS 60598).
- After years of successful installations including blue chip clients with over >5000 devices per installation.
- Emergency lighting tests are run automatically and reports generated avoiding the need for manual recording of results.
- Each Wireless luminaire is programmed to operate using drag and drop menus.
- No complicated electrical installation.
- Change individual luminaire operation to improve light usage without the need to alter any wiring.
- No limit to the number of luminaires that can be controlled.

OFFICES

The requirement for Lighting Controls in the office comes from many sources, building controls regulations, environmental standards, the desire to save energy and sometimes the desire to be seen to be saving energy. Modern controls with tuneable white light can enhance rather than detract from the office environment and have become an essential part of the wellbeing environment

WAREHOUSES & INDUSTRIAL

Industrial premises offer the shortest investment payback times from lighting controls. The luminaires are more powerful and so the savings per luminaire are greater while the on-cost of controls per luminaire is the same.

RETAIL

Control systems for retail chains are all about offsite management and control. The lighting controls requirement behind the scenes is like other commercial premises but the front-of-house requirement is very different. The visible lights should never switch off during trading hours, else the store looks closed.

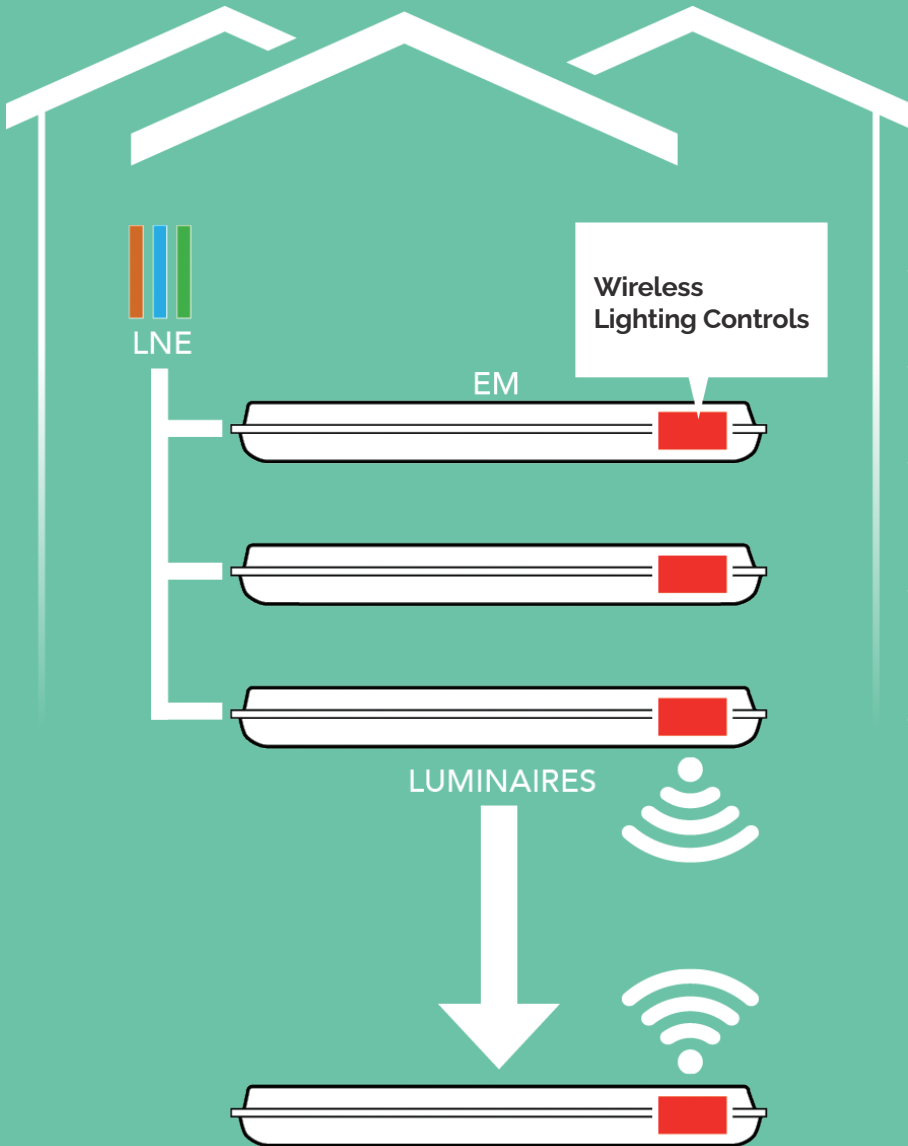

CAR PARKS

Lighting Controls in car parks pose a set of challenges which arguable can only be solved with wireless controls. An optimum solution needs almost as many overlapping groups as the number of luminaires. Previous attempts to solve this with DALI have been complicated and, even where they appear to work at the outset, fall into disuse after the first attempt at any modifications or maintenance.

