

Remote Status Unit Surface

Part No. EP210S

Overview

Designed to connect to the RS485 terminals on an EP203 Automatic Extinguisher Panel toprovide remote system status indicationviaa 128 x 64 pixel LCD status display.

Also includes a pull-down manual release button, a mode (auto/manual) keyswitch and a wide range of system status indicators.

Three monitored input connections (Hold, Abort and Mode).

Max. 8 remote status units per EP203 panel.

Flush remote status units(EP210F) and weather proof enclosures (BF359/1) also available

Technical Specifications

21-28VDC (200mA electronic fuse). Power requirements

7mA. Quiescent current

Auxiliary inputs Three: (1) Hold; (2) Abort; (3) Mode. A 6k8 EOL resistor must be fitted across the terminals of the last

device on each monitored input circuit. Unused circuits must have the 6k8 resistor fitted at the

terminals

Indicators Gen. fire; Fire Zones (x3); Gen. disablement; Hold; 1st Stage Output; 2nd Stage Output; Release

Imminent (x2); Exting. Released; Abort; Gen. Fault; Man. Only; Man/Auto.

Extinguishant release (housed in yellow casing); Operation keyswitch (Manual only or Manual & Auto). Controls

Product dimensions (mm) 160 W x 240 H x 51 D mm.

Metal. Construction & finish IP30. IP Rating 1.498kg. Weight

Network specification RS485; Max. 8 remote status units (any mix) per EP203; Four wire connection (2 power, 2 data); Daisy-

chain wiring.

-5°C to +40°C. Max relative humidity: 95%. Operating conditions/temperature