e-Motion™ Cloud

Wireless Lighting Controls

Core System

- Every luminaire will have a wireless controller and a presence sensor.
- The only connections to the luminaires are Live, Neutral and Earth.
- This includes the emergency luminaires which no longer need a separate switched live.
- One Luminaire per zone might have a daylight sensor. Wireless scene-plates might be added for scene-setting.
- That's it! There are no remote sensors, Lighting Controls Modules, network controllers or head-end PC onsite.

Optional Cloud Monitoring

- Internet connectivity is not required nor used for lighting controls.
- The system can be linked to the internet by adding a Collator.
- The online portal can now be used to monitor and control emergency lighting, energy usage, occupancy heatmapping and e-mail alerts for maintenance

Commissioning

- Import, sketch or photograph each zone. Wirelessly identify fittings and drag onto the drawing.
- Assign and edit profiles.
- Link fittings into unlimited overlapping groups for occupancy daylight and scene controls

e-Motion™ Corridor

ASD has a wide range of dimmable luminaires that are suitable for use with ASDs' e-MOTION systems.

This system can control a range of lamp types including 2D, compact fluorescent and T5 circular and now LED, a system unique in the LED marketplace to ASD lighting.

Ideal for stairwells and corridors where lighting is required to be turned on 24/7 but may only be actively used for a small proportion of that time. For example, hotels etc. On emergency or secondary stairwells or healthcare corridors where luminaires are required to be turned on but in reality these areas are rarely used.

e-MOTION Corridor – What is it?

The 'e-MOTION Corridor' system is a simple lighting control system that can perform in small or large premises and has the benefit of complex functionality if required, whilst remaining very simple to install and maintain.

The 'e-MOTION Corridor' system is energy efficient and economical and can give savings of up to 70% energy use in 24 hour applications.

The system works by using specialist DALI control gear which can be programmed to meet the customers specific requirements.

The ASD Lighting 'e-MOTION Corridor' system uses integral Microwave sensors which detect movement. These are fully concealed so that unlike much of the competition, the fittings look completely normal on the outside and do not have any protruding sensors.

The system is modern, highly effective technological approach to conserving energy for situations where the area is used as a thoroughfare and in all reality the lighting is only required for a small proportion of time.

Corridor starts at its pre-set dimming % (eg 10%). Once the sensor picks up movement the fittings instantly come up to full brightness.

As you move along the corridor and the activation time elapses on the first fittings they dim back down to their pre-set dimming % (eg 10%).

e-Motion™ Day Light

Lighting control systems and lighting management systems have established themselves as permanent features of modern lighting solutions and provide the basis for daylight-dependent lighting.

Most commonly used to dim the row of luminaires closest to the windows in open spaces to create a defined constant light value along the window row, or possibly further into an open space if daylight penetration comes from skylights / roof windows.

The system uses digital DSI Ballasts and a light sensor. If the available daylight level falls, the luminaires are automatically turned on at a pre-set value.

- **Intelligent system with some programmability which remains simple to install.**
- **Savings of up to 30% can be made in energy use.**
- **Presence / absence detectors can be incorporated into the system to take full advantage of any further energy savings to be made.**

The basic components needed are a DSI room sensor and dimmable control gear for the various light sources. With such an array of products any lighting task can be covered.

Tailored to individual requirements, the intelligent lighting control systems and lighting management systems from ASD are based on the versatility of the digital interface and the self-detection capacity of the control signal.

Tried and trusted DSI technology (Digital Serial Interface) and the DALI interface protocol (Digital Addressable Lighting Interface), offer application-specific flexibility for both small and extensive lighting systems. The modular DIM system is designed primarily for controlling groups of luminaires in large enclosed spaces.

e-motion DAYLIGHT provides an easy-to-use cost-effective constant lighting system. The sensors detect the available ambient light and use this as the basis for controlling the lighting system to achieve a defined constant light value. This set-point (fade value) can be temporarily adjusted and the system switched on or off via DSI signals.

DSI is the traditional digital control. The intelligent functions of DSI lighting management include programmability, the option of common routing of the control line and mains power supply, and interference free communication.

e-Motion™ One Touch

A simple to install and cost effective system for switching and dimming of up to 25 ballasts (Digital H.F regulating). A system normally associated with single rooms. By the use of a push to make switch, a single press will turn the luminaires on or off. Pressing and holding the switch will dim or brighten the lamps.

The e-motion ONE-TOUCH provides a simple but ingenious way of switching and dimming fluorescent fittings from ASD, all with a simple conventional mains voltage switch. In a direct comparison with other cost-effective control methods, it not only has a distinct cost advantage (a switch is cheaper for example than a 1...10 V potentiometer) it also offers numerous intelligent functions:

- **Silent operation.**
- **A wide range of ASD luminaires are suitable for this system.**
- **Simple, cost-effective and extremely user-friendly.**
- **Powerless switching via the control interface.**
- **Two way or multi-position switching is possible.**

Multi-functional switch

Different functions are performed depending on the current operating status and how long the switch is pressed. A short press on the switch switches the connected ballasts on or off depending on their current status. Holding down the switch will fade the connected ballasts up or down, with the direction of fade changing each time the switch is pressed.

The system can be synchronised after setup by holding down the switch for more than 10 seconds. Synchronisation causes the lighting level to jump to 50%.

Simplicity itself

As in the case of changing from DSI to DALI control, there is no need to rewire the luminaire when changing to e-motion ONE-TOUCH control. All you have to do is integrate a bridge on the luminaire terminal from the neutral conductor to an interface input (D1/D2) and connect the phase to the other interface input.

Technical Specification:

- **Any number of conventional switches.**
- **The control signal corresponds to the mains voltage.**
- **Fade rate 2.55 sec. (1 % to 100 %)**
- **Unlimited length of the control line**
- **Control of a theoretically unlimited number of ballasts (recommended: 25 ballasts per system).**
- **Dimming possible via a second phase.**

e-Motion™ Microwave

The interior range from ASD now offers the option of including the latest state-of-the-art sensor technology. High-frequency sensors can be invisibly concealed inside a number of our attractive luminaires. The sensor instantly responds to the tiniest movement, regardless of temperature and will automatically switch "ON" the light.

Integral HF "Microwave" Sensor

The system uses remote or integral microwave detectors which upon sensing movement switches all luminaires on the system up to full output.

When no movement is detected, after a pre-set time the system turns off after activation time elapses.

- Fully adjustable settings to suit any installation.
- Takes full advantage of energy savings. Can be up to 70% on a 24 hour application.
- A wide range of ASD luminaires are suitable for use with e-motion MICROWAVE sensor.

ASD HF Microwave sensors are designed specifically for indoor spaces, such as stairwells, corridors or bathrooms. The innovative lights can be either wall or ceiling mounted. HF Sensor Lights ensure efficient, money-saving light management as well as added convenience and safety in the home, commercial premises, administration centres and other buildings.

The intelligent fitting is just as easy and quick to install as conventional luminaires – and there's no need for separate switches or motion detectors.

Benefits at a glance:

- Safety, convenience and energy saving because light comes "ON" automatically.
- Extremely rapid response time.
- Reliable, all-round detection regardless of ambient temperature and direction of movement.
- Reach, light threshold and "ON" time adjustable to suit needs.
- Rapid installation: Sensor and light = 1 connection.

Detection zones for ceiling mounting.

Response threshold can be set from 2 to 2000 lux to suit individual needs.

Detection zones for wall mounting.

Light can be set to stay "ON" for any time between 5 sec. and 15 min.

Voltage		230 – 240V 50 Hz
HF System	5.8 GHz (responds to the tiniest movement regardless of temperature)	
Angle of coverage	360° with 160° angle of aperture	
Transmitter power	Approx 1mW	
Reach	1 – 8m infinitely variable	
Max. area covered	Approximately 50 m ²	
Time setting	5 sec – 15 min	
Twilight setting	2 – 2000 Lux	
Permanent light	–	
Brightness control	–	
Special features	Other loads can be connected (100 VA max, e.g. bathroom / WC extractor fan or additional light)	

e-Motion™ Scene

Infra-red scene setting system provides 3 program scenes suitable for a variety of applications such as conference rooms, meeting rooms, lecture theatres, or any space where a selection of lighting scenes may be required.

Requires the use of dimmable ballasts, an infra-red receiver and a hand held controller to create three separate lighting scenes, with an over ride facility.

The control module is connected using a two wire bus system taken to each luminaire. The infra-red receiver is then connected to the control module.

Using the hand held programmer, all the required lighting scenes can be set up simply and quickly.

Hard wired switches can be incorporated into the system at any position.

The result is a professional solution that is easy to handle, simple to install and extremely cost-effective.

A wide range of ASD luminaires are suitable for use with e-motion SCENE.

e-Motion™ Emergency

The intelligence of individually addressable EmPRO emergency lighting unit is now available for small emergency lighting systems. This is thanks to the new e-PANNEL, which has been developed with user-friendliness as an absolute priority.

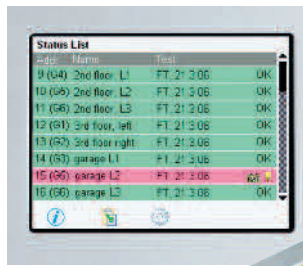

Systems are available to connect up to 60 or 120 emergency lighting units. Three addresses are reserved for relay modules so that different operating conditions can be indicated by signal lamps.

The e-PANNEL is synonymous with simple configuration, with high-quality monitoring and automatic triggering of all the emergency lighting tests prescribed in the relevant standards. These include the check on the operability of modules, batteries and lamps, the annual service life test and the commissioning check after installation in accordance with the self-test standard as per IEC 62034.

An algorithm automatically assigns all the addresses to six test groups so that the prescribed tests on the emergency lighting units start at staggered times. This ensures that there are always enough luminaires operational at any one time should there be a mains failure. A perfect example of intelligent functionality.

Fault messages are shown on the e-PANNEL display, stored in memory and maintained as a log book. The data can be read out via an infra-red link and further processed (archived for example), burnt onto CD or printed out.

e-PANNEL

PANNEL

Snap in Connectors & Modular Wiring System

Fast, reliable and already tried and tested millions of times, the future of electrical connection clearly belongs to the snap-in connector. Modular wiring systems have the right solution to satisfy any practical requirement in contemporary building applications.

In the modern age where time is money, modular wiring systems are becoming more and more essential to keep installation costs down, this allows all parties to maximise their efficiency.

From Warehouses to Office Blocks, Football Grounds to Schools, modular wiring systems are being used more and more often and with more innovative fittings utilising inbuilt connectors it has never been easier to use.

ASD Lighting works very closely with all major suppliers of modular wiring and connectors meaning we can supply and specify any make and model as per the clients requirements, these include;

Wago

Wieland

Metway

Below is a brief description of the components available;

Male and female connectors

In 2, 3, 4, and 5 pole with 2 conductor entries per pole and time and cost saving Cage Clamp S connection which allows looping through of wiring. The connectors have unique coding and colours and are pre-marked.

Snap in connectors

Snap in connectors (2, 3, 4, and 5 pole) with integrated locking device make feedthrough connection easy. Direct earth connection to a metal enclosure is available as an option.

More lighting manufacturers are fitting these as standard.

T-pieces

In 2, 3, 4, and 5 pole, these make the connection of lighting fixtures easy, without using a junction box. The through wiring is simply plugged in each side.

Distribution connector

This can act as a star distribution point, in a ceiling installation for example, with leads connecting each side. Mounting options are available.

Distribution connector with phase selector

The extra feature allows equalisation of phase loading in a lighting circuit for example. Simple movement of the white lever selects the chosen phase.

Six pole strain relief

This allows simultaneous use of two 3 pole connectors to make a 6 pole connector, essential in lighting control applications.

Clean earth

For use in clean earth and high integrity earth applications only, their different coding and colour ensure mismatching is not possible. Available in 4 and 5 pole, with either 2 or 3 earth connections and with 2 current carrying poles.

For more information or a Modular wiring design using ASD Lighting products please contact the lighting specification team. specifications@asdlighting.com

Step Dimming

Reference Schedule

Step	1	2	3	4	5	6	
Output Level	100	70	60	40	100	0	%
Time	ON	22:00	00:00	04:00	06:00	OFF	hh:mm

Dewsbury & District Hospital

ASD Lighting provided a modern refresh on this general district hospital based in Dewsbury, providing energy savings inside and out.

Luminaires used:

- Highway Diamond™ Elite
- Horizon LED
- Corrido LED
- Melody LED
- Artemis Uplight
- Rhapsody PLUS LED
- Storm LED

Raynesway Junction - Derby

ASD Lighting Illuminates Raynesway Junction utilising the Highway Diamond™ Elite™ range.

- 56 x Midi Highway Diamond™ Elite lanterns replaced 56 x 250W SON lanterns.
- 4 x Highway Diamond™ Elite lanterns replaced 4 x 60W Cosmo lamps.

All of this is making an energy saving of 38,500kW converting to LED, with a whopping cost saving of £4150.00 per annum. That's 61% Energy savings made.

Wonderpass Subway London

We are delighted to have participated in transforming the bleak Marylebone Road Subway in into a Wonderpass. Gone are the wet puddles and bleak lighting. Say hello to the light, and colourful Wonderpass. Thanks to our Invincible fitting, you need never worry about the dark again.

The Invincible was the best choice for this project, not only does it earn its name by being tough and vandal resistant, but it also gives out just the right amount of light and is economical to run.

The Wonderpass was commissioned by Local business improvement district the Baker Street Quarter Partnership and funded by Transport for London and Westminster City Council.

Penny Alexander, chief executive of the Baker Street Quarter Partnership, said "The Wonderpass provides the magnificent fanfare welcome this area deserves celebrating its fascinating past and showcasing our great attractions."

Rotherham United - New York Stadium

ASD Lighting schemed the lighting for the New York Stadium which was completed in 2012.

The environments that were schemed -

- Surrounding car park / footpath & external wall - Highway LED / Horizon / Litehouse.
- RUFC shop - Skybay LED / Safe Route / Pizza.
- Hall ways / Reception - Atom LED / ZIP / Harmony Halo.
- Internal rooms and viewing boxes - Atom LED / ZIP / Storm / Liteglide 7.
- Pitch surround (Not flood lights) - Harmony / Harmony Halo / Stealth.

Bank Offices - Bristol

A Bristol branch of a popular banking company tasked ASD Lighting with bringing light to their office space. Realising their vision for an ideal office lighting solution we used our Rhapsody LED fitting.

Creating a comfortable environment with the minimal amount of glare on computer screens was key, which the Rhapsody LED's soft lighting achieves easily. Lessening the glare reduces eye strain for employees and other side effects such as headaches or migraines.

ASD Lighting and the bank are both happy with the final result.

Auchterarder Community School

ASD Lighting provided the lighting solution for the Auchterarder Community School in Scotland as one of our latest projects.

For this we decided our versatile Solas Eclipse would be perfect.

Location: Auchterarder, Perth and Kinross, Scotland.

Coppice & Ashleigh Gardens

ASD Lighting designed and supplied the street lighting for Coppice Gardens.

Customer: Rotherham Council.

Location: Greasbrough, Rotherham, South Yorkshire.

Fittings Used: Highway Diamond™.

Kyle Academy School

Kyle Academy, a school in Ayr, Scotland specified ASD Lighting as their lighting suppliers for a recent project. We fitted out their Design Technology, Metalwork and Woodwork rooms with our luminaires.

For the Design Technology room we used our Rhapsody Plus, which is ideal for office lighting and areas with display screen equipment.

For the Metalwork and Woodwork rooms we used our Highlite Micro luminaires. These were better suited to the lower mounting height of the warehouse-style ceiling than our Highlite.

Meadowhall Interchange, Sheffield

Busy Interchange next to popular shopping centre Meadowhall based in Sheffield, South Yorkshire, receives full lighting upgrade with energy saving lighting controls.

- 20m High mast fitted with Midi Highway Diamond™ Elite 76 LED 700mA FO Optic to achieve an average of 20 lux.
- All platforms fitted with Highway Diamond™ Elite with PIR non-occupancy dimming.
- Designed to 20 lux min at platform edge in line with DOO Requirements.
- Stealth Elite wall pack mounted on building perimeter.
- Secondary Station entrance/exit now used substantially more by the public due to the enhanced lighting provided by the Highway Diamond™ Elite Range.
- Waiting area is lit up with the ZIP LED Downlight and Midi Pizza using e-Motion Non-occupancy Dimming.
- Melody LED e-Motion™ Non-occupancy 10% Dimming in ticket office.

Grimsby Town Railway Station

Grimsby train station received a full lighting upgrade, improving safety and reducing energy costs.

Luminaires used:
Stealth.
Highway Diamond™ Elite.

Professional lighting design service.

Lighting or the design of lighting has been widely described as a mixture of both art and science. If upon entering a space the lighting looks and feels 'right' to the observer, the chances are that it has been correctly designed, as complaints are normally only raised if the installed lighting system is seen as too bright, too dim or causes glare issues for occupiers of the space. There are a large number of British/European standards; Codes of practice; professional lighting guides and industry specific documents that apply or give guidance for the lighting of any Internal, External, Emergency or Roadway lighting system. These documents are organic and are constantly updated to reflect new ideas or technological advancement.

Lighting Design

Competent Lighting Designers are aware of the various current lighting publications and can advise clients on a wide range of lighting design considerations as required, as well as having an element of design flair to help provide a pleasing lit environment.

ASD Lighting are proud to have a team of fully trained and competent lighting designers that can deliver an excellent service to clients such as architects, consultants, specifiers, installers and end users.

For further details please contact the Lighting Design department on:

Lighting Design

Relevant groups bodies and organisations involved in lighting

Including but not limited to:

Society of Light and Lighting

Institute of Lighting Professionals

Leaders in the field of professional Lighting. Both organisations have a wide portfolio of lighting design guidance available for almost any internal or external space, or emergency lighting. Members are Professionals who are involved in the lighting of a wide range of projects.

C.I.E. (International Commission on Illumination). Perform fundamental research into lighting metrics and measurement.

L.I.A. (Lighting Industry Association). Provide data to their manufacturing members.

B.S.I. (British Standards Institution) / Lighting Liaison Group – Develop product performance specification for products and the spaces they will be installed. A wide range of British Standards are available for the lighting of most interior or exterior spaces. Linked with the I.E.C. (International electro-technical commission) for International co-operation.

H.E.A. (Highways Electrical Association). Supports organisations involved in the technical delivery of streetlighting.

U.K. roads liaison group / U.K. lighting board. Provide the U.K. Government with strategy and policy advice on street lighting.

A.D.E.P.T. Have a lighting group for local authority based input into lighting issues.

There are design guidance or British standard publications for almost every space you can think of, including workplaces of all kinds; Industrial spaces; Offices; Sports facilities; Residential developments; Places of Worship; Museums and Art Galleries; Education premises; Outdoor spaces and Emergency Lighting for all scenarios.

As well as the documents mentioned above, there are specific design guides that are used within organisations such as Defence projects, Hospital buildings and Railway sites amongst others which are specific to their particular needs. Local Authorities may have particular local requirements for lighting within their authority.

IP Ratings

The IP (Ingress Protection) rating given to an enclosure states the degree of protection it offers by means of two digits. A summary of these is shown below; for a more detailed definition see IEC 529:1989, BS EN 65029: 1992.

First Digit

The first digit covers protection against entrance of solid objects, which includes hands and tools such as screwdrivers. At the lowest of seven levels 0, no protection is offered, either of the equipment itself from damage by intrusion or of a person contacting live or moving parts. At the highest, 6 there shall be no entry of dust.

0 Zero protection

1 Protection against solid objects e.g. accidental touch by hands.

2 Protected against solid objects up to 12mm e.g. Fingers.

3 Protected against solid objects up to 2.5mm e.g. Tools and Wire.

4 Protected against solid objects up to 1mm e.g. tools, wires and small wires.

5 Protected against dust - limited ingress no harmful deposits.

6 Totally protected against dust.

Second Digit

The second digit cover the degree of protection against the entry of water, on a progressive scale. For example, number 1 indicates that dripping water shall have no harmful effect, and number 6, that water projected in powerful jets against the enclosure from any direction shall have no harmful effects.

0 Zero protection.

1 Protected against vertical falling drops of water e.g. condensation.

2 Protected against direct spray of water up to 15° from vertical.

3 Protected against direct sprays of water up to 60° from vertical.

4 Protected against water splashed from all directions - limited ingress permitted.

5 Protected against low pressure jets of water from all directions - limited ingress permitted.

6 Protected against strong jets of water from all directions.

7 Protected against the effect of immersion between 15cm and 1m.

8 Protected against long periods of immersion under pressure.

5. Protected against high pressure jets of water from all directions - limited permitted

IP65

6. Totally protected against dust.

Example ASD fittings:

Pizza, Mini Pizza, Mini Square, IP65 Square

4. Protected against water splashed from all directions - limited ingress permitted

IP44

4. Protected against solid objects up to 1mm.

Example ASD fittings:

Circular Bulkhead, Lantern Range, Selected Harmony Lines

N.B. The letter X can be used instead of the first or second digit to indicate that tests have either not been made or are not applicable.

IK Ratings

The IK (Impact Protection) rating given provides us with the level of protection the luminaire offers. As defined in the international standard IEC 62262 and IEC 60068-2-75, it classifies the degree of protection provided by enclosures for electrical equipment against external mechanical impacts.

IK Code	Test and Level of Protection Achieved
IK00	Not protected
IK01	Protected against 0.14 joules impact. Equivalent to impact of 0.25Kg Mass dropped from 56mm above impacted surface.
IK02	Protected against 0.2 joules impact. Equivalent to impact of 0.25Kg Mass dropped from 80mm above impacted surface.
IK03	Protected against 0.35 joules impact. Equivalent to impact of 0.25Kg Mass dropped from 140mm above impacted surface.
IK04	Protected against 0.5 joules impact. Equivalent to impact of 0.25Kg Mass dropped from 200mm above impacted surface.
IK05	Protected against 0.7 joules impact. Equivalent to impact of 0.25Kg Mass dropped from 280mm above impacted surface.
IK06	Protected against 1 joules impact. Equivalent to impact of 0.25Kg Mass dropped from 400mm above impacted surface.
IK07	Protected against 2 joules impact. Equivalent to impact of 0.5Kg Mass dropped from 400mm above impacted surface.
IK08	Protected against 5 joules impact. Equivalent to impact of 1.7Kg Mass dropped from 300mm above impacted surface.
IK09	Protected against 10 joules impact. Equivalent to impact of 5Kg Mass dropped from 200mm above impacted surface.
IK10	Protected against 20 joules impact. Equivalent to impact of 5Kg Mass dropped from 400mm above impacted surface.

There are some circumstances where the luminaire requires even greater protection such as those used in custodial or public spaces. EN60068-2 does not allocate codes above IK10, the following have been extrapolated and designed in accordance with this testing.

IK11	Protected against 35 joules impact. Equivalent to impact of 10Kg Mass dropped from 350mm above impacted surface.
IK12	Protected against 15 joules impact. Equivalent to impact of 10Kg Mass dropped from 500mm above impacted surface.
IK13	Protected against 75 joules impact. Equivalent to impact of 10Kg Mass dropped from 750mm above impacted surface.
IK14	Protected against 100 joules impact. Equivalent to impact of 10Kg Mass dropped from 1000mm above impacted surface.
IK15	Protected against 125 joules impact. Equivalent to impact of 10Kg Mass dropped from 1250mm above impacted surface.
IK16	Protected against 150 joules impact. Equivalent to impact of 10Kg Mass dropped from 1550mm above impacted surface.

Retro Fit Gear Trays

We offer replacement gear trays for existing luminaires.

Please ask for more details.

If a light fitting is in good condition, then why replace it?

ASD Lighting provides a service to retrofit gear trays, they are fully customizable to fit any particular fitting.

Upgrade your lights to LED and save on energy while improving the output.

Is your customer needing help funding their project?

ASD could help with access to Grants, Financing solutions, and Tax relief initiatives.

Please ask for more details.

Some projects are eligible for help with financing from various government and private organisations aimed at reducing the country's electricity consumption and subsequent CO2 emissions including 'The Energy Saving Trust', 'Green Deal', 'Salix' and the 'Enhanced Capital Allowances' scheme.

This could be the extra incentive your customer needs to proceed with the project, whilst also putting you in a favourable position when tendering against other companies. ASD has a specially trained department that are able to offer help and support in applying for and acquiring funding or in some cases are able to apply on behalf of the customer.

To find out if your client is eligible for one of these schemes / grants and/or more information on energy and CO2 savings please feel free to contact our commercial projects department on
